Advanced Practice Registered Nurse	Approval	70450 CT BRAIN, HEAD		< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Advanced Practice Registered Nurse	Approval	70450 CT BRAIN, HEAD		< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications	1
Advanced Practice Registered Nurse	Approval	70450 CT BRAIN, HEAD		; This study is being ordered for trauma or injury.; ; There has not been any treatment or conservative therapy.;	1
Advanced Practice Registered Nurse	Approval	70450 CT BRAIN, HEAD		aneurysm; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
Advanced Practice Registered Nurse	Approval	70450 CT BRAIN, HEAD		Nausea; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1

Advanced Practice Registered Nurse	Approval	70450 CT BRAIN, HEAD	NONE; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
Advanced Practice Registered Nurse	Approval	70450 CT BRAIN, HEAD	None; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.	1
Advanced Practice Registered Nurse	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.	3
Advanced Practice Registered Nurse	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	9
Advanced Practice Registered Nurse	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	3
Advanced Practice Registered Nurse	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; This study is being requested for Hydrocephalus or congenital abnormality.	1
Advanced Practice Registered Nurse	Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,M AXILLOFACIAL NO CONTRAST	"This request is for face, jaw, mandible CT.239.8"; "There is a history of serious facial bone or skull, trauma or injury.fct"	1

Advanced Practice Registered Nurse	Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,MAXILLOFACIAL NO CONTRAST	This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks)	1
Advanced Practice Registered Nurse	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	Pt has lad of the left cervical region; This is a request for neck soft tissue CT.; The study is being ordered for something other than Trauma or other injury, Neck lump/mass, Known tumor or metastasis in the neck, suspicious infection/abcess or a pre-operative evaluation.	1
Advanced Practice Registered Nurse	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.	1
Advanced Practice Registered Nurse	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for suspicion of neoplasm, tumor or metatstasis	1
Advanced Practice Registered Nurse	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 5/12/16; There has been treatment or conservative therapy.; Pt suffers with headaches; facial pain and facial numbness.; medication	1

Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1

Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	nausea and vomiting; photo sensitive; sees sparkles when she closes her eyes; some memory loss; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	patient with multiple sclerosis for MRI studies being done prior to seeing neurologist; This study is being ordered for a neurological disorder.; 2009; There has been treatment or conservative therapy.; patient with multiple sclerosis for tests to be done prior to seeing neurologist; medications; seeing neurologist in Little rock	1
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Progressive worsening of tremors. The problem occurs constantly. Exacerbated by seems to be with movemnets more than at rest but not really sure. Nothing relieves the symptoms.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has fatigue or malaise; It is unknown why this study is being ordered.	1

Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt is having facial swelling when she is having headaches.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.	1
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	1
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	8

Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a “thunderclap” or the worst headache of the patient’s life.	1
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.	9
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient had a thunderclap headache or worst headache of the patient's life (within the last 3 months).	3
Advanced Practice Registered Nurse	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Unknown; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.	1
Advanced Practice Registered Nurse	Approval	71250 CT CHEST, THORAX		1

Advanced Practice Registered Nurse	Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	7
Advanced Practice Registered Nurse	Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Advanced Practice Registered Nurse	Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.	1
Advanced Practice Registered Nurse	Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient quit smoking in the past 15 years.; The patient does NOT have signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
Advanced Practice Registered Nurse	Approval	71250 CT CHEST, THORAX	Difficulty swallowing.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 06/07/2016; There has not been any treatment or conservative therapy.; Patient is experiencing chronic constipation.	1

Advanced Practice Registered Nurse	Approval	71250 CT CHEST, THORAX	It is not known if there is radiologic evidence of non-resolving pneumonia.; It is not known if there is radiologic evidence of asbestosis.; New patient, history of COPD, bronchitis, unexplained weight loss, and history of smoking.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "The caller doesn't know if there is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; It is not known if there is radiologic evidence of a lung abscess or empyema.; It is not known if there is radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
Advanced Practice Registered Nurse	Approval	71250 CT CHEST, THORAX	small area of pneumonia right lower lobe; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Advanced Practice Registered Nurse	Approval	71250 CT CHEST, THORAX	SOB at rest; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1

71250 CT CHEST,
THORAX

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Pt's xray shows Right midlung opacification is again seen which is not significantly changed compared to the prior study and is indeterminate. CT of the chest is recommended for further evaluation; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

1

Advanced Practice Registered Nurse	Approval	71250 CT CHEST, THORAX	There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
Advanced Practice Registered Nurse	Approval	71250 CT CHEST, THORAX	Ultrasound showed multiple swollen lymph nodes. Need a Ct scan to give a better image; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Advanced Practice Registered Nurse	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.	2
Advanced Practice Registered Nurse	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	multiple cervical spine Fx s; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.	1
Advanced Practice Registered Nurse	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Lower extremity weakness.	1
Advanced Practice Registered Nurse	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	This study is to be part of a Myelogram.; This is a request for a Cervical Spine CT	1

Advanced Practice Registered Nurse	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Thyroid problems, swollen glands, dizziness, nausea, fatigue, ear pain, Abnormalities in neck, tenderness;; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1
Advanced Practice Registered Nurse	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Unknown; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1
Advanced Practice Registered Nurse	Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	L side numbness and tingling and pain. Weakness; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1-29-2008; There has been treatment or conservative therapy.; Pt experiencing parathesia, pain, numbness and tingling. Weakness and flank pain as well, no incontinence for stool or urine.; Stimulator and RX	1
Advanced Practice Registered Nurse	Approval	72131 CT LUMBAR SPINE, LOW BACK	L side numbness and tingling and pain. Weakness; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1-29-2008; There has been treatment or conservative therapy.; Pt experiencing parathesia, pain, numbness and tingling. Weakness and flank pain as well, no incontinence for stool or urine.; Stimulator and RX	1

Advanced Practice Registered Nurse	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.	3
Advanced Practice Registered Nurse	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.	1
Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	1
Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.	1

Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	8
Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	2
Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	3
Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; <Enter Additional Clinical Information>	1
Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	unknown; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; C/O neck pain X2months. negative xray, 6 weeks of PT, no improvement. c/o pain in neck to both shoulders and both arms. also c/o numbness,tingling,and weakness in Left arm; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1

Advanced Practice Registered Nurse	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4/15/16; There has been treatment or conservative therapy.; Pt is a mechanic when he reaches up hehas radicular pain going down into his arms and hands and legs that is described as sharp pain whether he is looking up or down; stretching exercise and PT and chiropractor	1
Advanced Practice Registered Nurse	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; unknown; There has been treatment or conservative therapy.; clicking noise in knee, its unstable, bulging disc in thoracic spine region; lycra	1
Advanced Practice Registered Nurse	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	2
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.	1

Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; numbness on inside of thighs; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.	1
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Acute midline low back pain after motorcycle fell over on him 8/4/16. Abnormal lumbar spine xray, possible compression fracture; The study requested is a Lumbar Spine MRI.; Trauma or recent injury; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.	1

Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	patient with multiple sclerosis for MRI studies being done prior to seeing neurologist; This study is being ordered for a neurological disorder.; 2009; There has been treatment or conservative therapy.; patient with multiple sclerosis for tests to be done prior to seeing neurologist; medications; seeing neurologist in Little rock	1
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	1
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	1
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	44
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal nerve study involving the lumbar spine	1
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	9
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks	1

Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	12
Advanced Practice Registered Nurse	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4/15/16; There has been treatment or conservative therapy.; Pt is a mechanic when he reaches up hehas radicular pain going down into his arms and hands and legs that is described as sharp pain whether he is looking up or down; stretching exercise and PT and chiropractor	1
Advanced Practice Registered Nurse	Approval	73200 CT ARM OR UPPER EXTREMITY	This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.	1
Advanced Practice Registered Nurse	Approval	73200 CT ARM OR UPPER EXTREMITY	This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is not a history of upper extremity joint or long bone trauma or injury.; This is a preoperative or recent postoperative evaluation.	1
Advanced Practice Registered Nurse	Approval	73221 MRI JOINT OF UPPER EXTREMITY	< Enter answer here - or Type In Unknown If No Info Given. >; The requested study is a Shoulder MRI.; The pain is not from a recent injury, old injury, chronic pain or a mass.; The request is for shoulder pain.	1
Advanced Practice Registered Nurse	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation.";	1

Advanced Practice Registered Nurse	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; < Enter answer here - or Type In Unknown If No Info Given. >	3
Advanced Practice Registered Nurse	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; deep pain in left shoulder, range of motions hurts, joint pains.	1
Advanced Practice Registered Nurse	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.	2
Advanced Practice Registered Nurse	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; injury occurred from sports; used cold paks but shoulder still aches	1
Advanced Practice Registered Nurse	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to trauma within past 72 hours.; The patient has had recent plain films of the shoulder.; The results of the plain films is not known.; The patient is experiencing joint locking or instability.	1

Advanced Practice Registered Nurse	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; The pain is described as chronic; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1
Advanced Practice Registered Nurse	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	2
Advanced Practice Registered Nurse	Approval	73221 MRI JOINT OF UPPER EXTREMITY	This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.	1

Advanced Practice Registered Nurse	Approval	73221 MRI JOINT OF UPPER EXTREMITY	This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.	1
Advanced Practice Registered Nurse	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a foot CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.	2
Advanced Practice Registered Nurse	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is a history of lower extremity joint or long bone trauma or injury.	1
Advanced Practice Registered Nurse	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is suspicion of lower extremity bone or joint infection.	1

Advanced Practice Registered Nurse	Approval	73706 CT ANGIOGRAPHY LOWER EXTREMITY	Yes, this is a request for CT Angiography of the lower extremity.	1
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Friday night the patient bent down and it buckled and popped and can barely walk on it now; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	1
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Patient has taken anti- inflammatory medication; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.	1
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Pt has ulcer on left 4th toe; wants to r/o osteomyelitis; This is a request for a foot MRI.; It is not known if surgery is planned for in the next 4 weeks.; The study is being ordered for infection.; There are physical exam findings, laboratory results, other imaging including bone scan or plain film confirming infection, inflammation and or aseptic necrosis.	1
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.	1

Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury	4
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Instability	1
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Swelling greater than 3 days	1
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Limited range of motion	1
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Swelling greater than 3 days	1

Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; No, the member do not experience a painful popping, snapping, or giving away of the knee.	1
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days	2
Advanced Practice Registered Nurse	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; It is not known if the study is ordered prior to arthroscopic surgery.; "This study is not being ordered prior to a planned or scheduled open surgery (joint replacement, etc.)."; The ordering physician is not an orthopedist.; Pre-operative Evaluation; Pain greater than 3 days	1

Advanced Practice Registered Nurse	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	Hip Displsia; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; May 2016; There has been treatment or conservative therapy.; Constant pain in the hips; Pain Meds	1
Advanced Practice Registered Nurse	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.	1
Advanced Practice Registered Nurse	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.	1

Advanced Practice Registered Nurse	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	ABDOMINAL PAIN SINCE 7/14/16, PT STARTED TAKING CARE FATE AND PRILOSEC WITH NO RELIEF, RIGHT UPPER QUDRANT TENDERNESS NO REBOUND.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Advanced Practice Registered Nurse	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Rule out hernia; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Advanced Practice Registered Nurse	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; It is not known if this is a request for initial staging of a known tumor other than prostate.; There is no known prostate cancer with a PSA greater than 10.; It is not known if this is a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; No, there has not been a recent abdominal CT scan.	1

Advanced Practice Registered Nurse	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer.	1
Advanced Practice Registered Nurse	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; This patient is experiencing hematuria.; The hematuria is newly diagnosed.	1
Advanced Practice Registered Nurse	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1
Advanced Practice Registered Nurse	Approval	74175 CT ANGIOGRAPHY ABDOMEN W/CONTRAST/NONCONTRAST	Yes, this is a request for CT Angiography of the abdomen.	1
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST		1

Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.	1
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.	1
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	51 year old female w/ LRQ pain, watery stools; for one month. nausea and vomiting also; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were unknown.	1
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	abd. mass; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; It is not known if the pain is acute or chronic.; It is not known if this is the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.	1

Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	bilateral flank pain, dysuria, recurrent UTI; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; The reason for the hematuria is not known.; This study is not being requested for abdominal and/or pelvic pain.; The study is requested for hematuria.; The results of the urinalysis were abnormal.; The urinalysis was positive for protein.	1
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	Difficulty swallowing.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 06/07/2016; There has not been any treatment or conservative therapy.; Patient is experiencing chronic constipation.	1
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	Pt having abdominal pain; hematuria was found on her labs; r/o kidney stone; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.	1
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	SEVERE CROHNS DISEASE WITH COMPLICATIONS,N/V,ABD PAIN,LARGE INCARCERATED HERNIA,STRICTURE,EVALUATE ABD MASS,ABD LAB; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; It is not known if a pelvic exam was performed.	1

Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were abnormal.; The urinalysis was positive for hematuria/blood.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.	1
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; It is not known if there are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; It is not known if there is a suspicion of an adrenal mass.; It is not known if this is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; <Enter Additional Clinical Information>	1
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; The requested study is for post-operative evaluation.; The requested study is a first follow up study for a post operative complication.; Pre-op or post op evaluation	1

Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	10
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other	2
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.;	1
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; <Enter Additional Clinical Information>	3

Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Abd pain near syncope ASHD	1
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; abdominal pain	1
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Having sharp pain in left lower quad radiates around urinary frequency	1
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; MEMBER HAS CYST	1
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; pain	1
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Patient has flank pain, urinary frequency, diarrhea, left kidney tenderness, history of polycystic kidney disease	1

Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Patient has recurrent UTI, urethra prolapse	1
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; UNKNOWN	1
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone	16
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor	2
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.; Organ Enlargement	1
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.; Suspicious Mass or Tumor	2

Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is a suspicion of an adrenal mass.; Suspicious Mass or Tumor	2
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; It is not known if this is a request for initial staging of a known tumor other than prostate.; There has not been a recent abdominal and or pelvis CT scan.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; Suspicious Mass or Tumor; yes, there is a palpable or observed abdominal mass.; <Enter Additional Clinical Information>	1

Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or R/O metastases	1
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; It is not known if this is a request for initial staging of a known tumor other than prostate.; There has not been a recent abdominal and or pelvis CT scan.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; yes, there is a palpable or observed abdominal mass.	1
Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is not a request for initial staging of a known tumor other than prostate.; There has not been a recent abdominal and or pelvis CT scan.; There is no known prostate cancer with a PSA greater than 10.; Known Tumor, Cancer, Mass, or R/O metastases; yes, there is a palpable or observed abdominal mass.	2

Advanced Practice Registered Nurse	Approval	74176 CT ABD & PELVIS W/O CONTRAST	Ultrasound showed multiple swollen lymph nodes. Need a Ct scan to give a better image; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Advanced Practice Registered Nurse	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; Yes, this is a confirmed breast cancer.; Yes, the results of this MRI (size and shape of tumor) affect the patient's further management.	1
Advanced Practice Registered Nurse	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Advanced Practice Registered Nurse	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.	1

Advanced Practice Registered Nurse	Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Head/Neck Cancer.; The patient had a thyroidectomy and radioiodine ablation.; It is unknown if the patient has a serum thyroglobulin level greater than 10ng/mL.; The patient has Thyroid cancer.	1
Advanced Practice Registered Nurse	Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lung Cancer.	1
Advanced Practice Registered Nurse	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Breast Cancer.	1
Advanced Practice Registered Nurse	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.	1
Advanced Practice Registered Nurse	Approval	93350 ECHO TTHRC R-T 2D +-M-MODE COMPLETE REST&STRS	This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease	1
Advanced Practice Registered Nurse	Approval	93350 ECHO TTHRC R-T 2D +-M-MODE COMPLETE REST&STRS	This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.	1

Advanced Practice Registered Nurse	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	headaches; and altered mental status; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
Advanced Practice Registered Nurse	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	None; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.	1
Advanced Practice Registered Nurse	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	unknown; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The headache is not described as a "thunderclap" or the worst headache of the patient's life.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.	1
Advanced Practice Registered Nurse	Disapproval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	Radiology Services Denied Not Medically Necessary	C/O Swollen Area On Left Side Of Neck x 5 Days That Is Sore/. 2. States Throat Hurts,But Not Sore,Rates Pain In Throat,Neck At 7 Evaluation of enlarged lymph node; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; It is not known if there is a palpable neck mass or lump.	1
Advanced Practice Registered Nurse	Disapproval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.	1

Advanced Practice Registered Nurse	Disapproval	70544 Mr angiography head w/o dye	Radiology Services Denied Not Medically Necessary	h53.9.; There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.	1
Advanced Practice Registered Nurse	Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 5/12/16; There has been treatment or conservative therapy.; Pt suffers with headaches; facial pain and facial numbness.; medication	1
Advanced Practice Registered Nurse	Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/4/2016; There has not been any treatment or conservative therapy.; SEVERE ABDOMINAL PAIN, AND FAINTED.	1
Advanced Practice Registered Nurse	Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1

Advanced Practice Registered Nurse	Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Losing memory and train of thought worsened over the last month. Decreased concentraton.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; It is unknown why this study is being ordered.	1
Advanced Practice Registered Nurse	Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	PT reports a increases in severity of headache and increase in pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4/13/16; There has been treatment or conservative therapy.; Headache and neck pain; Pain management and exercise	1
Advanced Practice Registered Nurse	Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	r/o tumor; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient does not have HIV or cancer.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.	1
Advanced Practice Registered Nurse	Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	radiculopathy; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4/27/16; There has been treatment or conservative therapy.; headache, low back pain; Pain management	1

Advanced Practice Registered Nurse	Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Advanced Practice Registered Nurse	Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
Advanced Practice Registered Nurse	Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically Necessary	Chest CT is being ordered to evaluate a lung nodule. Lumbar MRI and Thoracic MRI are being ordered to get a better look at how bad back may be; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1

Advanced Practice Registered Nurse	Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically Necessary	none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; on going for a week, Diarrhea for 2yrs; There has not been any treatment or conservative therapy.; fatigue, diarrhea, ABN weight loss	1
Advanced Practice Registered Nurse	Disapproval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Radiology Services Denied Not Medically Necessary	To check for defect on previous neck surgery; This study is being ordered for a neurological disorder.; date of onset is unknown; There has been treatment or conservative therapy.; neck and lumbar pain, previous neck surgery pain, and neuropathy; Pain management	1
Advanced Practice Registered Nurse	Disapproval	72131 CT LUMBAR SPINE, LOW BACK	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ;	1
Advanced Practice Registered Nurse	Disapproval	72131 CT LUMBAR SPINE, LOW BACK	Radiology Services Denied Not Medically Necessary	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; There is no suspicion of lumbar spine infection.; There is no suspicion of lumbar spine neoplasm or tumor or metastasis.	1

Advanced Practice Registered Nurse	Disapproval	72131 CT LUMBAR SPINE, LOW BACK	Radiology Services Denied Not Medically Necessary	To check for defect on previous neck surgery; This study is being ordered for a neurological disorder.; date of onset is unknown; There has been treatment or conservative therapy.; neck and lumbar pain, previous neck surgery pain, and neuropathy; Pain management	1

Advanced Practice Registered Nurse	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	Abnormal x-ray shows mild degenerative changes; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.	1

Advanced Practice Registered Nurse	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	none; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is not from a recent injury, old injury, chronic pain or a mass.	1
Advanced Practice Registered Nurse	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	Pain after normal plain films; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/22/2015; There has been treatment or conservative therapy.; Pain; Pain management with NSAIDS	1
Advanced Practice Registered Nurse	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	The provider is suspecting an injury to tendon or ligaments; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; It is not know if surgery or arthrscopy is scheduled in the next 4 weeks.	1
Advanced Practice Registered Nurse	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	1
Advanced Practice Registered Nurse	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	Unknown; This is a request for a foot MRI.; The study is not being ordered for foot pain, known dislocation, infection,suspected fracture, known fracture, pre op, post op or a known/palpated mass.	1
Advanced Practice Registered Nurse	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	Unknown; This study is being ordered for Inflammatory/ Infectious Disease.; unknown; There has been treatment or conservative therapy.; Pain in left and right knee; Pain management treatment	2

Advanced Practice Registered Nurse	Disapproval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	Radiology Services Denied Not Medically Necessary	Hip Displsia; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; May 2016; There has been treatment or conservative therapy.; Constant pain in the hips; Pain Meds	1
Advanced Practice Registered Nurse	Disapproval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	Radiology Services Denied Not Medically Necessary	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient has a documented limitation of their range of motion.	1
Advanced Practice Registered Nurse	Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There is suspicion of renal mass.; The suspicion of a renal mass was suggested by a physical exam.	1

Advanced Practice Registered Nurse	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/4/2016; There has not been any treatment or conservative therapy.; SEVERE ABDOMINAL PAIN, AND FAINTED.	1
Advanced Practice Registered Nurse	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	Duration of Symptoms: Start: 09/12/2016  Physical Exam Findings: R/o diverticulitis, bilat abd pain, change in bowel habit; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.	1
Advanced Practice Registered Nurse	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	Enter answer here - or Type In Unknown If No Info Given Pelvic and pap were done on 8-19-16 normal findings. Pt has history of abdominal bloating and constipation, has been on liquid diet and mom and miralax treatment since8-19-16. Having abdominal pain ; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.	1

Advanced Practice Registered Nurse	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	none; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; on going for a week, Diarrhea for 2yrs; There has not been any treatment or conservative therapy.; fatigue, diarrhea, ABN weight loss	1
Advanced Practice Registered Nurse	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.; <Enter Additional Clinical Information>	1
Advanced Practice Registered Nurse	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; abdominal pain nausea vomiting	1
Advanced Practice Registered Nurse	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; right side abdomen pain that is leading to the back times 2 days. Pt has had kidney and bladder infection.	1

Advanced Practice Registered Nurse	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Ongoing complaints of palpitations, chest pain, abnormal EKG.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Advanced Practice Registered Nurse	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Unknown; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Allergy & Immunology	Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,M AXILLOFACIAL NO CONTRAST		< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for sinusitis.; This is a request for a Sinus CT.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as (sudden onset of 2 or more symptoms of nasal discharge, blockage or congestion, facial pain, pressure and reduction or loss of sense of smell, which are less than 12 wks in duration); It has been 14 or more days since onset AND the patient failed a course of antibiotic treatment	1
Allergy & Immunology	Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,M AXILLOFACIAL NO CONTRAST		This study is being ordered for sinusitis.; This is a request for a Sinus CT.; It is unknown if the patient is immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks)	1

Allergy & Immunology	Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,M AXILLOFACIAL NO CONTRAST		This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is immune-compromised.	3
Allergy & Immunology	Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,M AXILLOFACIAL NO CONTRAST		This study is being ordered for sinusitis.; This is a request for a Sinus CT.; The patient is NOT immune-compromised.; The patient's current rhinosinusitis symptoms are described as Chronic Rhinosinusitis (episode is greater than 12 weeks)	2
Allergy & Immunology	Disapproval	70486 CT SINUS, FACE,JAW,MANDIBLE,M AXILLOFACIAL NO CONTRAST	Radiology Services Denied Not Medically Necessary	if needed will fax in clinicals; This study is not being ordered for trauma, tumor, sinusitis, osteomyelitis, pre operative or a post operative evaluation.; This is a request for a Sinus CT.	1
Anesthesiology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST		; This study is being ordered for trauma or injury.; 07/01/12; There has been treatment or conservative therapy.; Chronic neck pain for few yrs,tiny spinal cord syrinx is best visualized on the axial, extends from the C3-4 level to the C6-7 level without definite associated lesions, ETIOLOGY for this Syrinx is unclear, Weakness, numbness, tingling, radiates to bilate; brace 3 mths after (9/12/14), TLSO, PHYSICAL THERAPY, home exercise programs, bed rest, ice/heat, massage, OTC NSAIDs (Aleve), current RX meds includes both opioids & non-opioids (Hydrocodone, Neurontin, Gabapentin, Flexeril, Clonazepam). PAIN/UDS contra	1

Anesthesiology	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	The patient does not have any neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; There is a reason why the patient cannot have a Cervical Spine MRI.	2
Anesthesiology	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	This study is to be part of a Myelogram.; This is a request for a Cervical Spine CT	1
Anesthesiology	Approval	72131 CT LUMBAR SPINE, LOW BACK		2
Anesthesiology	Approval	72131 CT LUMBAR SPINE, LOW BACK	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >	1
Anesthesiology	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.	1
Anesthesiology	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.	10

Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST		2
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; There has been treatment or conservative therapy.; neck pain radiates to fingers, diminished sensation and drops things. low back pain with numbness.; PT, medications	1

Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.;	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; Neck and low back pain. Patient states that low back pain is primary complaint. Patient states that low back pain will radiate to left leg down to left foot. Patient states that he has had neuropathy in both feet for years. Patient states that he has al; Patient states that he has done physical therapy in the past that was beneficial. Patient states that he did particularly well with decompression therapy. ibuprofen/Aleve	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; PAIN IN NECK AND BACK; PHYSICAL THERAPY, INJECTIONS AND MEDICATIONS.	1

Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; 07/01/12; There has been treatment or conservative therapy.; Chronic neck pain for few yrs,tiny spinal cord syrinx is best visualized on the axial, extends from the C3-4 level to the C6-7 level without definite associated lesions, ETIOLOGY for this Syrinx is unclear, Weakness, numbness, tingling, radiates to bilate; brace 3 mths after (9/12/14), TLSO, PHYSICAL THERAPY, home exercise programs, bed rest, ice/heat, massage, OTC NSAIDs (Aleve), current RX meds includes both opioids & non-opioids (Hydrocodone, Neurontin, Gabapentin, Flexeril, Clonazepam). PAIN/UDS contra	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	FEELS LIKE ELECTRICAL SHOCK THAT STARTS IN HIS NECK AND GOES TO HIS FEET. NUMBNESS AND TINGLING IN BUE. HE HAS HAD LESI'S DONE.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; AT LEAST 5 YEARS AGO; There has been treatment or conservative therapy.; PAIN IN NECK AND BACK; SURGERY AND MEDICATIONS.	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	He has now tried 6 weeks of PT without significant improvement in his neck pain.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness and numbness in hands; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1

Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.; Will fax clinical information	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	2

Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	3
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	5
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with an Epidural.	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	21

Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	3
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; None of the above; Other spondylosis, cervical region; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	8
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	9

Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	1
Anesthesiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	unknown; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; unknown; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST		1

Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;	1
Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	He has been having pain in the thoracolumbar junction. He has tried chiropractor for the past two months for this pain without relief. He has now failed 6 weeks of recent conservative care.; This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness in legs; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is recent evidence of a thoracic spine fracture.	1

Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.	2
Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Enter Additional Clinical InformatioGiven his pulmonary status and being on 4L Supp O2 continuous, I do not think he is a candidate for any medication that might suppress his resp drive including opioids or bzds.; We will need to see if we can improve his; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1
Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of bowel or bladder dysfunction.	1

Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	1
Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; It is not known how many follow-up thoracic spine MRIs the patient has had.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; <Enter Additional Clinical Information>	1
Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	4

Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is recent evidence of a thoracic spine fracture.	1
Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; <Enter Additional Clinical Information>; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1
Anesthesiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; It is not known if there has been any treatment or conservative therapy.; unknown	1

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	2

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2013; There has been treatment or conservative therapy.; PAIN IN BACK AND HIP; MEDICATION, PHYSICAL THERAPY, EPIDURAL STEROID INJECTIONS	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; Neck and low back pain. Patient states that low back pain is primary complaint. Patient states that low back pain will radiate to left leg down to left foot. Patient states that he has had neuropathy in both feet for years. Patient states that he has al; Patient states that he has done physical therapy in the past that was beneficial. Patient states that he did particularly well with decompression therapy. ibuprofen/Aleve	1

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; PAIN IN NECK AND BACK; PHYSICAL THERAPY, INJECTIONS AND MEDICATIONS.	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; 2010; It is not known if there has been any treatment or conservative therapy.; PAIN IN BACK AND LEFT SHOULDER	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	FEELS LIKE ELECTRICAL SHOCK THAT STARTS IN HIS NECK AND GOES TO HIS FEET. NUMBNESS AND TINGLING IN BUE. HE HAS HAD LESI'S DONE.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; AT LEAST 5 YEARS AGO; There has been treatment or conservative therapy.; PAIN IN NECK AND BACK; SURGERY AND MEDICATIONS.	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	He has tried chiropractor for the past two months for this pain without relief. He has now failed 6 weeks of recent conservative care. Because of this we can check an MRI of the lumbar and thoracic areas.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness in legs; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	None.; The study requested is a Lumbar Spine MRI.; None of the above; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	None.; This study is being ordered for a neurological disorder.; Unknown.; There has been treatment or conservative therapy.; Chronic neck and LBP, muscle spasms, radiculopathy.; Steroid injections, PT, pain meds (Gabapentin, Oxycodone).	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	PATIENT HAS TRIED INFLAMMATORY MEDICATIONS WITHOUT SUCCESS, HEATING TREATMENTS WITHOUT SUCCESS, CONSTANT PAIN, CANNOT DO DAILY ACTIVITIES BECAUSE OF THE PAIN.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; BED REST AND HEAT COMPRESSION; MORPHINE 30MG TRAZADONE  NORCO 10-325MG	1

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient is also suffering bilateral lower extremity pain.; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; deep tendon reflexs 3/4 BLE +clonus bilateral	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient reported numbness/tingling in her feet and weakness in her arms and legs.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.; Gabapentin;x0D; Celexa;x0D; Tylenol;x0D; Ibuprofen	1

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The patient's intake questionnaire was fully reviewed. As well as their referring provider's (Davis, Nicole, APRN) notes which indicate patient is a long history of low back and leg pain which she was being treated for in Colorado she's been tried on phys; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	8
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	1

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.	3
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	6
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with an Epidural.	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	120

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	3
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks	3
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	7
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Unknown; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	2
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; It is not known if there has been any treatment or conservative therapy.; unknown	1
Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	updated MRI needed for new and worsening symptoms; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/12/2014; There has been treatment or conservative therapy.; pain , tenderness in the thoracic lumbar area, tight muscles, has known lumbar disc disease, has mild scoliosis; pain medications, anti-inflammatory medications, injections, PT	1

Anesthesiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Weakness noted on exam in RLE, sensation intact, antalgic gait, positive straight leg test on right; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2013; There has been treatment or conservative therapy.; Back pain that is aching with frequent sharp, shooting pains down BLE; Physical therapy, NSAIDS, ice, heat, massage, trigger points	1
Anesthesiology	Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for suspicion of pelvic inflammatory disease or abscess.	1
Anesthesiology	Approval	73221 MRI JOINT OF UPPER EXTREMITY		2
Anesthesiology	Approval	73221 MRI JOINT OF UPPER EXTREMITY	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	2
Anesthesiology	Approval	73221 MRI JOINT OF UPPER EXTREMITY	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; MARCH 2016; There has been treatment or conservative therapy.; PAIN IN SHOULDERS; IMAGING, PHYSICAL THERAPY, TENS UNIT, MEDICATION.	2

Anesthesiology	Approval	73221 MRI JOINT OF UPPER EXTREMITY	; This study is being ordered for trauma or injury.; 2010; It is not known if there has been any treatment or conservative therapy.; PAIN IN BACK AND LEFT SHOULDER	1
Anesthesiology	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; < Enter answer here - or Type In Unknown If No Info Given. >	1
Anesthesiology	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.	1
Anesthesiology	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.	6
Anesthesiology	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has not completed and failed a course of conservative treatment of at least 4 weeks.; Rt arm numbness and rt leg tingling; lumbar back pain radiates to RLE; taking pain meds; had a shoulder joint injection in 05/2016	1

Anesthesiology	Approval	73221 MRI JOINT OF UPPER EXTREMITY	UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; SINCE 2006; There has been treatment or conservative therapy.; LEFT SHOULDER PAIN, SHARP AND SHOOTING, BILATERAL KNEE PAIN, ACHING, THROBING, NUMBNESS AND TINGLING IN BOTH SHOULDER AND KNEE, KNEE POPS LOCKS AND GIVES OUT; MEDICATIONS	1
Anesthesiology	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
Anesthesiology	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2010; There has been treatment or conservative therapy.; SHARP, STABBING, CONSTANT PAIN; MEDICATIONS AND MULTIPLE INJECTIONS WITH STEROID AND SUPARTZ	2
Anesthesiology	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days	1

Anesthesiology	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
Anesthesiology	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; SINCE 2006; There has been treatment or conservative therapy.; LEFT SHOULDER PAIN, SHARP AND SHOOTING, BILATERAL KNEE PAIN, ACHING, THROBING, NUMBNESS AND TINGLING IN BOTH SHOULDER AND KNEE, KNEE POPS LOCKS AND GIVES OUT; MEDICATIONS	1
Anesthesiology	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT		1
Anesthesiology	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ;	1
Anesthesiology	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; The member has failed a 4 week course of conservative management in the past 3 months.; The hip pain is chronic.; The request is for hip pain.	1

Anesthesiology	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT		This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.	1
Anesthesiology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST		This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1
Anesthesiology	Disapproval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	Radiology Services Denied Not Medically Necessary	She has an area of soreness over the neck, It does not feel like it is on the spinous process, just adjacent to it. She thinks it is has grown in size.  We discussed getting an US of this area. IF that does not elucidate, then get a CT scan.   We will ; This is a request for neck soft tissue CT.; The study is being ordered for something other than Trauma or other injury, Neck lump/mass, Known tumor or metastasis in the neck, suspicious infection/abcess or a pre-operative evaluation.	1

Anesthesiology	Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
Anesthesiology	Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; 12/1/2008; There has been treatment or conservative therapy.; MIGRAINES & NECK PAINS.; Injections, pain medicines opioids & non-opioids, ice/heat, massage, P.T., home exercise programs, NSAIDs.	1
Anesthesiology	Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has been treatment or conservative therapy.; weakness; tingling; pain; numbness; PT	1
Anesthesiology	Disapproval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Radiology Services Denied Not Medically Necessary	unknown; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1

Anesthesiology	Disapproval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Will FAX; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >	1
Anesthesiology	Disapproval	72131 CT LUMBAR SPINE, LOW BACK	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Will FAX; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >	1
Anesthesiology	Disapproval	72131 CT LUMBAR SPINE, LOW BACK	Radiology Services Denied Not Medically Necessary	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; There is no suspicion of lumbar spine infection.; There is no suspicion of lumbar spine neoplasm or tumor or metastasis.	1

Anesthesiology	Disapproval	72131 CT LUMBAR SPINE, LOW BACK	Radiology Services Denied Not Medically Necessary	This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; shoulders; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11-1-15; There has been treatment or conservative therapy.; chronic neck and back pain, numbness, tingling; medication	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/3/2016; There has been treatment or conservative therapy.; mbr has pain in back and weakness and night sweats and chest pain, hip pain; medication	1

Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2015; There has been treatment or conservative therapy.; NUMBNESS & TINGLING; INSEDS & PHYSICAL THERAPY	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; ;	1

Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; 12/1/2008; There has been treatment or conservative therapy.; MIGRAINES & NECK PAINS.; Injections, pain medicines opioids & non-opioids, ice/heat, massage, P.T., home exercise programs, NSAIDs.	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for Inflammatory/ Infectious Disease.; 08-01-2016; There has been treatment or conservative therapy.; back pain, neck pain, joint pain, muscle pain/tenderness, headache, numbness, weakness; Tizanidine 4 mg Naproxen 500 mg Hydrocodone 10 mg  X-ray Cervical spine - reported significant changes that include degenerative changes to cervical spine  X-ray Lumbar spine - reported significant changes that include degenerative changes of the	1

Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09-2015; There has been treatment or conservative therapy.; PAIN IN NECK AND BACK; MEDICATIONS, CERVICAL AND LUMBAR EPIDURAL STEROID INJECTIONS, PT	1

Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2006; There has been treatment or conservative therapy.; NECK PAIN IS CONSTANT AND STABBING, NUMBNESS AND PAIN IN R ARM. THORACIC PAIN IS CONSTAND AND BURNING WITH SPASMS. LUMBAR PAIN IS CONSTANT, BURNING AND STABBING WITH SPASMS AND NUMBNESS AD TINGLING IN LEGS BILATERALLY BUT WORSE ON THE RIGHT.; CHIROPRACTIC THERAPY, TENS UNIT	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2009; It is not known if there has been any treatment or conservative therapy.; PAIN IN NECK AND BACK WITH ANY TYPE OF MOVEMENT.	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2012; There has been treatment or conservative therapy.; PAIN IN NECK AND BACK; MEDICATION, EPIDURAL STEROID INJECTIONS, PHYSICAL THERAPY	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2015; There has been treatment or conservative therapy.; PAIN IN NECK AND BACK. NECK PAIN GOES DOWN INTO ARMS.; MEDICATIONS, PT, INJECTIONS	1

Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; APROXIMATELY 2008; There has been treatment or conservative therapy.; PAIN IN BACK WITH NUMBNESS IN L LEG, PAIN IS SHARP AND SHOOTING. NECK PAIN CAUSES NUMBNESS IN LEFT ARM AND IS SHOOTING.; SEEN BY ANOTHER PAIN MANAGEMENT AND STARTED ON INJECTIONS THAT HELPED FOR A SHORT TIME, MEDICATIONS	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has been treatment or conservative therapy.; weakness; tingling; pain; numbness; PT	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for trauma or injury.; December 2015; There has been treatment or conservative therapy.; PAIN IN NECK THAT GOES INTO ARMS WITH SOME TINGLING AND PAIN IN BACK THAT GOES DOWN LEGS.; IMAGING AND MEDICATIONS	1

Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Bilateral Patricks test positive.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/2016; There has been treatment or conservative therapy.; Pain, Numbness, and Weakness radiating to Lower and Upper Exremities.  Bilateral Patricks Test Positive.; Physical Therapy Lumbar Medial Branch Block Radiofrequency Ablation Naprosyn 500 mg tablet  oxycodone-acetaminophen 10 mg-325	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	CAN NOT GRIP THING WITH BOTH HANDS; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; BILATERAL UPPER EXTREMITY WEAKNESS WITH NUMBNESS AND TINGLING; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	deep burning, throbbing, tingling, sharp, cramping, stabbing,; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4/2.2000; There has been treatment or conservative therapy.; low back pain that radiates to thighs, prior trials of physical therapy, neck pain both shoulders, pain radiates to knees, pain scale is ten out of ten ,; medication, therapy, inseds,	1

Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	MRI Cervical and Lumbar spine is being requested to further evaluate the patient's persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in formulating a treatment plan; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02-09-16; There has been treatment or conservative therapy.; Sharp, stabbing and tingling pain that radiates to extremities.; The patient has failed conservative treatment (include activity modifications, physical/home exercise therapy, NSAIDs and opioid medication therapy)	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	None.; This study is being ordered for a neurological disorder.; Unknown.; There has been treatment or conservative therapy.; Chronic neck and LBP, muscle spasms, radiculopathy.; Steroid injections, PT, pain meds (Gabapentin, Oxycodone).	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	pain radiates to bilateral lower and upper extremity; This study is being ordered for a neurological disorder.; 08-01-2013; There has been treatment or conservative therapy.; back pain, neck pain, joint pain, headache, weakness and anxiety; Soma 350 mg  Baclofen 20 mg  Neurontin 800 mg  Morphine ER 40   Trigger points in bilateral Latissimus dorsi muscles  Trigger points in bilateral Thoracic Longissimus  RadioFrequency Ablation   Bilateral Medial Branch Block- Cervical	1

Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	pain scale is nine out of ten, injection candidate; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 5/1/2014; There has been treatment or conservative therapy.; pain in neck and lower back that radiates to left and right side , migraine headache,; physically and massage therapy, medication	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Palpation of lumbar facet joints at L2-3, L3-4, L4-5, and L5-S1 levels reproduced lower back pain. Hyperextension at lumbar spine reproduced lower back pain. Bilateral facets loading maneuver by lateral flexion/bending reproduced pain. Bilateral lateral; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1-19-16; There has been treatment or conservative therapy.; pain that is burning, tingling along with pressure, burning and numbness; Physical Therapy, Medication Therapy, Home exercise program, Xrays	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Radicular pain of neck and lower back, candidate for epidural injections; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; May 2015; There has been treatment or conservative therapy.; Pain in neck and lower back; Physical therapy and medications	1

Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The patients pain has progressively gotten worse, not being controlled with rest, activity modification and medication(s). Other symptoms as a result of the pain are crying, depression, insomnia, nausea, tingling and unable to fall asleep. Pain has failed; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6-27-16; There has been treatment or conservative therapy.; The pain radiates to lower back and into back sides of both thighs and back of neck, shoulders and up into hairline which is aching, throbbing, tender, pins and needles and numbness; Home exercise program, Medications, TENS unit.	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	1
Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	1

Anesthesiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/2013; There has been treatment or conservative therapy.; numbness; tingling; pain in rt arm; cramping; tightening, throbbing and muscle spasms; home therapy	1
Anesthesiology	Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ;	1
Anesthesiology	Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2006; There has been treatment or conservative therapy.; NECK PAIN IS CONSTANT AND STABBING, NUMBNESS AND PAIN IN R ARM. THORACIC PAIN IS CONSTAND AND BURNING WITH SPASMS. LUMBAR PAIN IS CONSTANT, BURNING AND STABBING WITH SPASMS AND NUMBNESS AD TINGLING IN LEGS BILATERALLY BUT WORSE ON THE RIGHT.; CHIROPRACTIC THERAPY, TENS UNIT	1
Anesthesiology	Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; PAIN IN MID AND LOW BACK; PHYSICAL THERAPY, INJECTIONS AND MEDICATIONS.	1

Anesthesiology	Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	pain radiates to bilateral lower and upper extremity; This study is being ordered for a neurological disorder.; 08-01-2013; There has been treatment or conservative therapy.; back pain, neck pain, joint pain, headache, weakness and anxiety; Soma 350 mg  Baclofen 20 mg  Neurontin 800 mg  Morphine ER 40   Trigger points in bilateral Latissimus dorsi muscles  Trigger points in bilateral Thoracic Longissimus  RadioFrequency Ablation   Bilateral Medial Branch Block- Cervical	1
Anesthesiology	Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.	1
Anesthesiology	Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	1

Anesthesiology	Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	updated MRI needed for new and worsening symptoms; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02/12/2014; There has been treatment or conservative therapy.; pain , tenderness in the thoracic lumbar area, tight muscles, has known lumbar disc disease, has mild scoliosis; pain medications, anti-inflammatory medications, injections, PT	1

Anesthesiology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Facet burning SI Joints Neurological problems; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

Anesthesiology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	History of surgery to area of spine, pain in low back that radiates to lower extremities. Patient is a candidate for injection and/ or further surgery to this area of the spine.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Anesthesiology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	MRI Cervical and Lumbar spine is being requested to further evaluate the patient?s persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in formulating a treatment p; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 02-09-16; There has been treatment or conservative therapy.; Sharp, stabbing and tingling pain that radiates to extremities.; The patient has failed conservative treatment (include activity modifications, physical/home exercise therapy, NSAIDs and opioid medication therapy)	1

Anesthesiology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	MRI lumbar spine is being requested to further evaluate the patient's persistent pain and symptoms. Findings from this study will be incorporated, in conjunction with objective findings, into the decision process in formulating a treatment plan for this ; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Palpation of lumbar facet joints at L2-3, L3-4, L4-5, and L5-S1 levels reproduced lower back pain.; Hyperextension at lumbar spine reproduced lower back pain. Stooping 20 -30 degree relief pain. Bilateral facets loading maneuver by lateral flexion/bendin; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Anesthesiology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	pain radiates to bilateral lower and upper extremity; This study is being ordered for a neurological disorder.; 08-01-2013; There has been treatment or conservative therapy.; back pain, neck pain, joint pain, headache, weakness and anxiety; Soma 350 mg ; Baclofen 20 mg ; Neurontin 800 mg ; Morphine ER 40 ; ; Trigger points in bilateral Latissimus dorsi muscles ; ; Trigger points in bilateral Thoracic Longissimus ; ; RadioFrequency Ablation ; ; Bilateral Medial Branch Block- Cervical	1

Anesthesiology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	pain scale is nine out of ten, injection candidate; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 5/1/2014; There has been treatment or conservative therapy.; pain in neck and lower back that radiates to left and right side , migraine headache,; physically and massage therapy, medication	1
Anesthesiology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Palpation of lumbar facet joints at L2-3, L3-4, L4-5, and L5-S1 levels reproduced lower back pain. Hyperextension at lumbar spine reproduced lower back pain. Bilateral facets loading maneuver by lateral flexion/bending reproduced pain. Bilateral lateral; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 1-19-16; There has been treatment or conservative therapy.; pain that is burning, tingling along with pressure, burning and numbness; Physical Therapy, Medication Therapy, Home exercise program, Xrays	1
Anesthesiology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Patient presented today for new patient evaluation for her chronic lumbar pain. States the has fibromyalgia for the last 2 years. Was seen by a pain management in LA but recently moved. States she had an MRI from her PCP in LA but we do not have this ; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

Anesthesiology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Radicular pain of neck and lower back, candidate for epidural injections; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; May 2015; There has been treatment or conservative therapy.; Pain in neck and lower back; Physical therapy and medications	1
Anesthesiology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	requested to bypass clinicals; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	1
Anesthesiology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Sleep disturbance, and activity changes. Aching, burning and cramping pain is described by member.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness radiating BILAT down to both feet. Leg pain, tingling and numbness as well.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; It is not known if there is x-ray evidence of a lumbar recent fracture.	1

Anesthesiology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The pain has progressively gotten worse over time and is not being controlled with rest, activity modification and medication(s). Patient has gone through 36 weeks of Physical therapy and has had SI injections and nerve blocks, to which have not helped w; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Deep palpation of lumbar spinous processes reproduced lower back pain. Anterior flexion,Hyperextension, bilateral lateral flexion/bending and bilateral lateral rotation reproduced typical low back pain. Palpable taut bands /trigger points in bilateral ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Anesthesiology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The patient is demonstrating some right L5 and S1 radicular symptoms. Patient was positive for straight leg raise, Yeoman, and Gaenslen upon physical exam; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; It is not known if there is x-ray evidence of a lumbar recent fracture.	1

Anesthesiology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The patients pain has progressively gotten worse, not being controlled with rest, activity modification and medication(s). Other symptoms as a result of the pain are crying, depression, insomnia, nausea, tingling and unable to fall asleep. Pain has failed; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6-27-16; There has been treatment or conservative therapy.; The pain radiates to lower back and into back sides of both thighs and back of neck, shoulders and up into hairline which is aching, throbbing, tender, pins and needles and numbness; Home exercise program, Medications, TENS unit.	1
Anesthesiology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1
Anesthesiology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	2

Anesthesiology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/2013; There has been treatment or conservative therapy.; numbness; tingling; pain in rt arm; cramping; tightening, throbbing and muscle spasms; home therapy	1
Anesthesiology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Weakness noted on exam in RLE, sensation intact, antalgic gait, positive straight leg test on right; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2013; There has been treatment or conservative therapy.; Back pain that is aching with frequent sharp, shooting pains down BLE; Physical therapy, NSAIDS, ice, heat, massage, trigger points	1

Anesthesiology	Disapproval	72192 CT PELVIS WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered due to known or suspected infection.; "The ordering physician is NOT a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; "The caller does not know whether there are active, clinical findings or endoscopic findings of Crohn's disease, ulcerative colitis, or diverticulitis."; "Caller does not know whether there are radiographical or ultrasound findings consistent with abnormal fluid collection, pelvic abscess, pelvic inflammation or ascites."; "Caller does not know if there are physical findings or abnormal blood work consistent with peritonitis, pelvic inflammatory disease, or appendicitis."; This is a request for a Pelvis CT.	1
Anesthesiology	Disapproval	72196 MRI PELVIS	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; The ordering physician is not an orthopedist.; This is a request for a Pelvis MRI.; The study is being ordered for pelvic trauma or injury.; This is an evaluation of the pelvic girdle.	1
Anesthesiology	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; SHOOTING, STABBING PAIN; MEDICATIONS AND INJECTIONS	2

Anesthesiology	Disapproval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2013; There has been treatment or conservative therapy.; PAIN IN BACK AND HIP; MEDICATION, PHYSICAL THERAPY, EPIDURAL STEROID INJECTIONS	1
Anesthesiology	Disapproval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	Radiology Services Denied Not Medically Necessary	Facet hypertrophy, disc buldge,bilateral narrowing & central canal Chronic Back & bilateral Hip Pains more than 10 years, gradual, progressively worse, any movement of her hip joint causes pain, requires her father to help get her out of bed, weakness, ; This study is being ordered for Inflammatory/ Infectious Disease.; APPROX. 01/01/2006; There has been treatment or conservative therapy.; Chronic Back & bilateral Hip Pains more than 10 years, gradual, progressively worse, any movement of her hip joint causes pain, requires her father to help get her out of bed, weakness, numbing, radiates to bilateral lower extremity, constant w/intermitt; ; bed rest, ice/heat, massage, P.T., home exercise program therapy, Chiropractor, Sacroiliac joint injs, Lumbar Medial Branch Blocks, Lumbar Neurotomy Injs, OTC NSAIDs (Aleve), current Rx pain meds, both opioid & non opioids includes (Hydrocodone, Ultram/	2
Anesthesiology	Disapproval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	Radiology Services Denied Not Medically Necessary	PATIENT FELL AND LANDED ON BOXES AND NOW HAS PAIN IN BOTH HIPS.; This study is being ordered for trauma or injury.; 2015; It is not known if there has been any treatment or conservative therapy.; PAIN IN BOTH HIPS	1

Anesthesiology	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; <Enter Additional Clinical Information>	1
Cardiac Surgery	Approval	70450 CT BRAIN, HEAD		This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Cardiac Surgery	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCON TRAST		; This study is being ordered for Vascular Disease.; see last year cta report; There has not been any treatment or conservative therapy.;	1
Cardiac Surgery	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCON TRAST		Yes, this is a request for CT Angiography of the Neck.	7
Cardiac Surgery	Approval	70547 Mr angiography neck w/o dye		The patient has not had a recent MRI or CT for these symptoms.; There has been a stroke or TIA within the past 2 weeks.; This is a request for a Neck MR Angiography.	1
Cardiac Surgery	Approval	71250 CT CHEST, THORAX		"The ordering physician is a surgeon, pulmonologist, or cardiologist."; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.	1
Cardiac Surgery	Approval	71250 CT CHEST, THORAX		"The ordering physician IS an oncologist, surgeon, pulmonologist, cardiologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for a pre-operative evaluation.	1

Cardiac Surgery	Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7/110216; There has not been any treatment or conservative therapy.; shortness of breath	1
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.	7
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.	2
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	Abnormal chest xray hemoptysis nodules; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	had a resected tumor now the 3 follow up to surgery.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	Lung mass; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

Cardiac Surgery	Approval	71250 CT CHEST, THORAX	possibility of an intrathoracic tumor. recently had a CT scan of the chest that showed a neoplasm in juxtaposition to the esophagus. He has been referred now for further evaluation; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	Previous ct had a nodule, Pet Scan was done, 6 month follow up.; There is no radiologic evidence of asbestosis.; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; It is not known if there is radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	Pt has evidence of mediastinal lymphadenopathy by CT in January 2016. She has been followed medically and is back for 6mth f/u CT to see if this was inflammatory or if there is evidence of enlargement, surgical biopsy will be recommended.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

Cardiac Surgery	Approval	71250 CT CHEST, THORAX	recent CT scan of the chest showed a neoplasm in juxtaposition to the esophagus. has had chronic chest pain with some back pain; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	The ordering physician a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.	2
Cardiac Surgery	Approval	71250 CT CHEST, THORAX	unknown; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Cardiac Surgery	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	< Enter answer here - or Type In Unknown If No Info Given. >; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Cardiac Surgery	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	; This study is being ordered for Vascular Disease.; see last year cta report; There has not been any treatment or conservative therapy.;	1

Cardiac Surgery	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a Follow-up to a previous angiogram or MR angiogram.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; There are no signs or symptoms indicative of a progressive vascular stenosis.; Yes, this is a request for a Chest CT Angiography.	1
Cardiac Surgery	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	6 month check up to make sure thoracic aortic aneurysm is not coming back.; This study is being ordered for Vascular Disease.; march 2016; There has been treatment or conservative therapy.; no symptoms; surgery 3/26/16	1
Cardiac Surgery	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	Dissecting aneurysm of thoracic aorta, Stanford type B; This study is being ordered for Vascular Disease.; Unknown; There has not been any treatment or conservative therapy.; Dissecting aneurysm of thoracic aorta, Stanford type B	1
Cardiac Surgery	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	follow up to known aneurysm; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1

Cardiac Surgery	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	had a large anuresym in 2014; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; no symptoms its silent; surgery in 2014 for aneurysm	1
Cardiac Surgery	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	see notes; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a Follow-up to a previous angiogram or MR angiogram.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; There are no signs or symptoms indicative of a progressive vascular stenosis.; Yes, this is a request for a Chest CT Angiography.	1
Cardiac Surgery	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.	4
Cardiac Surgery	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is a preoperative or recent postoperative evaluation.	1
Cardiac Surgery	Approval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCON TRAST	Dissecting aneurysm of thoracic aorta, Stanford type B; This study is being ordered for Vascular Disease.; Unknown; There has not been any treatment or conservative therapy.; Dissecting aneurysm of thoracic aorta, Stanford type B	1

Cardiac Surgery	Approval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCON TRAST	had a large anuresym in 2014; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; no symptoms its silent; surgery in 2014 for aneurysm	1
Cardiac Surgery	Approval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCON TRAST	This is a request for CT Angiography of the Abdomen and Pelvis.	8
Cardiac Surgery	Approval	74175 CT ANGIOGRAPHY ABDOMEN W/CONTRAST/NONCON TRAST	6 month check up to make sure thoracic aortic aneurysm is not coming back.; This study is being ordered for Vascular Disease.; march 2016; There has been treatment or conservative therapy.; no symptoms; surgey 3/26/16	1
Cardiac Surgery	Approval	74176 CT ABD & PELVIS W/O CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7/110216; There has not been any treatment or conservative therapy.; shortness of breath	1
Cardiac Surgery	Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C- /C+ POST-PXESSING	Yes, this is a request for CT Angiography of the abdominal arteries.	9

Cardiac Surgery	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiac Surgery	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Complaints of chest pain and shortness of breath; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiac Surgery	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is diabetic.; The patient is less than 45 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiac Surgery	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.	1

Cardiac Surgery	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study		This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for evaluation of the heart prior to non cardiac surgery.	1
Cardiac Surgery	Approval	78813 PET IMAGING WHOLE BODY		This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.	1
Cardiac Surgery	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY		This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.	1
Cardiac Surgery	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY		This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.	1
Cardiac Surgery	Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1

Cardiac Surgery	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Cardiac Surgery	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	chronic back pain and needs MRI to see specialist. will up load clinicals.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Cardiac Surgery	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; <Enter Additional Clinical Information>	1
Cardiac Surgery	Disapproval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	Radiology Services Denied Not Medically Necessary	This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.	1
Cardiology	Approval	70450 CT BRAIN, HEAD		; This is a request for a brain/head CT.; This study is requested for a new onset of seizures or newly identified change in seizure activity or pattern.	1

Cardiology	Approval	70450 CT BRAIN, HEAD	58 y.o. female with h/o asthma, Syncope s/p PPM (9/2015), NCS s/p HUT (1/2016-on Florinef and Midodrine) here for sooner appt.; Last seen by Dr Beau's team 5/24/2016.; Two days ago she had an episode of dizziness, slurred speech, dragging bo; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; Metallic implants such as Pacemakers, ICD (cardioverter/defibrillator), vascular clips, prosthesis or joint replacement is the reason why an MRI is not being considered	1
Cardiology	Approval	70450 CT BRAIN, HEAD	None; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; Metallic implants such as Pacemakers, ICD (cardioverter/defibrillator), vascular clips, prosthesis or joint replacement is the reason why an MRI is not being considered	1
Cardiology	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for a previous stroke or aneurysm.	1
Cardiology	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	3

Cardiology	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; This study is being requested for a history of stroke, (CVA) known or follow-up.	1
Cardiology	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; This study is requested for known or suspected bleed such as subdural hematoma or subarachnoid bleed.	1
Cardiology	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.	1
Cardiology	Approval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Initially saw patient in hospital July 2016 for chest pain, shortness of breath, tachycardia, neuropathy, and carotid stenosis. After appointment for carotid Doppler scan, resulting with abnormal results, a CTA H&N has been ordered. Patient has had rece; There has been treatment or conservative therapy.; Syncope, dizziness, vertigo, headache, shortness of breath; medication management and medical therapy.	1
Cardiology	Approval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST	; This study is being ordered for Vascular Disease.; ; There has been treatment or conservative therapy.; ;	1
Cardiology	Approval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST	family hx of cad and stroke; This study is being ordered for a neurological disorder.; Seen in the office on 07/12/2016; There has been treatment or conservative therapy.; syncope; dizziness; stenosis of arteries; TIA like symptoms; Doppler scan	1

Cardiology	Approval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCON TRAST	He had an echocardiogram recently which showed moderate aortic stenosis. He also has carotid artery disease of greater than 50% by recent ultrasound which recommended CT scan. Previous DVT.; This study is being ordered for Vascular Disease.; 6/20/2016; There has been treatment or conservative therapy.; He had an echocardiogram recently which showed moderate aortic stenosis. He also has carotid artery disease of greater than 50% by recent ultrasound which recommended CT scan. Previous DVT; patient has history of DVT. Has Ultrasound of carotid doppler and venous doppler and disease of greater than 50%	1
Cardiology	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCON TRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Initially saw patient in hospital July 2016 for chest pain, shortness of breath, tachycardia, neuropathy, and carotid stenosis. After appointment for carotid Doppler scan, resulting with abnormal results, a CTA H&N has been ordered. Patient has had rece; There has been treatment or conservative therapy.; Syncope, dizziness, vertigo, headache, shortness of breath; medication management and medical therapy.	1
Cardiology	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCON TRAST	; This study is being ordered for Vascular Disease.; ; There has been treatment or conservative therapy.;	1

Cardiology	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCON TRAST	59 yo female with Cirrhosis (autoimmune; seen at UAMS; awaiting cardiac work up prior to possible transplant) and severe AS here for cardiac evaluation. Diagnosed AS 5/2016. Also diagnosed with cirrhosis then. Both severe. Associated with LE edema; This study is being ordered for Vascular Disease.; 05/01/2016; There has not been any treatment or conservative therapy.; LE edema, DOE and ascitis, fatigue	1
Cardiology	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCON TRAST	CTA of arch and great vessels to see if something might need stenting in his chest; This study is being ordered for Vascular Disease.; long history of cardiac disease.; There has been treatment or conservative therapy.; CTA of arch and great vessels to see if something might need stenting in his chest; full medical management on meds and lipitor, plavix and nitro.	1
Cardiology	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCON TRAST	family hx of cad and stroke; This study is being ordered for a neurological disorder.; Seen in the office on 07/12/2016; There has been treatment or conservative therapy.; syncope; dizziness; stenosis of arteries; TIA like symptoms; Doppler scan	1

Cardiology	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCON TRAST	He had an echocardiogram recently which showed moderate aortic stenosis. He also has carotid artery disease of greater than 50% by recent ultrasound which recommended CT scan. Previous DVT.; This study is being ordered for Vascular Disease.; 6/20/2016; There has been treatment or conservative therapy.; He had an echocardiogram recently which showed moderate aortic stenosis. He also has carotid artery disease of greater than 50% by recent ultrasound which recommended CT scan. Previous DVT; patient has history of DVT. Has Ultrasound of carotid doppler and venous doppler and disease of greater than 50%	1
Cardiology	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCON TRAST	Yes, this is a request for CT Angiography of the Neck.	22
Cardiology	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE		1
Cardiology	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for the evaluation of lymphadenopathy or mass	1

Cardiology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	58 y.o. female with h/o asthma, Syncope s/p PPM (9/2015), NCS s/p HUT (1/2016-on Florinef and Midodrine) here for sooner appt.; Last seen by Dr Beau's team 5/24/2016.; Two days ago she had an episode of dizziness, slurred speech, dragging bo; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing dizziness.	1
Cardiology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.	1
Cardiology	Approval	71250 CT CHEST, THORAX		1
Cardiology	Approval	71250 CT CHEST, THORAX	"The ordering physician is a surgeon, pulmonologist, or cardiologist."; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.	3
Cardiology	Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	2

Cardiology	Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Cardiology	Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.	2
Cardiology	Approval	71250 CT CHEST, THORAX	Addition Med/Surg History: Additional MedicalSurgical History 03-14-2016: XR Chest 1 View Frontal-Right parahilar 9mm lung nodule or vessel. 03-14-2016: CT Angio of Chest (Non Coronary) There is no pulmonary embolism or aortic dissection seen. 9mm nonca; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Cardiology	Approval	71250 CT CHEST, THORAX	congenital abnormality; There is no radiologic evidence of mediastinal widening.; There is not a known inflammatory disease.; There is not a known tumor.; There is known vascular disease.; A Chest/Thorax CT is being ordered.; It is unknown if the patient is having an operation on the chest or lungs.; The study is being ordered for none of the above.; This study is being ordered for a pre-operative evaluation.	1

Cardiology	Approval	71250 CT CHEST, THORAX	CT Coronary Arterial Calcium Score:   PATIENT: Rowe, Cam HCA #: 1137247 DATE OF BIRTH: 09/04/1955  Date: 3/30/15  Clinical Indication: Screening for coronary arterial calcified atherosclerotic plaque in an asymptomatic individual.  Quality of; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Cardiology	Approval	71250 CT CHEST, THORAX	KNOWN THORACIC AORTA ANEURYSM, YEARLY EVALUATION; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Cardiology	Approval	71250 CT CHEST, THORAX	Pt was c/o SOB, hypertension, last CT 2015 found nodules in left lung.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Cardiology	Approval	71250 CT CHEST, THORAX	Stress Test 5/2016 Rest and stress spect images demonstrate moderate size moderate intensity reversible defect involving the anterior wall. Small to medium sized moderate intensity reversible defect involving the inferior wall, findings concerening for st; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

Cardiology	Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Know lung nodules needing review for stability per radiologist; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
Cardiology	Approval	71250 CT CHEST, THORAX	There is not a known inflammatory disease.; There is not a known tumor.; "The ordering physician is NOT an oncologist, surgeon, pulmonologist, cardiologist or PCP ordering on behalf of a specialist who has seen the patient."; There is known vascular disease.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for a pre-operative evaluation.	1
Cardiology	Approval	71250 CT CHEST, THORAX	There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1

Cardiology	Approval	71250 CT CHEST, THORAX	William E Lloyd is a 62 y.o. male WITH ANGINA AND ABNORMAL EKG AND HIGH CACS 941. Pt has type 2 diabetes and severe obesity; This study is being ordered for Vascular Disease.; William E Lloyd is a 62 y.o. male WITH ANGINA AND ABNORMAL EKG AND HIGH CACS 941. Pt has type 2 diabetes and severe obesity; It is not known if there has been any treatment or conservative therapy.; William E Lloyd is a 62 y.o. male WITH ANGINA AND ABNORMAL EKG AND HIGH CACS 941. Pt has type 2 diabetes and severe obesity	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST		6
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/01/2016; There has not been any treatment or conservative therapy.; aortic (valve) stenosis	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/09/2016; There has not been any treatment or conservative therapy.; family history of thoracic aneurysm	1

Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6/10/2016; It is not known if there has been any treatment or conservative therapy.; angina pectoris, peripheral vascular disease, hyperlipidemia	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a post-operative evaluation.; There is physical evidence of re-bleed or re-stenosis.; Yes, this is a request for a Chest CT Angiography.	1

Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	; This study is being ordered for Congenital Anomaly.; ; It is not known if there has been any treatment or conservative therapy.;	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	; This study is being ordered for Vascular Disease.; pt has known descending aortic aneurysm; There has not been any treatment or conservative therapy.;	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	3

Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	43-year-old gentleman in excellent health with some anxiety was found to have slightly decreased ejection fraction 45-50%, normal rvsp, 4.3 cm aortic root. Patient has no major medical problems no major hospitalizations no major surgeries does not have di; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	59 yo female with Cirrhosis (autoimmune; seen at UAMS; awaiting cardiac work up prior to possible transplant) and severe AS here for cardiac evaluation. Diagnosed AS 5/2016. Also diagnosed with cirrhosis then. Both severe. Associated with LE edema; This study is being ordered for Vascular Disease.; 05/01/2016; There has not been any treatment or conservative therapy.; LE edema, DOE and ascitis, fatigue	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	ANEURYSM OF ASCENDING AORTA; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are new signs or symptoms indicative of a dissecting aortic aneurysm.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	aortic valve disorders; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	1

Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	ascending aorta 4.7 cm just above the root. 3.6 cm at the level of the main pulmonary artery, multiple lung nodules, largest 5mm; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are new signs or symptoms indicative of a dissecting aortic aneurysm.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	CHEST PAIN, SHORTNESS OF BREATH, PALPITATIONS, HYPERTENSION, NEEDING TO RULE OUT RIGHT TO LEFT SHUNT; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are new signs or symptoms indicative of a dissecting aortic aneurysm.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	CTA Chest for a pulmonary vein mapping.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	cta chest for a pulmonary vein mapping; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	1

Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	Dilated aortic root seen on echocardiogram; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	Follow up on previous CT thoracic aneurysm 4.6cm on 10/14/15.....; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a Follow-up to a previous angiogram or MR angiogram.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; There are no signs or symptoms indicative of a progressive vascular stenosis.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	HPI:  Referring provider: Patrick Stage APN _____ Seen in consultation for symptomatic Atrial fibrillation. As you know Mr. Gray has a history of AF since 2011. Reports experiencing more frequent; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1

Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	<p>IMPRESSION: Stable CTA of the chest with no interval change in slight aneurysmal dilatation of the ascending thoracic aorta measuring approximately 3.9 cm in diameter. Dictated by William Deaton, M.D. Electronically signed by William Deaton, M.D. This study is not requested to evaluate suspected pulmonary embolus. This study will not be performed in conjunction with a Chest CT. This study is being ordered for Known Vascular Disease. This is a Follow-up to a previous angiogram or MR angiogram. There are no new signs or symptoms indicative of a dissecting aortic aneurysm. There are no signs or symptoms indicative of a progressive vascular stenosis. Yes, this is a request for a Chest CT Angiography.</p>	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	<p>known TAA with history of repair. patient has increased chest pain and elevated blood pressure. Need to evaluate for rupture; This study is not requested to evaluate suspected pulmonary embolus. This study will not be performed in conjunction with a Chest CT. This study is being ordered for Known Vascular Disease. It is not known if this is a pre-operative evaluation, post operative evaluation or follow up to a previous angiogram or MR angiogram. Yes, this is a request for a Chest CT Angiography.</p>	1

Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	Mr. Caston returns for annual f/u feeling well with excellent BP control on current meds. He would like to reassess his TAA this year, which measured 3.4 cm diameter in March 2015. He has had no palpitations or recurrent PAF and is ow without complaints.; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	N/A; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; chest pain and shortness of breath; Medication and follow up films	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	New patient referred by Dr. Davis that was at AHH for DCCV that failed. Pt has persistent afib and is on Eliquis for stroke prevention. Onset 3 months ago. Symptoms include palpitations, dyspnea, fatigued. Poor quality of life. Sleep study pending tonight; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	1

Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	Patient is here for follow up on his Afib. He reports that he hasn't felt well lately. He went into Afib on the 3rd.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; It is not known if this is a pre-operative evaluation, post operative evaluation or follow up to a previous angiogram or MR angiogram.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	Patient is here for follow up on his Afib. He went into afib over the weekend and feels very bad and weak. He thinks the testosterone shots converted him back into AF.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; This is not an evaluation for thoracic outlet syndrome.; There are no signs or symptoms indicative of vascular insufficiency to the neck or arms.; There are no signs or symptoms indicative of Superior Vena Cava syndrome.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	Pre procedure planning for a Biventricular pacemaker.; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	1

Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	Pt has know TAA that needs to be checked for stability.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a Follow-up to a previous angiogram or MR angiogram.; It is not known whether there are new signs or symptoms indicative of a dissecting aortic aneurysm.; There are no signs or symptoms indicative of a progressive vascular stenosis.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	pt has pulm vein stenosis and needs eval for restenosis due to chest pain and a-fib; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; It is not known if this is a pre-operative evaluation, post operative evaluation or follow up to a previous angiogram or MR angiogram.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	Pt here for followup of afib with RVR with recent cardioversion on amiodarone therapy. She felt well for 6 days following the cardioversion and then went back into afib. She is tired, fatigued, short of breath, and feels bad. She has a bad bruise on her r; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1

Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	Pt is having syncopal episodes that are not secondary to an arrhythmia. Echo revealed some aortic root dilatation and there is concern that there is an aneurysm.; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	Symptomatic severe aortic stenosis. Pt being schd for a TAVR; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.	21
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	thoracic aortic aneurysm that has increased of echo cardiogram; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	unknown; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; This is not an evaluation for thoracic outlet syndrome.; There are no signs or symptoms indicative of vascular insufficiency to the neck or arms.; There are no signs or symptoms indicative of Superior Vena Cava syndrome.; Yes, this is a request for a Chest CT Angiography.	1

Cardiology	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST		1
Cardiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST		2
Cardiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; There has been treatment or conservative therapy.; PT is having numbness of the legs.; PT had CT scan of abdominal aorta with run off.	1
Cardiology	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	motor vehciel accident 2013; This study is being ordered for trauma or injury.; 2013; There has not been any treatment or conservative therapy.; neck stiffness arm pain and numbness and upper back pain	1
Cardiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST		1

Cardiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; There has been treatment or conservative therapy.; PT is having numbness of the legs.; PT had CT scan of abdominal aorta with run off.	1
Cardiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	2
Cardiology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	1
Cardiology	Approval	73706 CT ANGIOGRAPHY LOWER EXTREMITY	Yes, this is a request for CT Angiography of the lower extremity.	1
Cardiology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered as a pre-op or post op evaluation.; The requested study is for post-operative evaluation.; The requested study is a first follow up study for a post operative complication.	2

Cardiology	Approval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCON TRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/01/2016; There has not been any treatment or conservative therapy.; aortic (valve) stenosis	1
Cardiology	Approval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCON TRAST	59 yo female with Cirrhosis (autoimmune; seen at UAMS; awaiting cardiac work up prior to possible transplant) and severe AS here for cardiac evaluation. Diagnosed AS 5/2016. Cardiology	Approval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCON TRAST	This is a request for CT Angiography of the Abdomen and Pelvis.	14
Cardiology	Approval	74175 CT ANGIOGRAPHY ABDOMEN W/CONTRAST/NONCON TRAST		1

Cardiology	Approval	74175 CT ANGIOGRAPHY ABDOMEN W/CONTRAST/NONCON TRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 09/09/2016; There has not been any treatment or conservative therapy.; family history of thoracic aneurysm	1
Cardiology	Approval	74175 CT ANGIOGRAPHY ABDOMEN W/CONTRAST/NONCON TRAST	; This study is being ordered for Congenital Anomaly.; ; It is not known if there has been any treatment or conservative therapy.;	1
Cardiology	Approval	74175 CT ANGIOGRAPHY ABDOMEN W/CONTRAST/NONCON TRAST	; This study is being ordered for Vascular Disease.; pt has known descending aortic aneurysm; There has not been any treatment or conservative therapy.;	1
Cardiology	Approval	74175 CT ANGIOGRAPHY ABDOMEN W/CONTRAST/NONCON TRAST	N/A; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; chest pain and shortness of breath; Medication and follow up films	1
Cardiology	Approval	74175 CT ANGIOGRAPHY ABDOMEN W/CONTRAST/NONCON TRAST	Yes, this is a request for CT Angiography of the abdomen.	9
Cardiology	Approval	74176 CT ABD & PELVIS W/O CONTRAST		1

Cardiology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1
Cardiology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; abdominal pain, nausea, and vomiting	1
Cardiology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; tenderness on the right upper quadrant, which appeared to be a deeply addressable mass	1
Cardiology	Approval	74185 MRA, MRI ANGIOGRAPHY ABDOMEN WITH/WITHOUT CONTRAST	NA; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; UNKNOWN; There has been treatment or conservative therapy.; Benign Essential Hypertension uncontrolled despite medications.; Lisinopril HCTZ 25-20MG, hydralazine 100MG, Verapamil 240mg, Labetalol 200mg, Tekturna 150mg.	1

Cardiology	Approval	74185 MRA, MRI ANGIOGRAPHY ABDOMEN WITH/WITHOUT CONTRAST	This is a request for a MR Angiogram of the abdomen.	2
Cardiology	Approval	75557 Cardiac MRI Morph & structure w/o contrast		1
Cardiology	Approval	75557 Cardiac MRI Morph & structure w/o contrast	This is a request for a heart or cardiac MRI	17
Cardiology	Approval	75572 CT Heart	This is a request for a Heart CT.	15
Cardiology	Approval	75573 CT Heart Congenital Study	This is a request for Heart CT Congenital Studies.	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA		3
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	CTA of arch and great vessels to see if something might need stenting in his chest; This study is being ordered for Vascular Disease.; long history of cardiac disease.; There has been treatment or conservative therapy.; CTA of arch and great vessels to see if something might need stenting in his chest; full medical management on meds and lipitor, plavix and nitro.	1

Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; ; Yes, there is Chronic Chest Pain.	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Family history of CAD; Yes, there is Chronic Chest Pain.	1

Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; It is not known if patient has new onset congestive heart failure.; ; Yes, there is Chronic Chest Pain.	2

Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Patient comes in today to establish care. Referred by Dr. Thompson, was inpatient ACMC 2-3 weeks ago for chest pain. Patient states he has been having chest pain/burning. He describes it as tightness, pain, and burning scale 6 or 7 out of 10. States the e; Yes, there is Chronic Chest Pain.	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	The patient has three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Unexplained chest pain; Yes, there is Chronic Chest Pain.	1

Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	There is "Acute Chest Pain" or Angina.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; &Additional Clinical Information>; No, there is no Chronic Chest Pain.	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	There is "Acute Chest Pain" or Angina.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; ; No, there is no Chronic Chest Pain.	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	There is "Acute Chest Pain" or Angina.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; The patient is having these recurrent chest pain episodes. Reportedly he had an exercise treadmill stress test done which was negative. He continues to have these progressively worsening chest pain episodes that are really concerning. We will plan car; No, there is no Chronic Chest Pain.	1

Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This is a request for CTA Coronary Arteries.; The patient has not had other testing done.; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	2
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This is a request for CTA Coronary Arteries.; The study is requested for known or suspected valve disorders.	2
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.; 1. Chest discomfort concerning for angina pectoris. She has had prior treadmill stress echocardiogram negative for ischemia, now she is having exertional symptoms of jaw discomfort, chest discomfort, much concerning for ischemic heart disease and angina	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.; Chest pain and an abnormal ekg	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.; chest pain with strong family hx of CAD.	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.; Chest pain, dizziness	1

Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.; Chest Pain, Doe, and palpitations.	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.; chest pain, sob	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for known coronary disease.;	2
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for known coronary disease.; <Additional Clinical Information>	2
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for known coronary disease.; patient has known high cholesterol and htn. known obstructive sleep apnea, 1 heart and MI in 2014. Currently presenting with chest pain on exertion. substernal and burning sensation. worse on exertion. also back pain associated with it. He is a fire fight	1

Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for prior equivocal or uninterpretable cardiac imaging .; ; Yes, this patient has an equivocal or uninterpretable stress test (exercise, perfusion, or stress echo).	6
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for prior equivocal or uninterpretable cardiac imaging .; Probably positive DSE for myocardial ischemia; Yes, this patient has an equivocal or uninterpretable stress test (exercise, perfusion, or stress echo).	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for prior equivocal or uninterpretable cardiac imaging .; SUSPECTED CAD, SUBOPTIMAL STRESS ECHO DUE TO INADEQUATE HEART RATE; Yes, this patient has an equivocal or uninterpretable stress test (exercise, perfusion, or stress echo).	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for prior equivocal or uninterpretable cardiac imaging .; SUSPECTED CAD. SUBOPTIMAL STRESS ECHO DUE TO INADEQUATE HEART RATE; Yes, this patient has an equivocal or uninterpretable stress test (exercise, perfusion, or stress echo).	1

Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.;	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; <Additional Clinical Information>	2
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; abnormal results found from previous testing. doctor wants to look at patient's coronary arteries due to his continued chest pain syndrome.	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; chest pain- he continues to have chest pain and sob. He was seen by pulmonary and reports nothing wrong with his lungs. His MPI showed a mod fixed defect in the basal inferior wall c/w attenuation artefact	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; Nondiagnostic nuclear stress test with need for coronary angiography. I think she would be a better candidate for CT coronary angiography than she would be nuclear-based angiography since there are a plethora of causes of hypotensive blood pressure respon	1
Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; None	2

Cardiology	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; Yes, patient had a Nuclear Cardiology study within the past six months.; reports chest discomfort at present time described as an ache that radiates under her left arm. Normal Lexiscan myocardial perfusion study	1
Cardiology	Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C- /C+ POST-PXESSING		5
Cardiology	Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C- /C+ POST-PXESSING	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6/10/2016; It is not known if there has been any treatment or conservative therapy.; angina pectoris, peripheral vascular disease, hyperlipidemia	1
Cardiology	Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C- /C+ POST-PXESSING	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7/7/16; There has not been any treatment or conservative therapy.; shortness of breath fatigue cant walk a long distance	1

Cardiology	Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C- /C+ POST-PXESSING	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for Vascular Disease.; 9/7/2016; There has been treatment or conservative therapy.; recent AVI that was abnormal. dyspnea on exertion, cardiac murmur. can not walk 1 block with pain.; medications.	1
Cardiology	Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C- /C+ POST-PXESSING	abnormal cath and abnormal abi's; This study is being ordered for Vascular Disease.; unknown; There has been treatment or conservative therapy.; Fatigue and SOB. Intermittent claudication; Patient underwent LHC on 7/5/2016 with PCI to RCA.	1
Cardiology	Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C- /C+ POST-PXESSING	Yes, this is a request for CT Angiography of the abdominal arteries.	47
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study		26
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. > Strong family history of CAD at young age . Current abnormal EKG associated with chest pain at rest.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The patient is not diabetic.; The patient is less than 45 years old.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	9
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	4
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	11

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	3

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	21
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is not know	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; It is not known if the patient is presenting with new symptoms of chest pain or significant EKG changes.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7/7/16; There has not been any treatment or conservative therapy.; shortness of breath fatigue cant walk a long distance	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; about 14 days ago; There has not been any treatment or conservative therapy.; chest pain and sob	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for Vascular Disease.; 9/7/2016; There has been treatment or conservative therapy.; recent AVI that was abnormal. dyspnea on exertion, cardiac murmur. can not walk 1 block with pain.; medications.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; It is not known if the patient is diabetic.; The patient is less than 45 years old.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	7

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	9
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	16
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	4
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	4
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	3

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	4

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	3

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if the patient has had a previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; It is not known if the patient has had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	4
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	30

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are not new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	3
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has had Myocardial Perfusion Imaging including SPECT (single photon Emission Computerized Tomography) or Thallium Scan.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	2

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; It is not known if the patient is presenting with new symptoms of chest pain or significant EKG changes.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy.;	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; This study is being ordered for Vascular Disease.; 03/01/2012; There has been treatment or conservative therapy.; shortness of breath/exertional, weakness and fatigue.   Patient denies symptoms of frank chest pain indigestion palpitations syncope lower extremity edema .; Date of cardiac cath: 12/17/15 DES to LCA.   Additional MedicalSurgical History 12/17/15 Atherectomy and angioplasty of Left common femoral artery .	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	1. Left atrial enlargement. 2. Moderate concentric left ventricular hypertrophy.  Pressure like chest pain, exertional dyspnea and fatigue  Tobacco use Obesity; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	2+ years post CAB. Hurts in chest after heavy lifting. SOB and cough is actually improved. Followed by Dr. John for this. No swelling. No palp. or syncope. Intolerant of statins. Says chol. is normal lately per Dr. Simon. Nonsmoker.; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	40 y.o. female with recently diagnosed SLE, HTN here for cardiac evaluation. For the past 6-8 months she c/o chest pain. Pressure-like. Substernal. Mild. Lasts for 5-10 to 1-2 hours. Associated with SOB. Worse with exertion. Progressive. O; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	44 y.o. male with h/o hypothyroidism; For the past 1-2 months he c/o chest pain. Associated with bradycardia and fatigue. Substernal. Pressure-like. Lasts for 5-10 minutes. Not worse with exertion. Progressing lately. Associated with SOB. Symptoms ; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	44 year old female with hypertension, palpitations, chest pain and dizziness & giddiness.; The patient is not diabetic.; The patient is less than 45 years old.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	56 year old female with hypertension, nonrheumatic mitral valve disorder, chest pain and abnormal ekg.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	59 year old female with edema, obesity, chest pain, hypertension, and palpitations.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient had previous cardiac surgery or angioplasty.; It is not known if there are new symptoms or changing EKG findings.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	59 year old male with palpitations, chest pain, abnormal ekg and strong family history of ischemic heart disease.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if the patient has had a previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	61 yo with Htn, GERD here for SOB and dizziness.; For the past one year he c/o SOB. Progressive. Worse with exertion. No associated chest pain. Lasts for 5-10 minutes.; Also c/o dizziness which may or may not occur at the same time as the SO; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	62 y.o. female with h/o tobacco abuse, GERD, DVT (Warfarin, last INR 3.1), HLD, HTN here for cardiac eval.; For the past 2 months she c/o SOB. Moderate. Worse with exertion (NYHA). Lass for ~ 5 minutes. Progressive. Associated with left arm pain.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	64 year old male with paroxysmal atrial fibrillation, chest pain, abnormal ekg, and syncope & collapse.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	A 41-year-old lady, severely overweight BMI 40.7, with hypertension, hyperlipidemia, strong family history of premature coronary artery disease presented with newly developed dyspnea on exertion and chest pain relieved by the rest.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	ABN-EKG  Hyperlipidemia; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	abnormal cath and abnormal abi's; This study is being ordered for Vascular Disease.; unknown; There has been treatment or conservative therapy.; Fatigue and SOB. Intermittent claudication; Patient underwent LHC on 7/5/2016 with PCI to RCA.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Abnormal Ct was done 6/13/2016 Shows CAD; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	abnormal ecg; Chest Pain-mid chest, pressure; tightness; heaviness, right arm pain, moderate; pain level 7/10, worse with activity; Associated Symptoms: fatigue; nausea. worse with activity; Associated Symptoms: fatigue; nausea; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Abnormal EKG ; has thyroid and renal disease; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	abnormal ekg and is overweight; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	abnormal ekg and new shortness of breath; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Abnormal EKG that was taken at her pain doctor's office. Noted to have T-wave inversion.; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	abnormal EKG;; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	abnormal ekg; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	3

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	abnormal EKG; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	abnormal ekg; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	ANGINA PECTORIS (I20.9): with recurrent symptom complex with exertion and relieved with rest and NTG; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	angina, hypertension, bradycardia, shortness of breath, unable to walk on a treadmill due to chronic back pain, bilateral leg pain, former smoker, obesity; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Angina, HTN, Palpitation; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	April Fibrillation. Palpitations. Hyperlipidemia.; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Arteriosclerosis of native coronary artery w/ other form of angina pectoris; Shortness of breath: SOB/DOE; Dizziness; Varicose veins of leg w/ pain; Varicose veins of leg w/ edema; Fatigue; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Because the patient has significant left axis deviation, it is not prudent to perform and exercise treadmill stress test since it may be difficult to interpret the results even though she does not have any significant ST or T wave abnormalities. The pat; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	blurry vision, tightness in neck, dypnea on exertion; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	C/O CHEST PAIN AND DIZZINESS. HAD SUBOPTIMAL STRESS ECHO DUE TO HEART RATE; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	c/o chest pain during times of anxiety occasionally, feeling like a dull ache and is midsternal and lasts a few minutes; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	C/o chest pressure lasting 30 minutes, radiating to left shoulder; worse with exertion, relieved by rest. Chest pressure is associated with SOB, diaphoresis and palpitations; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	c/o sharp quick pain over left breast, happens 2-3 x's a mo; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CAD HTN; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CAD; It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CAD; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Cardiac Arrhythmia, Murmur, Palpitation.  Patient having dyspnea on exertion.; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Cardiology consultation this 48-year-old gentleman. He comes today with chief complaint of chest pain shortness of breath and palpitations. Over the last 6-9 months he has developed progressive fatigue, he has noticed when he exercises such as working in ; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest and leg pain; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest discomfort, being evaluated for dyspnea(shortness of breathe); The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest discomfort, essential hypertension, hypertension with unspecified goal, hyperlipidemia with target LDL less than 100. Chest pain; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest discomfort; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest heaviness, other chest pain, essential hypertension. Patient with a past history of hypertension, tobacco use disorder recently quitting, here for evaluation of chest discomfort. Describes chest discomfort it occurs with and without activity, when i; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest Pain is a recurrent problem. The current episode started more than 1 week ago. The problem occurs every several days; Palpitations is a recurrent problem. The current episode started 1 to 4 weeks ago. The problem occurs every several days; It is not known if the patient is diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain shortness of breath; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest Pain , did not reach heart reach , was inconclusive needs further evaluation; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CHEST PAIN AND HYPERTENSION, PALPITATIONS, FAMILY HISTORY OF CAD, HEAVY TOBACCO SMOKER, WEIGHS 285 LBS; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain and severe shortness of breath, fatigue with severe headaches hypertension.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain w/jaw and back pain, diaphoresis; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain w/left arm tingling, hypertension; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain with multiple risk factors for CAD. Midsternal chest discomfort. Presence of cardiac pacemaker; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is not know	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest pain, associated with shortness of breath, nausea, heart palpitation. ekg Normal sinus rhythm. ST segment depression in inferior lateral leads suggestive of inferior lateral subendocardial injury; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CHEST PAIN, DYSPNEA, DYSPNEA ON EXERTION, EDEMA IN LOWER EXTREMITIES, ABNORMAL ekg, hypertension (130/96, morbid obesity, CRI stage 1, smoker, edema bilateral; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest pain, dyspnea, palpitations, abnormal ekg morbid obesity; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest Pain, HTN, SOB; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CHEST PAIN, HTN, TIA, CAD, SEVERE FATIGUE, UNKNOWN FAMILY HX/PT HAD STROKE & WAS IN ER OUT OF STATE.; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CHEST PAIN, HYPERLIPIDEMIA, CARIOMYOPAHTY, TRICUSPID VALVE INSUFFICIENCY, FAMILY HX OF CAD, SMOKER; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest pain, Palpitations, Cardiac arrhythmia, Left ventricular hypertrophy,; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest pain, Palpitations, Coronary atherosclerosis, shortness of breath when walking, Atherosclerosis of native arteries of the extremities; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CHEST PAIN, PALPS, TRICUSPID VALVE INSUFF, NEAR SYNCOPE, MS, SMOKER, FAMILY HX OF CAD; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain, shortness of breath, dizziness, abnormal ekg; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest pain, shortness of breath, dizziness, nausea, near syncope, abnormal ekg, history of supraventricular tachycardia; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain, shortness of breath, fatigue, dizzy spells, overweight. Jenny Patricia Guzman is a 38 y.o. female who presents to establish care. She would like to start seeing Dr Vengala in our clinic. She denies any pertinent history. She is not a smoker. D; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest pain, shortness of breath, hypertension, hyperlipidemia; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain, shortness of breath, r/o CAD; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest Pain, SOB, HTN; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest pain, substernal, started last week, associated with dyspnea. Severe dyspnea, worsening with activity, constant throughout the day. No improvement with antacids.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain, tightness, 1 year f/u, Chronic congestive heart failure - Diastolic, Coronary Artery Disease-S/P PCI, Hypertension, Dyspnea; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain, to rule out coronary artery disease.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest pain. Shortness of breath. Hypertensive. Hyperlipidemia. Diabetic.; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest Pain; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest pain; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest pain; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CHEST PAINS, SHORTNESS OF BREATH AND PSVT; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest pains, shortness of breath, history of surgery at age 3.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Chest pressure; Dyspnea on Exertion; CAD; Sinus Rhythm PVC's; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pressure, shortness of breath, palpitations. Patient with no prior cardiac history and no family history of coronary disease here for evaluation of chest discomfort symptoms. Describes onset to be approximately 3 months ago, with substernal chest he; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Comes in for further evaluation of his recent onset of chest discomfort which is located all across his chest and feels like pressure and lasts for several minutes also accompany with SOB at times. No prior CAD. EKG shows NSR. His DM uncontrolled. His BP ; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	complaints of nonexertional chest pain he describes as sharp pain/soreness. States it lasts 5-10 minutes and is relieved on its own. Has been present for the past couple months. He also complains of shortness of breath with exertion; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	complaints of nonexertional chest pain she describes as sharp pain. States the pain lasts 5 minutes and is relieved on its own.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	complaint of mid sternal dull pressure and dyspnea on exertion. History of atrial fib , asthma, hypertension , hiatal hernia. sleep apnea; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Complaints of chest pain and palpitations. Hypertensive in office and has BMI of 40; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	complaints of Chest Pain that lasts around 5-10 minutes and is self relieved; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	COMPLAINTS OF CHEST PAIN, DIZZINESS, AND UNCONTROLLED HYPERTENSION . BP IN OUR OFFICE WAS 177/109; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	complaints of chest tightness and coughing, facial flushing, fatigue, fluttering heart beats and shortness of breath with and without activity; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	complaints of chronic DOE#x0D; that is getting progressively worse. mild AS, trace MR and mild diastolic dysfunction; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	complaints of mid sternal chest pain, he states he has dyspnea, dizziness and palpitations with his chest pain; low energy levels, snoring, edema; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Complaints of shortness of breath, palpitations and dizziness. History of hypertension and DVT; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	coronary artery disease, previous stenting of her LAD in 2003 needs to have abdominal aorta bypass for occlusion. patient has not had cardiac evaluation since her stents. Patient does not have diabetes, she does smoke heavily. she has no edema, no unusual; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CP SOB; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CP HTN ABN-EKG Murmur; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CP HTN Hyperlipemia Presence of ischemic burden; The study is being ordered for suspected CAD.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient had a recent non-nuclear stress test.; The results of the previous nuclear cardiology study were not normal.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	cp, excessive fatigue, family history of heart disease; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	cp, hypertension, hyperlipemia; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	cp, hypertension; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CP, SOB, PALPS, EDEMA, FATIGUE; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	cp; sob; hyperlipidemia; hx cad; echo done; needs mpi; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	CP; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Diabetes  Mixed hyperlipidemia Shortness of breath Moderate Weakness Benign hypertension Angina pectoris Other specified diabetes mellitus w/ complication Family history of ischemic cardiac disease; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	diabetes / HTN / hyperlipidemia; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	diabetic, dyspnea; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	diabetic, hypertension, obesity, abn ekg; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Dyspnea on exertion: Unclear etiology. Ischemia versus related to underlying COPD. With her multiple risk factors, will refer her for a MPI; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	dyspnea, hyperlipidemia,hypertension; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	dystrythmia; r/o mi; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Echocardiogram (09/29/2015) Visually estimated EF: 75-70%, with normal regional wall motion. Mild (grade 1) left ventricular diastolic dysfunction. Mild concentric left ventricular hypertrophy. Normal left atrium and right chambers structure. Mild mitral ; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	EKG HAD POSSIBLE INTERIOR INFARCTION; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	ekg showing left posterior block, shortness of breathe and palpitations; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	emergency stent placement to his RCA. Patient has been noticing low blood pressures with the weakness. Abnormal EKG, Recurrent angina, hypertension on multiple cardiac medications; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are not new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Enter answer here - or Type In Unknown If No Info Given; Patient having chest pain and SOB after stopping anti-platelet therapy from previous cardiac stent.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Enter answer here - or Type In Unknown If No Info GIVEN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;;	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Essential (primary) hypertension; Chronic diastolic (congestive) heart failure; A fib: Paroxysmal; Shortness of breath: SOB/DOE; Fatigue; Arteriosclerosis of native coronary artery w/ other form of angina pectoris; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Essential (primary) hypertension; Mixed hyperlipidemia; Other specified diabetes mellitus without complications; Abnormal finding on diagnostic imaging of legs: Abnormal PVR - occlusive disease; Arteriosclerosis of native coronary artery w/ other form of; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Evaluate dyspnea; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	evaluation after abnormal EKG, history of hypertension BP in office 184/108.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Evidence in the lachemia territory of diagonal or circumflex.; This study is being ordered as a pre-operative evaluation.; The patient had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Exercise NM Stress. Hypercholesterolemia w/ LDL of 196, chest pain. dyspnea and dyspnea on exertion, hypertension.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	exercise nuclear for chest pain and tightness and experiencing on rest as well.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Exertional chest pain and pressure, HTN, Hyperlipidemia; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Fatigue, daily lack energy, no associated angina or syncope, appears statin side effect...add CO Q 10 and stop statin 6 months,,requests stress test needs DOT, his ECG abnormal.; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	fax; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Follow up; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Followup appointment for evaluation of chest discomfort. The patient is having increasing substernal chest sensation that is described as index substernal heaviness of moderate to severe intensity, exacerbated by exertion and associated with increased sho; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Had 1 week ago episodes left arm pain at rest for 3 hours, associated right precordial chest pain and dyspnea, and dyspnea worse, with exercise, and associated fatigue.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Had cardio catheterization- Obesity; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	has a hx of hypertension, referral from Dr. Seen for intermittent dyspnea. atypical epigastric discomfort intermittent chest tightness. Concerned about LS dysfunction verses CAD. Dizziness.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	He ahs been doing well. No chest pain, SOB, DOE, orthopnea, PND, dizziness, syccope, palpitation.; The study is being ordered for a post myocardial infarction evaluation.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	He has a known history of SSS, PACEMAKER, and HTN. Having chest pain/pressure with radiation to his shoulder blades associated with SOB, nausea, and diaphoresis. On occasion this has awakened him from his sleep. He has a family history of CAD with grandfather; The patient is not diabetic.; The patient is less than 45 years old.; It is not known whether the patient has had a recent exercise treadmill test that was positive or not.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	he has exertional chest pain accompanied by dyspnea and diaphoresis; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	high blood pressure- syncope -; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	history of type 2 diabetes, hypertension, and hyperlipidemia. Episodes of syncope and history of heart murmur; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Htn CHF; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Htn SOB CP chest heaviness bilateral leg pain; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Hyperlipidemia; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	hypertension, hyperlipidemia, cad w bp; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	hypertension, hyperlipidemia; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	hypotensive; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Imaging is necessary given that patient has abnormal baseline EKG. myocardial perfusion imaging study using exercise. 3-4 weeks chest pain, sharp and severe in intensity radiating into neck, dyspnea and diaphoresis.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	IMPRESSION/PLAN 1. Chest pain with some features suggestive of angina in this 56-year-old woman with virtually all risk factors for coronary artery disease. She is obese and unable to perform stress test. I will arrange for myocardial perfusion scan i; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	intermittent chest pain with/without exertion. Near syncopal episode. hx of ablations for SVT & atrial flutter. longstanding hx of hyperlipidemia and strong family fx of CAD; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	It has been 2-1/2 years since the patient suffered an anterior wall MI and underwent stent deployment in the LAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.; The patient has not had a cardiology study in the past 3 years.; No other testing was completed more than 3 years ago.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Know CAD w/elevated blood pressure, Pt has COPD and unable to walk on treadmill; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Known CAD with new Chest pain, HTN, and Hyperlipidemia; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	KNOWN CAD, 5 STENTS PLACED IN 6/2014; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Last EKG on 8-4-16 was abnormal and could represent ischemic change; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Left Ventricular Function, hypertension; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent stress echocardiogram.; The results of the previous nuclear cardiology study were normal.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Left ventricular hypertrophy; Morbid obesity; Hypertension ; Chest pain (R07.9): recurrent with abnormal ECG; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Lt hand numbness; weakness in both legs; palpitations; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	midsternal chest pain that feels like a "contraction," with and without exertion that occurs intermittently; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	midsternal chest pressure that lasts for a few sec , happens most every day but none in last week , and has been goin on for 2 mo; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>morbid obesity, hypertension; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>Mr. Brazil is referred for edema. He was in the ER recently. Was in opiate rehab in Alabama and had lower extremity edema bilaterally, ultimately went to ER there and came back to AR for further evaluation. Was started on lasix/KCl and got a dose of IV la; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Mr. Crumbly is referred by our Keep the Beat program for an elevated coronary calcium score of 448. He denies chest pain. He does have some dyspnea with really strenuous activity and thinks this is just related to sedentary lifestyle. Strong family history; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Mr. Doughty comes in for initial evaluation. He has significant cardiac risk factors of diabetes hypertension and hyperlipidemia. He also has a brother that's a year older than him who has already had stents and a heart attack. He doesn't smoke. He's ; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology

Approval

78451 Myocardial
perfusion imaging,
tomographic (SPECT);
single study

Mr. Holzauer presents after KTB screening showed moderately elevated coronary calcium. No chest pain, angina, or exertional limitations. Strong family history of premature CAD. abnormal EKG; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).

Cardiology

Approval

78451 Myocardial
perfusion imaging,
tomographic (SPECT);
single study

Mr. Lutrick is a 59 yo man new pt referred by Dr. Burton in Malvern. He has never seen a Cardiologist. He has hx of cardiomyopathy, CHF, COPD, Hep c. Most of his problems started a few months ago. He complains of SOB. He was recently tol; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.

1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Mr. Rada comes in for initial evaluation. He has + tobacco abuse, COPD, HTN and HLP. He has exertional chest pressure and DOE. Lung vs heart. He denies a CHF symptoms or sleepy. Most of his chest pressure and shortness of breath is with exertion. He also ; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Mr. Rollans comes in for follow-up last seen January 2015. He has history of CAD with CABG in the past. He continues to do well without chest pain, angina or syncope. No CHF symptoms. His blood pressure is controlled.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Mr. Winston is referred for cardiac evaluation. He went to the ER on 08/07/2016 for complaints of chest pain. He has a past medical history of chronic hypertension, chronic hypothyroidism, and chronic tobacco use. He presented to the office today with c; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Mrs. Carruth is a 55 year old female patient with a strong family history of early death and heart disease. She had a recent hospital stay related to complaints of chest pain, dizziness, shortness of breath and hypertension.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Mrs. Dvorshock comes in for follow up last seen May 2015.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Ms. Davis is a new patient here for cardiac evaluation of LVH and enlarged heart. She had a EKG at PCP office that she was told was abnormal and advised to come in for further evaluation. She has been experiencing frequent episodes of palpitations for the; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Ms. Hughes is here to establish care. She has a history of HTN. She has a family history of CAD. Her mother passed from a myocardial infarction at the age of 59. She denies angina. She does have dyspnea likely related to smoking. She is on Dulera, Spiriva; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	near syncope, type 2 diabetes mellitus without complication, dizziness, tobacco use. Atypical symptoms, will check echo and stress to evaluate further. Had DM for about 2 years. Establishing care with new doctor, encounter for. EKG - NSR.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	needs dot clearance, cad w bp, hypertension; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	NEW ONSET CHEST PAIN, SOB, HTN, PVD, SMOKER, FAM HX, SCHOLIOSIS, CHRONIC BACK PAIN; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	NEW ONSET CHEST PAIN. HTN, HYPERLIPIDEMIA, SYNCOPE, TRICUSPID VALVE INSUFF, CHF, SLEEP APNEA, SMOKER, FAMILY HX OF CAD; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	new onset chest pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/17/2016; There has not been any treatment or conservative therapy.; Pt is having a typical chest pain, SOB, heart palpitations, is diabetic, showed L Anterior Block on 8/4/2016, dizziness and fatigue.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	New patient chest pains last 6 months, precordial across chest, radiating arm and legs and with tingling, associated dyspnea and fatigue and weak legs....wakes up night dyspnea..he is smoker...; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	New patient consultation for history of edema, dyspnea, chest pain.; Cardiac risk factors include smoking, hypertension, family history. Lipid status not known.; Past medical history includes hepatitis C on treatment by liver specialist currently, anxiety; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	New patient referred by Dr. Flaherty for eval of paroxysmal palpitations. One year ago was eating lunch one day and had fluttering substernally. Holter was done at that time and was negative other than some PVCs. Atenolol helps. 3 months ago, started havi; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	New patient referred Dr Charles smith with asymptomatic atrial fibrillation, no dizziness, or dyspnea, or angina...non smoker.; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	New patient with chest pains since May this year, precordial, at rest, very short episodes, last seconds, no radiation, not associated with dyspnea,,,,she is non smoker has thrombocytopenia ..with hepatic cirrhosis.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	NEW PATIENT, INITIAL EVALUATION, CHEST PAIN, HTN, TRICUSPID VALVE INSUFFICIENCY, SMOKER, FAMILY HX OF CAD; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	NO; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Non diagnostic stress EKG; The patient is a white male who has been diagnosed with atrial fibrillation and mitral valve disease. He was re admitted with congestive heart failure and atrial fibrillation and was started on amiodarone. He has had no reoc; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Non-diagnostic stress echocardiographic study due to inability to achieve target heart rate; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	none given; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	None.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown.; It is not known if there has been any treatment or conservative therapy.; Unknown.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	none; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	none; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	none; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	3

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Other chest pain; Palpitations; Shortness of breath; Other fatigue; Benign hypertension; Atherosclerotic cardiac disease; Other form of dyspnea; Disorder of thyroid; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	other chest pain, benign hypertension, hyperlipidemia, family history of coronary artery disease. Patient seen in ER on 9/8/16: 46-year-old female with acute, sharp chest pain radiating to her back. Her EKG shows no acute ischemic changes. She denies any; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pain; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Palpitation  Hyperlipidemia CAD; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	palpitations, dyspnea; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pat has history of hypertension and abnormal ekg and pat is current smoker and is having muscle and backache. Seen in ER 7/15 was to follow up with cardiologist; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient , Hyperlipidemia and hypertensive , chest pain , shortness of breath and diabetic; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient complains of chest pain, fatigue and SOB and had a positive RSE with ischemic changes in the inferior and lateral leads.; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient complains today of daily, intermittent chest pain with no radiation. He describes his chest pain as "tingling and sore" with no noted alleviating factors, he reports it goes away on its own. He also reports intermittent palpitations. Past Medical ; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient had a positive rest stress echo today with inferior ST depressions of 1-2mm; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient had abnormal EKG.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient has chest pain , shortness of breath , has history of hyperlipidemia; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient has chest pain, history of smoking, and family history of CAD; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient has hyperlipidemia, diabetes, palpitations, syncope; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient has Hyperlipidemia, hyper tension and congestion heart failure.; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient has Hyperlipidemia, Hypertension, diabetes, pre-cardio pain.; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient has suspected CAD; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient has valvular disease with mild to moderate aortic insufficiency and chest discomfort and results of nuclear stress will determine future treatments; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient hypertensive heart disease/dyspnea; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient is a smoker. Discussed Past Medical History COPD: Y Cancer: Y - Lung Emphysema: Y GERD: Y Heart Disease: Y; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient is currently symptomatic who feels a weight on her chest for past 3-4 months, occasional heart pounding since 12/2015, strong family history on father's side of coronary disease (grandfather had MI and deceased age 42), (grandmother had bypass sur; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	PATIENT IS DIABETIC, HAS CHEST PAIN ;; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient is having chest pain with shortness of breath and has a BMI of 37 and cannot exercise; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient is on oxygen; severe lung disease. rectal surgery for cancer. CAN NOT do treadmill. glaucoma .; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient is present with chest pain and shortness of breath; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient morbid obese, chest pain and dyspnea and abnormal ekg w/ family history of CAD; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient presents today with complaints of intermittent palpitations associated with chest pain and shortness of breath.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient was seen by Dr. Davis on 6/28/16 for recurrent episodes of near syncope. He states he will become rather markedly dizzy and feel like he's about to pass out but he has never lost consciousness. He's also been having intermittent chest discomfort t; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient was unable to reach her target heart rate on stress echo. She has recently been diagnosed with diabetes , and she has HTN and is currently a smoker; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient with a history of HTN, and tobacco use disorder, here for evaluation of recent escalating blood pressures. Reports new headaches and blurry vision. Has non-activity related chest discomfort, denies and LEE, palpitations, presyncope or syncopal epi; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	PCI 5 months ago wanting to start exercise program; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	PMH of chest pain, HTN, GERD; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Presents complaints of shortness of breath, history of hypertension and hyperlipidemia. Pts BP was 153/78 in office; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pressure like chest pain and dyspnea for 3-4 weeks; # Shortness of breath (R06.00); # Obesity (E66.9); The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	previous left heart cath; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt did the keep the beat program yesterday and his total score was 623.0 Denies chest pain or pressure but does admit to some fatigue that has not been normal for him.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt does have hyperlipidemia and hypertension; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt had congenital heart defect, patent foramen ovale, which was repaired as toddler. She has also had heart valve repair. She is experiencing chest pain currently. She is needing foot surgery and needs cardiac clearance for surgery since she is current; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt has coronary atherosclerosis , hyperlipidemia, SOB.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt has history of hypertension, hyperlipidemia, and svt. Complaints of shortness of breath; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt has hyperlipidemia; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has had Myocardial Perfusion Imaging including SPECT (single photon Emission Computerized Tomography) or Thallium Scan.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt has hypertension, hyperlipidemia; breast cancer; needing pre-op clearance for Lt mastectomy; had an abnormal ekg; SOB with exertion; strong family hx for CAD; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt has hypertension.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt has just had a stent placed and having new chest pain and has an abnormal ekg; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt has new onset of chest pain SOB and abnormal treadmill stress test; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt having chest pain, radiating. Arm numbness, Pt is smoker, leg and back pain.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt having chest pain. Was schd for stress echo but because of her ATAA they are changing it to a MPI; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt here for echo results. Denies any cp. Pt is limping today and states that Patti Rivers told him he has blockage to right leg. States that he had a "dye test done on Thursday" but has not received results yet. States that he is in a lot of pain with leg; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt here for echo results. Denies cp. Admits to SOB associated with her COPD and also c/o fatigue. She reports her fatigue has becoming increasing worse.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt here for followup of CAD and post cath procedure. He is waiting to hear if he needs bypass surgery or coronary intervention. He has some chest pain. He denies any syncope. He has not had any AFIB. He is on Multaq therapy.; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt here for followup of cad and previous ptca/stent placement. His main complaint is headaches. He thought it was heat related but they have persisted despite cooler temperatures. He feels he cannot get enough to drink. He has a headache now. Has chest p; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt is diabetic; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt is having ongoing chest pain and PVC with ventricular bigeminy pt is not able to walk on a treadmill due to being in a wheelchair.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	PT is having shortness of breath chest pain abnormal ekg cardiac clearance for spinal surgery ED july for chest pain and one side lower extremity pain PT has never had a stress test; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt is hypertensive; cp;; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt needs a pharmacological stress test as he is unable to climb one flight of stairs due to DOE, he is c/o increasing worsening chest pain, x 1 week. Referred to us for syncope and collapse. Lexiscan to evaluate for cardiac ischemia.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt referred by Dr Smart because yesterday while driving he had chest discomfort and facial pain more specifically right jaw pain. States that he had some SOB with this. States that he took aspirin when he got home and felt better within 30 minutes. Had ch; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt referred for intermittent chest pain. Episodes last a few seconds. Last episode about 3 weeks ago. Pt states that she did have a little dizziness and SOB with episode.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt seen in ER for chest pain and hypertension. Has known renal failure; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt states that a few weeks ago he started having "weird sensations" in his chest. States that his reflux medicine was doubled and that helped after a few weeks but was told to keep appointment. Pt states that Dr Davis did put him on a heart monitor for a ; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt states that he has had intermittent chest pain "tightness" and racing heartbeat. States that he does not feel well at all today. Pt is pale and a little diaphoretic this afternoon. Pt states that he had an episode about 2 weeks ago at work where he alm; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt states that she has been having chest discomfort and left arm pain off and on for a while now. Worse lately. Is currently having left arm "ache" at 4 on 0 - 10 scale. Denies any nausea, sob or diaphoresis with episode. States that episodes are about 3 ; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt states that she has been having chest heaviness. Pt admits to "heaviness" today but not painful like it was yesterday. Denies radiation, nausea or sob but admits to diaphoresis yesterday.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt states that she started having cp from right side to left on sunday. Also having sob stating that she wakes up choking at night. States that she coughs to the point of having to throw up. Had bad headache and cp on last Thursday.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt suffers chest pains.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt suffers with diabetes and chest pains.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt w/chest pain and shortness of breath; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	pt w/chest pain, htn and obesity; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt w/known CAD; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt was recently seen in er for c/o chest pain and shortness of breath; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	PT was seen in the er for atypical chest pain. Has a history of hypertension and hyperlipidemia; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt was seen in the hospital for chest pain and hypertension; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt was seen in the hospital for chest pain, shortness of breath, hypertension and history of stroke; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt with known CAD having worsening chest pain; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt with known CAD with new chest pain prior MI; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt with known dialated cardiomyopathy EF of 40% pt has chest pain and shortness of breath; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	R/O CAD with worsening chest pains and SOB.; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	R/O CAD; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	R/O CAD; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	r/o CAD; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/11/16; There has not been any treatment or conservative therapy.; Chest pain, Shortness of breath on exertion, Pt is very Obese and can't exercise; abnormal EKG	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Recent admission due to chest pain. Frequent palpitations and near syncope; Family History: Father: CAD, AAA; Mother: HTN; Brother: CAD, CABG. Current every day smoker; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Recently seen in the hospital for chest pain and shortness of breath; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Recurrent atypical chest pain with moderate risk factors for coronary artery disease. History of systolic congestive heart failure, hypertension, and hyperlipidemia; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	right chest pain, arm pain and jaw pain. Elevated bp.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	rtic stenosis or lightheadedness, rts an episode of chest pain occurred in his lower sternal region; His mother had CABG at the age of 63 EKG: Sinus bradycardia; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	She developed severe dizizness while sitting or while laying down, with "romm spinning" vertigo, no associated nausea, lasted for few seconds, relieved on its own. She c.o mild mid chest tightness not related to exertion, assoaited SOB, no radiation, las; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	she is referred to our office today after undergoing an abnormal ECG which showed tachycardia. She reports SOB at times with persistent cough over the past two weeks. She also reports racing palpitations that she states will feel as if it skips at times a; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	She reports sharp midsternal chest pain that will radiate to her left shoulder, around to her back and up the left side of her jaw. She states this is worsened with exertion or emotional upset. She states this has been ongoing over the past 2 months and a; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	She underwent stenting to the LAD about a year ago. She presented with an acute coronary syndrome.; The study is being ordered for known CAD.; It is not known if the patient is presenting with new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Shortness of breath w/exertion, Hypertension, swelling in legs; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	shortness of breath, dypnea on exertion, fatigue; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	shortness of breath/r/o ischemia, BMI 45.14, physically unable to do a treadmill stress,; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	shortness of breath; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Shortness of breath; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Smokers; smokes for 1/2 pack per day and abnormal EKG.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	sob, chest pain, normal chest x ray. hypertension. abnormal ekg. family hx of cad. has angina too.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Steven S Harp is a 50 y.o. Caucasian male who presents for evaluation of shortness of breath and palpitation. SOB on moderate exertion. Walking up a flight of stairs he gets palpitation. He feels his heart beat which is strong but not rapid. Three weeks a; The patient's age is between 45 and 64.; It is not known if the patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	stress echocardiogram was aborted after 56 seconds due to extreme shortness of breath; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	suspected CAD; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Suspected CAD; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Syncope Dizziness, and patient has diabetes.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	syncope, family history of ischemic heart disease; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Systolic congestive heart failure - I50.20, EF 10-20%. Plan start enalapril, on life vest. He has occlusion of the LAD and I am not sure if there is any viability there. recommend FDG PET Unable to get cardiac PET; This study is being ordered as a post-operative (Cardiac Surgery, Angioplasty or stent) evaluation.; The patient is presenting new symptoms of chest pain or significant EKG changes.; The patient has not had a stress echocardiogram since surgery.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; No, patient did not have a nuclear cardiology study since surgery.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Tachycardia Abn-EKG Chest Pain; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; It is not known whether the patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Test is being ordered due to patient have ongoing chest pain and SOB. Test is being ordered to evaluate the nature of her chest pain.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has diabetes.	10
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is diabetic.; The patient is less than 45 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	36

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is not diabetic.; The patient is less than 45 years old.; The patient has had a recent exercise treadmill test that was positive.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	7
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	16
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has diabetes.	5
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.	32
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for a post myocardial infarction evaluation.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had a nuclear cardiology study since having an MI.	10

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	182
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous myocardial infarction.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	14

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient has congestive heart failure.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	5
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	13
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	6

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if the patient has had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; It is not known if the patient is diabetic.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; It is not known if the patient is diabetic.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	7
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	35

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; It is not known if the patient has had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; It is not known if the patient has had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	2

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	3
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient had previous cardiac surgery or angioplasty.; There are new symptoms or changing EKG findings.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	4

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; It is not known if the patient has had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	3
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	12
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	22

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	127
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; It is not known if there are documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	4
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	71
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	6

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	8

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	34
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	2

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	2

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	10
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are no documented clinical findings of hypertension.; The patient is not diabetic.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	14
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	4
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	3
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; It is not known if the member has known or suspected coronary artery disease.	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The member does not have known or suspected coronary artery disease	3
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for congestive heart failure.; The member does not have known or suspected coronary artery disease	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for evaluation of the heart prior to non cardiac surgery.	3

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for known or suspected cardiac septal defect.	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for known or suspected valve disorders.	7
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Nuclear Stress Treadmill, Heart Palpitations; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.; The patient has not had a cardiology study in the past 3 years.; No other testing was completed more than 3 years ago.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This study is being ordered as a pre-operative evaluation.; It is unknown if the patient has symptoms of atypical chest pain (angina) or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This study is being ordered as a pre-operative evaluation.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has known CAD.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This study is being ordered as a pre-operative evaluation.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has known CAD.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This study is being ordered as a pre-operative evaluation.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent stress echocardiogram.; The patient has known CAD.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	2
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	to r/o cad; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	to rule out CAD; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	t-wave abnormalities are suspicious for ischemia on her EKG; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	unknown; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	unknown; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	unknown; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	unknown; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	unknown; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	9
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	ventricular tachycardia. arrhythmia/atrial fibrillation. shortness of breath. hyperlipidemia.; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	white female who has had chest pain It occurs at rest and with activity. She has fatigue. She has had syncope with cough recently. She has occasional lower extremity edema. She has tachycardia.Diabetes mellitus; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
Cardiology	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	WPW syndrome, HTN, hyperglycemia, A FIB, CHF. OSA; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Approval	78459 Myocardial imaging, PET	This is a request for a Cardiac-imaging PET scan.; This study is being ordered to identify a myocardial perfusion defect.; This patient has NOT had a SPECT scan within the past eight (8) weeks.; Yes, the patient has symptoms including chest tightness, angina and/or shortness of breath on exertion.; The patient has a body Mass List score index equal to or above 40.	1
Cardiology	Approval	78472 CARDIAC OR HEART BLOOD POOL IMAGING	This is a request for a MUGA scan.; This study is being ordered for Chemotherapy.; Chemotherapy has been initiated or completed.; "There is a change in cardiac signs or symptoms (shortness of breath, etc.)"; The patient has not had a previous MUGA scan.; nuclear stress test showed a 45% EF; echo showed 55% but was technically difficult; patient presently undergoing chemo	1
Cardiology	Approval	78472 CARDIAC OR HEART BLOOD POOL IMAGING	This is a request for a MUGA scan.; This study is being ordered for Congestive Heart Failure.; The patient has recently been diagnosed with and/or treated for congestive heart failure.; The patient has not had a previous MUGA scan.; The patient is presenting new cardiac signs or symptoms.; The patient has not had a recent MI.; There are not documented clinical findings consistent with a valve disease.; There are documented clinical findings consistent with hypertension.;	1
Cardiology	Approval	78472 CARDIAC OR HEART BLOOD POOL IMAGING	This is a request for a MUGA scan.; This study is being ordered for Known Cardiomyopathy/ Myocarditis.; There are EKG findings consistent with cardiomyopathy or myocarditis.; < Enter answer here - or Type In Unknown If No Info Given. >	1

Cardiology	Approval	78472 CARDIAC OR HEART BLOOD POOL IMAGING	This is a request for a MUGA scan.; This study is being ordered for Known Cardiomyopathy/ Myocarditis.; There are EKG findings consistent with cardiomyopathy or myocarditis.; none given	1
Cardiology	Approval	78472 CARDIAC OR HEART BLOOD POOL IMAGING	This is a request for a MUGA scan.; This study is being ordered for Suspected Cardiomyopathy/ Myocarditis.; The patient has not recently been diagnosed with and/or treated for congestive heart failure.; The patient is presenting new cardiac signs or symptoms.; The patient has not had a recent MI.; There are not documented clinical findings consistent with a valve disease.; There are documented clinical findings consistent with hypertension.;	1
Cardiology	Approval	78472 CARDIAC OR HEART BLOOD POOL IMAGING	This is a request for a MUGA scan.; This study is being ordered for Suspected Cardiomyopathy/ Myocarditis.; The patient has not recently been diagnosed with and/or treated for congestive heart failure.; The patient is presenting new cardiac signs or symptoms.; The patient has not had a recent MI.; There are not documented clinical findings consistent with a valve disease.; There are no documented clinical findings consistent with hypertension.; There are no documented clinical findings consistent with a cardiac congenital abnormality.; Abnormal EF on echocardiogram done on 9/19/2016	1

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	adenoma - lower extremity , diabetes, CHF, passive CAD, previous left heart cath.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ER- visit 3/14/16;; There has been treatment or conservative therapy.; unknown; emergency cardio vascularr surgery	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	new onset chest pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/17/2016; There has not been any treatment or conservative therapy.; Pt is having a typical chest pain, SOB, heart palpitations, is diabetic, showed L Anterior Block on 8/4/2016, dizziness and fatigue.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	None.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown.; It is not known if there has been any treatment or conservative therapy.; Unknown.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/06/2016; There has been treatment or conservative therapy.; SOB; Steriod/Histamines	1

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	r/o CAD; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/11/16; There has not been any treatment or conservative therapy.; Chest pain, Shortness of breath on exertion, Pt is very Obese and can't exercise; abnormal EKG	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; The reason for ordering this study is unknown.	5
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient does not have a history of a recent heart attack or hypertensive heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has high blood pressure	4

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has a history of hypertensive heart disease.; There is a change in the patient's cardiac symptoms.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has high blood pressure	2
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; The patient has suspected prolapsed mitral valve.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Known or suspected valve disease.	1

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is an initial evaluation of suspected valve disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Known or suspected valve disease.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; It is unknown if this study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG	2

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The abnormal symptom, condition or evaluation is not known or unlisted above.	3
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.	4

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; This study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG	2
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG	4
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of cardiac arrhythmias; It is unknown if this study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.	1

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of cardiac arrhythmias; This study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.	3
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of cardiac arrhythmias; This study is NOT being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of Pericardial Disease.; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of a pericardial disease.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Embolism.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; There has been a change in clinical status since the last echocardiogram.; This request is NOT for initial evaluation of a murmur.; This is a request for follow up of a known murmur.	1

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.	3
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is grade III (3) or greater.	5
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is NOT grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is NOT grade III (3) or greater.; There are NOT clinical symptoms supporting a suspicion of structural heart disease.; This is NOT a request for follow up of a known murmur.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; The patient has suspected prolapsed mitral valve.	1

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual review of known valve disease.; It has been 12 - 23 months or more since the last echocardiogram.	3
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual review of known valve disease.; It has been 24 months or more since the last echocardiogram.	2
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual review of known valve disease.; It has been 4-6 months since the last echocardiogram.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an evaluation of new or changing symptoms of valve disease.	15
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of artificial heart valves.	2
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an initial evaluation of suspected valve disease.	66

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is NOT for prolapsed mitral valve, suspected valve disease, new or changing symptoms of valve disease, annual review of known valve disease, initial evaluation of artificial heart valves or annual re-eval of artifical heart valves.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; It is unknown if this is being ordered for initial diagnosis of congenital heart disease, Annual follow up of congenital heart disease or Evaluation of change of clinical status.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for evaluation of change of clinical status.	2
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is fora routine follow up of congenital heart disease.; It has been at least 24 months since the last echocardiogram was performed.	2

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; It is unknown if there been a change in clinical status since the last echocardiogram.; It is unknown if this is for the initial evaluation of heart failure.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; It is unknown if there been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has been a change in clinical status since the last echocardiogram.; It is unknown if this is for the initial evaluation of heart failure.	1
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; There has been a change in clinical status since the last echocardiogram.; This is NOT for the initial evaluation of heart failure.	8
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; This is for the initial evaluation of heart failure.	8

Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; It is unknown if the patient has a history of a recent heart attack or hypertensive heart disease.	2
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.	27
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of a recent myocardial infarction (heart attack).	7
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; It is unknown if there is a change in the patient's cardiac symptoms.	2
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient has a history of hypertensive heart disease.; There is a change in the patient's cardiac symptoms.	47
Cardiology	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Pulmonary Hypertension.	21

Cardiology	Approval	93312 TEE R-T IMG 2D W/PRB IMG ACQUISJ I&R	< Enter answer here - or Type In Unknown If No Info Given. >; This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is NOT for suspected acute aortic pathology, pre-op of mitral valve regurgitation, infective endocarditis, left atrial thrombus, radiofrequency ablation procedure, fever with intracardiac devise or completed NON diagnostic TTE.	1
Cardiology	Approval	93312 TEE R-T IMG 2D W/PRB IMG ACQUISJ I&R	This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is beibg requested for evalutaion of atrial fibrillation or flutter to determine the presence or absence of left atrial thrombus or evaluate for radiofrequency ablation procedure.	2
Cardiology	Approval	93312 TEE R-T IMG 2D W/PRB IMG ACQUISJ I&R	This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is being requested for evaluation of suspected acute aortic pathology such as aneurysm or dissection.	1
Cardiology	Approval	93312 TEE R-T IMG 2D W/PRB IMG ACQUISJ I&R	This a request for an echocardiogram.; This is a request for a Transesophageal Echocardiogram.; This study is being requested for pre-operative evaulation of mitral valve regurgitation	1
Cardiology	Approval	93350 ECHO TTHRC R-T 2D +M-MODE COMPLETE REST&STRS	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;	1

Cardiology	Approval	93350 ECHO TTHRC R-T 2D -+M-MODE COMPLETE REST&STRS	FOLLOW UP; This is a request for a Stress Echocardiogram.; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; It is not known if the patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.	1
Cardiology	Approval	93350 ECHO TTHRC R-T 2D -+M-MODE COMPLETE REST&STRS	PT HAS CHEST HEAVINESS AND PRESSURE ASSOCIATED WITH MINIMAL IF ANY ACTIVITY. SHORTNESS OF BREATH CAN BE EXACERBATED WITH LITTLE TO NO EXERTION. PT'S ENERGY LEVEL HAS DECLINED; This study is being ordered for Vascular Disease.; UNKNOWN SPECIFIC DATE OF DURATION. PT CAME TO USE ON MARCH 2016 FOR CONSULT AT THAT POINT IT WAS ACCESSED THAT PT HAD VASCULAR DISEASE; There has not been any treatment or conservative therapy.; CHEST PRESSURE AND TIGHTNESS WITH SHORTNESS OF BREATH	1
Cardiology	Approval	93350 ECHO TTHRC R-T 2D -+M-MODE COMPLETE REST&STRS	This is a request for a Stress Echocardiogram.; It is unknown if the patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.	5
Cardiology	Approval	93350 ECHO TTHRC R-T 2D -+M-MODE COMPLETE REST&STRS	This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; It is not known if the member has known or suspected coronary artery disease.	3

Cardiology	Approval	93350 ECHO TTHRC R-T 2D →M-MODE COMPLETE REST&STRS		This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease	3
Cardiology	Approval	93350 ECHO TTHRC R-T 2D →M-MODE COMPLETE REST&STRS		This is a request for a Stress Echocardiogram.; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.	10
Cardiology	Approval	93350 ECHO TTHRC R-T 2D →M-MODE COMPLETE REST&STRS		This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.	57
Cardiology	Approval	93350 ECHO TTHRC R-T 2D →M-MODE COMPLETE REST&STRS		This is a request for a Stress Echocardiogram.; To evaluate the heart prior to non-cardiac surgery.; The member does not have known or suspected coronary artery disease	1
Cardiology	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; There has not been any treatment or conservative therapy.; dizziness and numbness and tingling	1

Cardiology	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	Pt here for followup of cad and previous ptca/stent placement. His main complaint is headaches. He thought it was heat related but they have persisted despite cooler temperatures. He feels he cannot get enough to drink. He has a headache now. Has chest p; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Cardiology	Disapproval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	Yes, this is a request for CT Angiography of the brain.	1
Cardiology	Disapproval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	Yes, this is a request for CT Angiography of the Neck.	1
Cardiology	Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically Necessary	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

Cardiology	Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically Necessary	1. Dyspnea on Exertion-uncertain etiology but had an unremarkable echocardiogram and treadmill stress testing less than a year ago. Her ACC/AHA in Framingham risk course place her in a low risk category. I am doubtful that this is ischemic in origin. She ; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; It is unknown if this patient is a smoker or has a history of smoking.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
Cardiology	Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically Necessary	40 per year pack smoker and conjunction w/ chest pain and shortness of breath; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1

Cardiology	Disapproval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	Radiology Services Denied Not Medically Necessary	62 y.o. male with h/o HTN and recent stage II diffuse large B-cell lymphoma s/p CHOP-Rituxan here for dilated aorta and post-chemo follow up. Doing well since finishing chemo last month. Improving functional capacity. No chest pain or SOB. ; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are no new signs or symptoms indicative of a dissecting aortic aneurysm.; This is not an evaluation for thoracic outlet syndrome.; There are no signs or symptoms indicative of vascular insufficiency to the neck or arms.; There are no signs or symptoms indicative of Superior Vena Cava syndrome.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Disapproval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	Radiology Services Denied Not Medically Necessary	bicuspid aortic valve with possible aneurysm; This study is not requested to evaluate suspected pulmonary embolus.; This study will be performed in conjunction with a Chest CT.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Disapproval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	Radiology Services Denied Not Medically Necessary	None; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1

Cardiology	Disapproval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	Repeat CTA for lung nodules.; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Disapproval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	YEARLY EVAL FOR TAA; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
Cardiology	Disapproval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; There has not been any treatment or conservative therapy.; dizziness and numbness and tingling	1
Cardiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	motor vechiel accident 2013; This study is being ordered for trauma or injury.; 2013; There has not been any treatment or conservative therapy.; neck stiffness arm pain and numbness and upper back pain	1

Cardiology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.;	1
Cardiology	Disapproval	72198 MRA , MRI PELVIS ANGIOGRAPHY WITH/WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	NA; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; UNKNOWN; There has been treatment or conservative therapy.; Benign Essential Hypertension uncontrolled despite medications.; Lisinopril HCTZ 25-20MG, hydralazine 100MG, Verapamil 240mg, Labetalol 200mg, Tekturna 150mg.	1
Cardiology	Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.	1

Cardiology	Disapproval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for CT Angiography of the Abdomen and Pelvis.	1
Cardiology	Disapproval	74175 CT ANGIOGRAPHY ABDOMEN W/CONTRAST/NONCONTRAST	Radiology Services Denied Not Medically Necessary	Yes, this is a request for CT Angiography of the abdomen.	3
Cardiology	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other;	1
Cardiology	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; <Enter Additional Clinical Information>	1
Cardiology	Disapproval	75557 Cardiac MRI Morph & structure w/o contrast	Radiology Services Denied Not Medically Necessary	This is a request for a heart or cardiac MRI	3
Cardiology	Disapproval	75571 Coronary Artery Calcium Score, EBCT	Radiology Services Denied Not Medically Necessary	; This is a request for a CT scan for evaluation of coronary calcification.	1
Cardiology	Disapproval	75571 Coronary Artery Calcium Score, EBCT	Radiology Services Denied Not Medically Necessary	hx of chest pain and a family hx of cad.; This is a request for a CT scan for evaluation of coronary calcification.	1
Cardiology	Disapproval	75572 CT Heart	Radiology Services Denied Not Medically Necessary	This is a request for a Heart CT.	1

Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	Ms. Nagengast is here for a follow up visit. She was unable to have her stress test and echo due to insurance problems. She is having severe back problems and is unable to lay down in her back or on her left side. She is going to make an appointment with ; This is a request for CTA Coronary Arteries.; The patient has not had other testing done to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.	1
Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; /PLAN; IMPRESSION; Abnormal electrocardiogram that has changed; ; PLAN; CTA of the heart and echocardiogram to rule out ASD; Restricted activity; Additional recommendations will follow.; Yes, there is Chronic Chest Pain.	1

Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; see attached clinicals.; Yes, there is Chronic Chest Pain.	1
Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; will send clin info.; Yes, there is Chronic Chest Pain.	1
Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	This is a request for CTA Coronary Arteries.; The study is requested for known or suspected valve disorders.	1
Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.;	1

Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.; chest pain with a history of coronary artery disease.	1
Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; It is not known if patient did not have a Nuclear Cardiology study within the past six months.; Chest pressure	1
Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; None of the above.; &Additional Clinical Information&	1
Cardiology	Disapproval	75574 CT Angiography Heart coronary arteries, CCTA	Radiology Services Denied Not Medically Necessary	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; None of the above.; aortic aneurysm repair done in January of 2013. CT chest that was done in 2014 at which time her thoracic aorta measured around 30 mm and there was no abdominal aortic aneurysm.	1
Cardiology	Disapproval	75635 CTA AA&BI ILIOFEM LXTR RS&I C-/C+ POST-PXESSING	Radiology Services Denied Not Medically Necessary	Yes, this is a request for CT Angiography of the abdominal arteries.	3
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	&Enter answer here - or Type In Unknown If No Info Given. &; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is not know	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	5
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has had Myocardial Perfusion Imaging including SPECT (single photon Emission Computerized Tomography) or Thallium Scan.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is not know	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has not been any treatment or conservative therapy.;	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/2015; There has not been any treatment or conservative therapy.; He has a past medical history of chronic hypertension, chronic hyperlipidemia, and chronic lower extremity edema. He complains exertional shortness of breath, occasional palpitations, and lower extremity edema. He denies chest pain, dizziness, or indige	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/2014; There has not been any treatment or conservative therapy.;	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Several Months ago, Ms. Morris is a 46 y/o AAW with a h/o HTN, here today to establish cardiac care. She says that for the past several months she has been having a lot of excessive fatigue. The fatigue is worse with exertion and causes her to feel shor; There has not been any treatment or conservative therapy.; Chief Complaint: weakness, presyncope, heart racing, soa.   1. Hypertension .   2. Dizziness .  History of Present Illness:  Patient is a 46 year old African American Female.  HPI: Ms. Morris is a 46 y/o AAW with a h/o HTN, here today to establ	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This study is being ordered for trauma or injury.; ; There has not been any treatment or conservative therapy.;	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This study is being ordered for Vascular Disease.; ; It is not known if there has been any treatment or conservative therapy.;	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This study is being ordered for Vascular Disease.; ; There has been treatment or conservative therapy.;	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	; This study is being ordered for Vascular Disease.; ; There has not been any treatment or conservative therapy.; shortness of breath	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	51 yo male with Htn here for cardiac evaluation. For the past 1 year he c/o left sided chest pain. Radiates to left arm. Lasts for ~ 10 seconds. Mild to moderate. Not worse with exertion but does c/o DOE. Abnormal EKG.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	56 year old male with angina, chest pain, fatigue, hypertensive heart disease, and strong family history of heart disease.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	ABN echo, ejection fraction 45% and has hyperlipidemia; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Abnormal EKG; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	adenoma - lower extremity , diabetes, CHF, passive CAD, previous left heart cath.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ER- visit 3/14/16;; There has been treatment or conservative therapy.; unknown; emergency cardio vascular surgery	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	angina III, diabetes, dyslipidemia; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	angina, coronary artery disease, COPD, dyslipidemia; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Chest pain with the last episode happening this morning and lasting for about five minutes.  Ongoing tobacco use disorder.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Chest pain, dizziness, palpitations, shortness of breath with exertion, family history; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	CHEST PAIN, HTN, PVD, SMOKER, UNKNOWN FAM HX OF CAD; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Chest pain, shortness of breath and hypertension; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	chest pain, shortness of breath, dizziness, palpitations, diabetic, hyperlipidemia, CHF, abnormal EKG, ST-T changes, aortic stenosis; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is requested for congestive heart failure.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	CHEST PAIN, SOB, HTN, SYNCOPE, SMOKER, FAMILY HX OF CAD; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	CHEST PAIN; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient had a recent stress echocardiogram to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Comes in for further evaluation of her cp, palpitations. Her routine blood work showed mildly elevated potassium of 5.3 normal creatinine and normal Hg and HgA1C as well as normal thyroid panel. She is coming in for further evaluation of her atypical ches; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Enter answer here - or Type In fo Given.; This study is being ordered for Vascular Disease.; Pt has had long history od cardiac disease; There has been treatment or conservative therapy.; Chest pain in pt with known CAD and pt has a prior stent; on full medical management with statins and aspirin	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Enter answer here - or Type In Unknown If No Info GIVEN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ;	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Exercise stress test not able to be completed during he started to get ventricular tachycardia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Family History: Hypertension, Diabetes, COPD, and Heart Dis. My grandfather died at age 60  BRUGADA SYNDROME Diabetes mellitus Chest pain  Claudication  ICD implanted 5-2012; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Family History: Reports history of family illness.   Father is deceased . Cause of Death MI.   Mother is living . Mother's history includes heart disease.   Total number of brothers 5 .   Total number of sisters 10 .   Siblings history include; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Complaints today include: chest pain.   The chest pain is located on the left side . The pain occurs anytime . Pain last approximately 10-15 min. Patient describes the pain as stabbing . Pain is relieved with rest .   Patient denies symptoms of shortn; There has not been any treatment or conservative therapy.; Chest Pains, Hypertension, Dyslipidemia	1
------------	-------------	---	---	---	---

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Heart Saver CT revealed an abnormal score. Lung cancer in remission, and previous smoking history.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are not new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Mrs Pena. Comes in for hospital follow-up. She had syncope and near Syncope. It was felt initially to be *BPV. Echo was essentially normal. Dr. Thomas saw her and did not think it was seizures. Work up negative. She continues to have episodes lasting when; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Mrs. Williams comes in for follow up last seen June 2015. She has history of CAD and stent in 2010. She continues to do well on medications. She's been having more heartburn recently. She think she's been eating more onions and hot peppers. It sounds typi; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Ms. Wood comes in for initial evaluation. She has history of hyperlipidemia and former tobacco abuse she just quit a week ago. She had "bricks on her chest". This lasted off and on all day. She had shortness of breath with this. She did not seek care. She; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	New patient referred Dr George Garrett, has chest tightness last few months, across chest tightness, at rest and exercise, no radiation, associated dyspnea, episodes a few times a week, no associated syncope, had AMI in 2013, and according patient had SCA; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	None; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/06/2016; There has been treatment or conservative therapy.; SOB; Steriod/Histamines	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Patient Problems Medical History; Hypertension; Dyspnea; Chest pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/01/2016; There has not been any treatment or conservative therapy.; Chest pains, shortness of breath and shortness of breath/exertion	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	previous MPI revealed a small defect; chest pain & sob; recent TIA; dizziness; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is less than 20	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Pt has a really bad EKG; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Pt here for check up. States that he has intermittent chest pain. None today but did have left sided chest pain without radiation last week. Denies nausea or SOB with episode but states that he was "sweaty" with it. Episode lasted about 10 to 15 minutes. ; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 20 to 29	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Pt is needing clearance for a DOT physical which requires a stress test. She is post coronary bypass.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are not new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; There is known coronary artery disease, history of heart attack (MI), coronary bypass surgery, coronary angioplasty or stent.; The member has known or suspected coronary artery disease.	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Pt with diastolic dysfunction chest pressure and shortness of breath; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had other testing done to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is requested for congestive heart failure.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Pt with known CAD and new onset of angina pectoris and abnormal EKG; This study is being ordered for Vascular Disease.; 01/2014; There has been treatment or conservative therapy.; chest pain and shortness of breath and abnormal EKG.; Anti coagulants and prior stenting in 2014. new onset of chest pain.	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Pt with shortness of breath with angina with daily activities. Patient also has uncontrolled hypertension.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 30 to 39	1

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Pulmonary stress test abnormal.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 2 cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	She has complaints of fatigue dizziness near syncope chest pain when she lays down at night with shortness of breath dyspnea and exertional chest discomfort chronic back pain. She denies LE edema orthopnea claudication.; This study is being ordered for Vascular Disease.; unknown; It is not known if there has been any treatment or conservative therapy.; She has complaints of fatigue dizziness near syncope chest pain when she lays down at night with shortness of breath dyspnea and exertional chest discomfort chronic back pain. She denies LE edema orthopnea claudication.	1
Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The member does not have known or suspected coronary artery disease	5

Cardiology	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is requested for evaluation of the heart prior to non cardiac surgery.	4

Chiropractic Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 4-15-16; There has been treatment or conservative therapy.; pain, stiffness; chiropractic	1
Chiropractic Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Enter answer here - or Type In Unknown If No Info Given; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; ;	1
Chiropractic Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient has persistent pain in Lumbar and going down right leg. He has numbness and weakness in leg.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

Chiropractic Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	R/O DISC INVOLVEMENT; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/09/2016; There has been treatment or conservative therapy.; UNKNOWN; MANIPULATIVE ADJUSTMENT, ELECTRICAL MUSCLE STIMULATION, THERAPEUTIC EXERCISES AND MECHANICAL TRACTION	1
Chiropractic Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1
Chiropractic Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; The patient has Neurological abnormalities; This procedure is being requested for Trauma or recent injury	1
Chiropractic Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	37
Chiropractic Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	4
Chiropractic Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	14

Chiropractic Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	1
Chiropractic Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Unknown; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	1
Chiropractic Medicine	Approval	72196 MRI PELVIS	; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.; ;	1
Chiropractic Medicine	Approval	72196 MRI PELVIS	Enter answer here - or Type In Unknown If No Info Given; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; ;	1
Chiropractic Medicine	Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for pelvic trauma or injury.	1
Chiropractic Medicine	Approval	73221 MRI JOINT OF UPPER EXTREMITY	< Enter answer here - or Type In Unknown If No Info Given. >; The requested study is a Shoulder MRI.; The pain is from a recent injury.; It is not know if surgery or arthroscopy is scheduled in the next 4 weeks.; The request is for shoulder pain.; There is a suspicion of tendon, ligament, rotator cuff injury or labral tear.	1
Chiropractic Medicine	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.	1

Chiropractic Medicine	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.	3
Chiropractic Medicine	Approval	73221 MRI JOINT OF UPPER EXTREMITY	This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.	1
Chiropractic Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This study is being ordered for trauma or injury.; Gradual onset; There has been treatment or conservative therapy.; Severe pain, swelling/stiffness/decreased range of motion. Difficulty walking.; Anti Inflammatory medications / Physical therapy	2
Chiropractic Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.	1
Chiropractic Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1

Chiropractic Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Instability	1
Chiropractic Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Swelling greater than 3 days	1
Chiropractic Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days	1
Chiropractic Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	2
Chiropractic Medicine	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.	1

Chiropractic Medicine	Approval	74175 CT ANGIOGRAPHY ABDOMEN W/CONTRAST/NONCONTRAST			1
Chiropractic Medicine	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY		This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.	1
Chiropractic Medicine	Approval	93350 ECHO TTHRC R-T 2D -+M-MODE COMPLETE REST&STRS		This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.	1
Chiropractic Medicine	Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
Chiropractic Medicine	Disapproval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Radiology Services Denied Not Medically Necessary	No metal in the body. No reason Pt can not have MRI. Possible lipoma on the neck.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1

Chiropractic Medicine	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/11/2016; There has been treatment or conservative therapy.; Pt suffers with severe headaches, sciatica, right hip and neck pain.; Chiropractic care for 9 weeks.	1
Chiropractic Medicine	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Ice and heat does not help. Neck and arm have radiating pain.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/13/2016; There has been treatment or conservative therapy.; weakness in rgt and left arm low back with radiating pain; 6 weeks Nsaid	1
Chiropractic Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Found on lumbar down to the legs; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

Chiropractic Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
Chiropractic Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/11/2016; There has been treatment or conservative therapy.; Pt suffers with severe headaches, sciatica, right hip and neck pain.; Chiropractic care for 9 weeks.	1
Chiropractic Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/07/2015; There has been treatment or conservative therapy.; LBP; lrom; trouble sleeping, walking, sitting and standing; trouble getting in /out of the bed, getting dressed and bending; Chiropractic care; home exercise; otc pain meds	1

Chiropractic Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Edima in spine area L 5 with tenderness.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has been treatment or conservative therapy.; Pt c/o limited ROM, pain radiating down R leg. Bladder issues as well.; Chiropractic care and home exercise and OTC meds	1
Chiropractic Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Ice and heat does not help. Neck and arm have radiating pain.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/13/2016; There has been treatment or conservative therapy.; weakness in rgt and left arm low back with radiating pain; 6 weeks Nsaid	1
Chiropractic Medicine	Disapproval	72196 MRI PELVIS	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10/07/2015; There has been treatment or conservative therapy.; LBP; lrom; trouble sleeping, walking, sitting and standing; trouble getting in /out of the bed, getting dressed and bending; Chiropractic care; home exercise; otc pain meds	1

Chiropractic Medicine	Disapproval	72196 MRI PELVIS	Radiology Services Denied Not Medically Necessary	Edima in spine area L 5 with tenderness.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; There has been treatment or conservative therapy.; Pt c/o limited ROM, pain radiating down R leg. Bladder issues as well.; Chiropractic care and home exercise and OTC meds	1
Chiropractic Medicine	Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; unknown exact date, but around 3 months ago; There has been treatment or conservative therapy.; Constant pain in the right shoulder and right elbow.; Manual manipulations of the shoulder and elbow, ultrasound, elbow support and ice therapy.	2
Chiropractic Medicine	Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; It is not known if the patient has completed and failed a course of conservative treatment.; Yergason and Apleys test left shoulder for pain with abduction. Pain more intense abduction/external rotation. Pain over the intertubular groove considered positive and suggests biceps tendon or transverse humeral ligament tenosynovitis	1
Chiropractic Medicine	Disapproval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	Radiology Services Denied Not Medically Necessary	; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.; ;	2

Colon & Rectal Surgery	Approval	71250 CT CHEST, THORAX	in conjunction colonoscopy; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Colon & Rectal Surgery	Approval	71250 CT CHEST, THORAX	This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.	1
Colon & Rectal Surgery	Approval	71250 CT CHEST, THORAX	This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.	2
Colon & Rectal Surgery	Approval	71250 CT CHEST, THORAX	This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.	2

Colon & Rectal Surgery	Approval	72196 MRI PELVIS	; This is a request for a Pelvis MRI.; The patient has NOT had previous abnormal imaging including a CT, MRI or Ultrasound.; The study is being ordered for suspicion of tumor, mass, neoplasm, or metastatic disease.	1
Colon & Rectal Surgery	Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for evaluation of the pelvis prior to surgery or laparoscopy.	1
Colon & Rectal Surgery	Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?	1
Colon & Rectal Surgery	Approval	72196 MRI PELVIS	This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.	2
Colon & Rectal Surgery	Approval	74176 CT ABD & PELVIS W/O CONTRAST	in conjunction colonoscopy; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
Colon & Rectal Surgery	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1

Colon & Rectal Surgery	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; <Enter Additional Clinical Information>	2
Colon & Rectal Surgery	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or R/O metastases	4
Colon & Rectal Surgery	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is not a request for follow up of a known tumor or cancer involving both the abdomen and pelvis or if this patient is undergoing active treatment.; This is a request for initial staging of a known tumor other than prostate.; Known Tumor, Cancer, Mass, or R/O metastases	2
Colon & Rectal Surgery	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.	1

Colon & Rectal Surgery	Approval	74176 CT ABD & PELVIS W/O CONTRAST		This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Restaging of Cancer; Imaging studies have not been performed on the member in the past 3 months.	2
Colon & Rectal Surgery	Approval	74176 CT ABD & PELVIS W/O CONTRAST		This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Initial Staging of Cancer; Imaging studies have not been performed on the member in the past 3 months.	2
Colon & Rectal Surgery	Disapproval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	Radiology Services Denied Not Medically Necessary	left lower quad pain; It is not known whether this study is requested to evaluate suspected pulmonary embolus.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1

Dermatology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; It is not known if there are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; It is not known if the tumor is a pituitary tumor or pituitary adenoma.	1
Dermatology	Approval	71250 CT CHEST, THORAX	History of Merkel Cell Carcinoma, Stage IIIB with 1 of 3 nodes positive in the R axillary dissection. History of NMSC,numerous.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; It is not known if the ordering physician is a hematologist/ oncologist.	1
Dermatology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	History of Merkel Cell Carcinoma, Stage IIIB with 1 of 3 nodes positive in the R axillary dissection. History of NMSC,numerous.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; It is not known if the ordering physician is a hematologist/ oncologist.	1
Dermatology	Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Melanoma.; This is for evaluation of regional lymph nodes.	1

Doctors and Rehabilitation	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	1
Doctors and Rehabilitation	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, NSAIDs, muscle relaxers	1
Doctors and Rehabilitation	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; The patient is experiencing sensory abnormalities such as numbness or tingling.; There is a reason why the patient cannot have a Cervical Spine MRI.; This study is being ordered for another reason besides Abnormal gait, Lower extremity weakness, Asymmetric reflexes, Documented evidence of Multiple Sclerosis,  Bowel or bladder dysfunction, Evidence of new foot drop, etc...	1

Doctors and Rehabilitation	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Radiculopathy documented on EMG or nerve conduction study.	2
Doctors and Rehabilitation	Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, NSAIDs, muscle relaxers	1
Doctors and Rehabilitation	Approval	72131 CT LUMBAR SPINE, LOW BACK	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, NSAIDs, muscle relaxers	1
Doctors and Rehabilitation	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is a preoperative or recent post-operative evaluation.	1
Doctors and Rehabilitation	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.	5
Doctors and Rehabilitation	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.	8

Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6/21/16; There has been treatment or conservative therapy.; radiculopathy; PT from 7/15/16-8/19/16	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxer, NSAIDs	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; PT, chiropractor, NSAIDs, pain medication	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid back pain; pain medication, NSAIDs, epidural injections	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ;	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.; ;	1

Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.;	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Patients main complaint is Neck and back. Patient rates the severity of his main complaint as 10 on a scale of 1 to 10. He experiences the complaint 70 percent of the time since 7-8 years. He currently experiences neck pain, headaches, radiating arm pain,; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2006; There has been treatment or conservative therapy.; LOWER BACK PAIN, NECK PAIN; pain Medicine Physician, Family physician,Physical Therapist, Neurologist and Rheumatologist. The following tests have been done in the past: X-rays and MRI scan Last MRI in 2012. He has tried anti-inflammatory meds, hydrocodone and neurontin/gabapentin i	1

Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	1

Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.	4
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	23
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	1
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Pre-Operative Evaluation; No, the last Cervical spine MRI was not performed within the past two weeks.	1

Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	2
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	4
Doctors and Rehabilitation	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.	1
Doctors and Rehabilitation	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; mid to lower back pain; pain medication, muscle relaxers, NSAIDs	1
Doctors and Rehabilitation	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid back pain; pain medication, NSAIDs, epidural injections	1

Doctors and Rehabilitation	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ;	1
Doctors and Rehabilitation	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.; ;	3
Doctors and Rehabilitation	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Caller does not know whether the patient is experiencing sensory abnormalities such as numbness or tingling.; Patient in severe pain. NSAIDs not working.; ; identifies midline of the T4-6 region as typical location of her pain, but deep to palpation. Soft Tissue Palpation on the Right: no tenderness of the upper trapezius, the levator scapulae, or the rhomboid; n	1
Doctors and Rehabilitation	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	It is not known if the patient has any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.	1

Doctors and Rehabilitation	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.	2
Doctors and Rehabilitation	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	3
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6/21/16; There has been treatment or conservative therapy.; radiculopathy; PT from 7/15/16-8/19/16	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; back and bilateral knee pain; pain medication, NSAIDs, muscle relaxers, physical therapy	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; left knee pain and low back pain; pain medication, muscle relaxers, NSAIDs	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; mid to lower back pain; pain medication, muscle relaxers, NSAIDs	1

Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxer, NSAIDs	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; PT, chiropractor, NSAIDs, pain medication	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; PT, pain medication, NSAIDs, muscle relaxers, epidural injections, facet blocks	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.; ;	3
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Chronic pain, see icd 10 code. Displacement of lumbar disc with myopathy.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	chronic pain; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient has low back pain with numbness in right leg. Patient having trouble walking.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	<p>Patients main complaint is Neck and back. Patient rates the severity of his main complaint as 10 on a scale of 1 to 10. He experiences the complaint 70 percent of the time since 7-8 years. He currently experiences neck pain, headaches, radiating arm pain,; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2006; There has been treatment or conservative therapy.; LOWER BACK PAIN, NECK PAIN; pain Medicine Physician, Family physician,Physical Therapist, Neurologist and Rheumatologist. The following tests have been done in the past: X-rays and MRI scan Last MRI in 2012. He has tried anti-inflammatory meds, hydrocodone and neurontin/gabapentin i</p>	1
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	<p>The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?</p>	2
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	<p>The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection</p>	63
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	<p>The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal nerve study involving the lumbar spine</p>	1

Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	2
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	34
Doctors and Rehabilitation	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	1
Doctors and Rehabilitation	Approval	72196 MRI PELVIS	; This study is being ordered for trauma or injury.; 2014; There has been treatment or conservative therapy.; hip/pelvic pain; NSAIDs, muscle relaxers, pain medication, PT	1
Doctors and Rehabilitation	Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for pelvic trauma or injury.	3
Doctors and Rehabilitation	Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?	1
Doctors and Rehabilitation	Approval	73200 CT ARM OR UPPER EXTREMITY	This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.	1
Doctors and Rehabilitation	Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of upper extremity neoplasm or tumor or metastasis.	1

Doctors and Rehabilitation	Approval	73221 MRI JOINT OF UPPER EXTREMITY	Patient was seen at Northwest Medical for dislocation of right shoulder was given anti-inflammatory meds still having pain feels like popping in and out; The requested study is a Shoulder MRI.; The pain is from an old injury.; The request is for shoulder pain.; The physician has not directed conservative treatment for the past 6 weeks.	1
Doctors and Rehabilitation	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.	2
Doctors and Rehabilitation	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is not an orthopedist.; There is documented findings of severe pain on motion.	4
Doctors and Rehabilitation	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered for suspicious mass/tumor/metastasis.; The patient has had recent plain films of the shoulder.; The plain films were not normal.	1
Doctors and Rehabilitation	Approval	73221 MRI JOINT OF UPPER EXTREMITY	This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.	1

Doctors and Rehabilitation	Approval	73221 MRI JOINT OF UPPER EXTREMITY	This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.	1
Doctors and Rehabilitation	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Patient comes to clinic today c/o left hip and knee pain after a fall last week. She had bruising and swelling which have improved by she continues to c/o pain on ambulation. She denies any new numbness/ tingling/ weakness or loss of bowel or bladder co; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.	1
Doctors and Rehabilitation	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury	2
Doctors and Rehabilitation	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days	2
Doctors and Rehabilitation	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Limited range of motion	1

Doctors and Rehabilitation	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.	1
Doctors and Rehabilitation	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.	1
Doctors and Rehabilitation	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient has a documented limitation of their range of motion.	2
Doctors and Rehabilitation	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steriod therapy (Prednisone or Cortisone).; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has a documented limitation of their range of motion.	1

Doctors and Rehabilitation	Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Doctors and Rehabilitation	Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;	1
Doctors and Rehabilitation	Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	patient has had electrical sensation on left side of his head.; This study is being ordered for a neurological disorder.; unknown; There has been treatment or conservative therapy.; headaches, facial tingling and neck pain.; Patient has had occipital nerve block and saw ENT doctor for evaluation.	1

Doctors and Rehabilitation	Disapproval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
Doctors and Rehabilitation	Disapproval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.	1
Doctors and Rehabilitation	Disapproval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1
Doctors and Rehabilitation	Disapproval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1

Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; NSAIDs, muscle relaxer	2
Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; NSAIDs, muscle relaxers, pain medication	1

Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxer, NSAIDs	2
Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, muscle relaxers, NSAIDs, epidural injection	1
Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and back pain; pain medication, NSAIDs, epidural injection	1
Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; neck and mid to lower back pain; pain medication, NSAIDs, epidural injections	1
Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ;	1

Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	he patient has been experiencing this pain for more than 10 years. He reports sudden onset of pain . The patient describes his pain as constant. The pain is sharp ; The pain is made worse by bending, coughing, lying flat, lifting, sitting a long time, sne; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10 YEARS AGO; There has been treatment or conservative therapy.; The patient has been experiencing; this pain for more than 10 years. He reports sudden onset of pain . The patient describes his pain as constant. The pain; is sharp . Patient says, at its worse his pain is 7/10, at its least it is 5/10, and right now it ; PHYSICAL THERAPY	1
Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Paralysis; This study is being ordered for a neurological disorder.; Birth; There has been treatment or conservative therapy.; Polio weakness LE UE; PT	1

Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	She experiences the complaint 90 percent of the time since 2-3 years. She currently experiences arm/hand tingling and numbness, low back pain, radiating pain down one leg and radiating pain down both legs. The complaint is mostly noticed in the AM and P; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 01/10/2013; There has been treatment or conservative therapy.; constant back pain and knee pain; She experiences the complaint 90 percent of the time since 2-3 years. She currently experiences arm/hand tingling and numbness, low back pain, radiating pain down one leg and radiating pain down both legs. The complaint ; Professional caregivers seen in the past include Pain Medicine Physician and Family physician.The following tests have been done in the past: X-rays and MRI scan last MRI approx 2 years ago. She has tried antiinflammatory; meds, hydrocodone, M. S. Contin/	1
Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	2
Doctors and Rehabilitation	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	1

Doctors and Rehabilitation	Disapproval	72196 MRI PELVIS	Radiology Services Denied Not Medically Necessary	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ;	1
Doctors and Rehabilitation	Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 07/18/2016; There has not been any treatment or conservative therapy.; Cervical pain	2
Doctors and Rehabilitation	Disapproval	73221 MRI JOINT OF UPPER EXTREMITY	Radiology Services Denied Not Medically Necessary	This is a request for an upper extremity joint MRI.; The patient does have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.	1
Doctors and Rehabilitation	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; back and bilateral knee pain; pain medication, NSAIDs, muscle relaxers, physical therapy	2

Doctors and Rehabilitation	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; left knee pain and low back pain; pain medication, muscle relaxers, NSAIDs	1
Doctors and Rehabilitation	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	he patient has been experiencing this pain for more than 10 years. He reports sudden onset of pain . The patient describes his pain as constant. The pain is sharp  The pain is made worse by bending, coughing, lying flat, lifting, sitting a long time, sne; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 10 YEARS AGO; There has been treatment or conservative therapy.; The patient has been experiencing this pain for more than 10 years. He reports sudden onset of pain . The patient describes his pain as constant. The pain is sharp . Patient says, at its worse his pain is 7/10, at its least it is 5/10, and right now it ; PHYSICAL THERAPY	1

Doctors and Rehabilitation	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	She experiences the complaint 90 percent of the time since 2-3 years. She currently experiences arm/hand tingling and numbness, low back pain, radiating pain down one leg and radiating pain down both legs. Doctors and Rehabilitation	Disapproval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a neurological disorder.; gradually over time; There has been treatment or conservative therapy.; left hip and low back pain; Suboxone	1
Doctors and Rehabilitation	Disapproval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	Radiology Services Denied Not Medically Necessary	; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.;	2

Doctors and Rehabilitation	Disapproval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	Radiology Services Denied Not Medically Necessary	; This study is being ordered for trauma or injury.; 2014; There has been treatment or conservative therapy.; hip/pelvic pain; NSAIDs, muscle relaxers, pain medication, PT	1
Emergency Medicine	Approval	70450 CT BRAIN, HEAD		This is a request for a brain/head CT.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.	2
Emergency Medicine	Approval	70450 CT BRAIN, HEAD		This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	3
Emergency Medicine	Approval	70450 CT BRAIN, HEAD		This is a request for a brain/head CT.; This study is requested for known or suspected bleed such as subdural hematoma or subarachnoid bleed.	1
Emergency Medicine	Approval	70486 CT SINUS, FACE,JAW,MANDIBLE,M AXILLOFACIAL NO CONTRAST		"This request is for face, jaw, mandible CT.239.8"; "There is a history of serious facial bone or skull, trauma or injury.fct"	1
Emergency Medicine	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST		This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.	1

Emergency Medicine	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Headaches; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
Emergency Medicine	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	2
Emergency Medicine	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.	3
Emergency Medicine	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.	1
Emergency Medicine	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	T1a; This study is being ordered for a neurological disorder.; 7/4/16; There has not been any treatment or conservative therapy.; left sided numbness / left facial numbness/c ant move left side of face / symptoms did resolve before close of ER visit	1

Emergency Medicine	Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Emergency Medicine	Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They did not have a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Emergency Medicine	Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.	1
Emergency Medicine	Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Acute Bronchitis and abnormal finding on chest xray; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
Emergency Medicine	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST		1
Emergency Medicine	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.	1

Emergency Medicine	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1
Emergency Medicine	Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	Further workup of compression fracture of thoracic spine; The patient does not have any neurological deficits.; The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine CT.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to trauma or acute injury within 72 hours.; There is a reason why the patient cannot undergo a thoracic spine MRI.	1
Emergency Medicine	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	4
Emergency Medicine	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; <Enter Additional Clinical Information>	1
Emergency Medicine	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; swelling, neck pain x 3wks.; No, the patient does not have new or changing neurological signs or symptoms.	1

Emergency Medicine	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	We are referring the patient to pain management and need additional imaging of her entire spine.; This study is being ordered for trauma or injury.; She had an MVA around 2006. She was diagnosed with DDD. She had a bad epidural when she was pregnant.; There has been treatment or conservative therapy.; Numbness and tingling in all 4 extremities. Constant neck and back pain.; She has been to the chiropractor. She's been to 9 visits with the chiropractor, with no relief.	1
Emergency Medicine	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	1
Emergency Medicine	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	1

Emergency Medicine	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	We are referring the patient to pain management and need additional imaging of her entire spine.; This study is being ordered for trauma or injury.; She had an MVA around 2006. She was diagnosed with DDD. She had a bad epidural when she was pregnant.; There has been treatment or conservative therapy.; Numbness and tingling in all 4 extremities. Constant neck and back pain.; She has been to the chiropractor. She's been to 9 visits with the chiropractor, with no relief.	1
Emergency Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; on the right side 1 plus	1
Emergency Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; initial onset was 04/2016; There has been treatment or conservative therapy.; ; pt was prescribed oral steroids, pain medicines and topical creams, Pt rotated ice and heat on affected area. Pt also was seen by a Physical Therapist and completed physical therapy. Pt is still hurting and no change in condition after completing PT	1
Emergency Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	back pain// numbness; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

Emergency Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	low back pain w abnormal ct in ER.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
Emergency Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	6
Emergency Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	1
Emergency Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	4
Emergency Medicine	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	We are referring the patient to pain management and need additional imaging of her entire spine.; This study is being ordered for trauma or injury.; She had an MVA around 2006. She was diagnosed with DDD. She had a bad epidural when she was pregnant.; There has been treatment or conservative therapy.; Numbness and tingling in all 4 extremities. Constant neck and back pain.; She has been to the chiropractor. She's been to 9 visits with the chiropractor, with no relief.	1

Emergency Medicine	Approval	72196 MRI PELVIS	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; initial onset was 04/2016; There has been treatment or conservative therapy.; ; pt was prescribed oral steroids, pain medicines and topical creams, Pt rotated ice and heat on affected area. Pt also was seen by a Physical Therapist and completed physical therapy. Pt is still hurting and no change in condition after completing PT	1
Emergency Medicine	Approval	73200 CT ARM OR UPPER EXTREMITY	This is a request for an upper extremity, shoulder, scapula, elbow, hand, or wrist joint CT.; There is a history of upper extremity joint or long bone trauma or injury.	1
Emergency Medicine	Approval	73220 MRI UPPER EXTREMITY , ENTIRE EXTREMITY, NOT A JOINT	The request is for an upper extremity non-joint MRI.; This is not a preoperative or recent postoperative evaluation.; There is not suspicion of upper extremity neoplasm or tumor or metastasis.; There is no suspicion of upper extremity bone or soft tissue infection.; The ordering physician is not an orthopedist.; There is a history of upper extremity trauma or injury.	1
Emergency Medicine	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; "The caller indicated the study was not ordered for: Known or Suspicious Mass or Tumor with or without metastasis, Known or suspected Joint Infection, Aseptic Necrosis, Trauma, Chronic Pain, or Pre or Post operative evaluation."; < Enter answer here - or Type In Unknown If No Info Given. >	1

Emergency Medicine	Approval	73221 MRI JOINT OF UPPER EXTREMITY	The requested study is a Shoulder MRI.; Study being ordered due to non-acute or chronic pain.; The patient has completed and failed a course of conservative treatment of at least 4 weeks.; The ordering physician is an orthopedist.	1
Emergency Medicine	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a foot CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient does not have a documented limitation of their range of motion.	1
Emergency Medicine	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is a history of lower extremity joint or long bone trauma or injury.	1
Emergency Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; It is not know if surgery or arthroscopy is scheduled in the next 4 weeks.	1
Emergency Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	pt has history of surgery to right knee with new onset of sudden pain.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks.	1

Emergency Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	PT is having left knee pain. PT got the knee stuck in the car door.; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Pain greater than 3 days	1
Emergency Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.	1
Emergency Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury	1
Emergency Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Limited range of motion	1
Emergency Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days	1

Emergency Medicine	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is taking antibiotics.	1
Emergency Medicine	Approval	73721 MRI JOINT OF LOWER EXTREMITY, HIP OR KNEE OR ANKLE OR FOOT JOINT	This is a requests for a hip MRI.; This study is not being ordered in conjunction with a pelvic MRI.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient is not receiving long-term steroid therapy (Prednisone or Cortisone).; The patient does not have an abnormal plain film study of the hip other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; There is not a mass near the hip.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient has a documented limitation of their range of motion.	1
Emergency Medicine	Approval	74176 CT ABD & PELVIS W/O CONTRAST	Nausea Vomiting previous Hx of kidney stones with surgery to remove stone; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.	1

Emergency Medicine	Approval	74176 CT ABD & PELVIS W/O CONTRAST	There is tenderness to left lower quadrant, There is mild left costovertebral angle (CVA) tenderness.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is male.; It is not known if a rectal exam was performed.	1
Emergency Medicine	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	4
Emergency Medicine	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	7
Emergency Medicine	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are clinical findings or indications of Hematuria.; Other	1
Emergency Medicine	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; <Enter Additional Clinical Information>	1

Emergency Medicine	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; Had nausea, vomiting and diarrhea for three days. Vomiting and diarrhea is being controlled with medication but nausea and sharp pain is constant and continuous.	1
Emergency Medicine	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone	4
Emergency Medicine	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre- operative evaluation.;	1
Emergency Medicine	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study		2
Emergency Medicine	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Emergency Medicine	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous myocardial infarction.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Emergency Medicine	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
Emergency Medicine	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	unknown; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Emergency Medicine	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY		This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.	1
Emergency Medicine	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL		T1a; This study is being ordered for a neurological disorder.; 7/4/16; There has not been any treatment or conservative therapy.; left sided numbness / left facial numbness/c ant move left side of face / symptoms did resolve before close of ER visit	1
Emergency Medicine	Approval	93350 ECHO TTHRC R-T 2D -+M-MODE COMPLETE REST&STRS		This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.	1
Emergency Medicine	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	Unknown; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1

Emergency Medicine	Disapproval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; It is not known if there is a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if there is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)	1
Emergency Medicine	Disapproval	70554 Functional MRI Brain	Radiology Services Denied Not Medically Necessary	T1a; This study is being ordered for a neurological disorder.; 7/4/16; There has not been any treatment or conservative therapy.; left sided numbness / left facial numbness/c ant move left side of face / symptoms did resolve before close of ER visit	1
Emergency Medicine	Disapproval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Radiology Services Denied Not Medically Necessary	NECK AND HEAD INJURY A FEW DAYS AGO  NOW HE IS HAVING HEADACHES PAIN IN THE NECK. HE ISNT FEELING NORMAL; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1
Emergency Medicine	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for trauma or injury.; approximately 3 wks ago; There has been treatment or conservative therapy.; neck pain, primarily Left side back pain, muscle pain and weakness; RXs Baclofen 10mg TID, Ketorolac 10mg BID and physical therapy.	1

Emergency Medicine	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.;	1
Emergency Medicine	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.;	1
Emergency Medicine	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.;	1
Emergency Medicine	Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.;	1
Emergency Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.;	1
Emergency Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.;	1
Emergency Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.;	1

Emergency Medicine	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	; This study is being ordered for trauma or injury.; approximately 3 wks ago; There has been treatment or conservative therapy.; neck pain, primarily Left side; back pain, muscle pain and weakness; RXs Baclofen 10mg TID, Ketorolac 10mg BID and physical therapy.	1
Emergency Medicine	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary		1
Emergency Medicine	Disapproval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Radiology Services Denied Not Medically Necessary	; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	1
Emergency Medicine	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.	1
Emergency Medicine	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	R/O:BOWEL OBSTRUCTION GUARDING AND REBOUND TENDERNESS,DIFFUSE ABDOMINAL TENDERNESS, INCREASED PULSE RATE/BP,NAUSEA,VOMITING; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.	1

Emergency Medicine	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis; Other; Patient has had a slight discomfort in his lower abdomen for the last two weeks. He states he has burning with urination off and on, but not every time he urinates. he denies any penile discharge, fever, or blood in urine. He has no new sexual partners	1
Emergency Medicine	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Emergency Medicine	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Patient has chest pain. Sharp central chest pain, nausea, cold sweats, worse with breath intake.; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

Emergency Medicine	Disapproval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Radiology Services Denied Not Medically Necessary	Pt had near syncope, sweating, fatigue, dizzy, EKG was borderline; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
Endocrinology	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST		This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.	5
Endocrinology	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST		This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.	2
Endocrinology	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE		< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 months; There has not been any treatment or conservative therapy.; diplopia is worsening and eye is swelling and mbr can barely open it	1

Endocrinology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST		2
Endocrinology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
Endocrinology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a sudden and severe headache.; The patient has NOT had a recent onset (within the last 3 months) of neurologic symptoms.	1

Endocrinology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; It is not known if the tumor is a pituitary tumor or pituitary adenoma.	1
Endocrinology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2 months; There has not been any treatment or conservative therapy.; diplopia is worsening and eye is swelling and mbr can barely open it	1

Endocrinology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Patient has a pituitary tumor, follow up to see if tumor increased in size.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; It is not known if the headache is described as a “thunderclap” or the worst headache of the patient’s life.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is a new and sudden onset of headache (less than 1 week) not improved by pain medications.	1
Endocrinology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	3
Endocrinology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	4

Endocrinology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing vertigo	1
Endocrinology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	2
Endocrinology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing fatigue or malaise.	3

Endocrinology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.	2
Endocrinology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; It is not known if there are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; It is not known if there is a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.	1
Endocrinology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; It is not known if there are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; It is not known if there are physical findings or laboratory values indicating abnormal pituitary hormone levels.; There has not been a previous Brain MRI completed.	1

Endocrinology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are not physical findings or laboratory values indicating abnormal pituitary hormone levels.; There has been a previous Brain MRI completed.; The brain MRI was abnormal.	1
Endocrinology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.	1
Endocrinology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.	4

Endocrinology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.	1
Endocrinology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor.	1
Endocrinology	Approval	71250 CT CHEST, THORAX	This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.	2
Endocrinology	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	1

Endocrinology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; It is not known if this is a request for initial staging of a known tumor other than prostate.; It is not known if there are new signs or symptoms including hematuria, presenting with known cancer or tumor.; Caller does not know if there is a known prostate cancer with a PSA greater than 10.; It is not known if this is a request for follow up to a known tumor or abdominal cancer.; It is not known if there is a palpable or observed abdominal mass.; It is not known if there is an abdominal and pelvic or retroperitoneal mass that has been confirmed.	1
Endocrinology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Endocrinology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.	1

Endocrinology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.	1
Endocrinology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There is suspicion of an adrenal mass (pheochromocytoma).; The suspicion of an adrenal mass was suggested by labs.; A Metanephrine lab test was completed and found to be abnormal.	1
Endocrinology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1
Endocrinology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of Diabetic patient with gastroparesis.	1
Endocrinology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a known or a strong suspicion of kidney or ureteral stones.; Kidney/Ureteral stone	1

Endocrinology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; Suspicious Mass or Tumor	1
Endocrinology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Suspicious Mass or Tumor	1
Endocrinology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; This is a request for follow up of a known tumor or cancer involving both the abdomen and pelvis and the patient is undergoing active treatment.; Known Tumor, Cancer, Mass, or R/O metastases	1
Endocrinology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is a hematologist/ oncologist.; The diagnosis of cancer or tumor has been established.; Follow up treatment for cancer; Imaging studies have not been performed on the member in the past 3 months.	2
Endocrinology	Approval	74181 MRI ABDOMEN	abnormal labs that indicate a possible tumor; This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient has NOT had previous abnormal imaging including a CT, MRI or Ultrasound.; This study is NOT being ordered to evaluate an undescended testicle in a male.	1

Endocrinology	Approval	74181 MRI ABDOMEN		r/out tumor; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Endocrinology	Approval	74185 MRA, MRI ANGIOGRAPHY ABDOMEN WITH/WITHOUT CONTRAST		This is a request for a MR Angiogram of the abdomen.	1
Endocrinology	Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically Necessary	r/out tumor; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Endocrinology	Disapproval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; Back pain, osteoporosis	1
Endocrinology	Disapproval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; Back pain, osteoporosis	1

Endocrinology	Disapproval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has not been any treatment or conservative therapy.; Back pain, osteoporosis	1
Endocrinology	Disapproval	74150 CT ABDOMEN WITHOUT CONTRAST	Radiology Services Denied Not Medically Necessary	Abdominal pain and blacked stool; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Endocrinology	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; un explained weight gained,	1
Endocrinology	Disapproval	77058 MRI breast,without and/or with contrast material(s);unilateral	Radiology Services Denied Not Medically Necessary	Her history includes a mother diagnosed at age 49 and then had a reoccurrence at age 79.; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).	1

Gastroenterology	Approval	70450 CT BRAIN, HEAD		1
Gastroenterology	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.	1
Gastroenterology	Approval	70450 CT BRAIN, HEAD	unknown cause for chronic nausea; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; patient stats she has had long term nausea - EGD and colonoscopy negative for cause of nausea - Dr. Ketcher requested CT head, abd & pelvis to help determine cause of chronic nausea; It is not known if there has been any treatment or conservative therapy.;	1
Gastroenterology	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; March 2016; There has not been any treatment or conservative therapy.; swallowing issues/speech impairments	1
Gastroenterology	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.	1

Gastroenterology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	2 year follow up for a 20x12x13mm brain tumor presumably a low grade glioma or subependymomanter needs follow-up to check for growth; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is not a pituitary tumor or pituitary adenoma.	1
Gastroenterology	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing vertigo	1
Gastroenterology	Approval	71250 CT CHEST, THORAX		2
Gastroenterology	Approval	71250 CT CHEST, THORAX	"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
Gastroenterology	Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	4

Gastroenterology	Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is NOT a smoker nor do they have a history of smoking.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
Gastroenterology	Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Gastroenterology	Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/22/2016; There has not been any treatment or conservative therapy.; chronic hep c lost 45 lbs in 1 year having ultra valve function constipation chest pain difficulty breathing lung decreased breath sound	1
Gastroenterology	Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; March 2016; There has not been any treatment or conservative therapy.; swallowing issues/speech impairments	1

Gastroenterology	Approval	71250 CT CHEST, THORAX	; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Gastroenterology	Approval	71250 CT CHEST, THORAX	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 03/2016; There has not been any treatment or conservative therapy.; since march 45 weight loss cough , smoker , vomiting	1
Gastroenterology	Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.	3
Gastroenterology	Approval	71250 CT CHEST, THORAX	ABDOMINAL PAIN IN MALE,COUGH,EXCESSIVE WEIGHT LOSS,PERSISTENT DISRRHEA ABD PAIN,R/O MALIGNANT/INFECTIOUS CAUSE FOR COUGH,ABD PAIN,WEIGHT LOSS,DIARRHEA,EDEMA; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Gastroenterology	Approval	71250 CT CHEST, THORAX	EGD WAS PERFORMED YESTERDAY. ANASTAMOSIS WAS SEEN AT 25 CM FROM THE INCISORS. MINOR NARROWING, ESOPHAGITIS AND LARGE AMOUNT OF RETAINED FOOD IN HIS STOMACH.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; FEB 2015; There has been treatment or conservative therapy.; CHRONIC COUGH, NAUSEA WITH VOMITING, RIGHT UPPER QUADRANT ABDOMINAL PAIN, ESOPHAGEAL REFLEX; SURGERY, MEDICATIONS	1

Gastroenterology	Approval	71250 CT CHEST, THORAX	None; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
Gastroenterology	Approval	71250 CT CHEST, THORAX	Operative Findings: Colonic tumour at IC valve. For referral to colorectal surgery; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Gastroenterology	Approval	71250 CT CHEST, THORAX	patient having pain; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Gastroenterology	Approval	71250 CT CHEST, THORAX	Patient was found to have a mass in the splenic flexure rectal mass and need CT to determine metastatic disease; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1

Gastroenterology	Approval	71250 CT CHEST, THORAX	Patient with new diagnosis of hepatocellular carcinoma is currently being evaluated for a liver transplant pending imaging studies for staging of HCC. ; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
Gastroenterology	Approval	71250 CT CHEST, THORAX	pre-op eval colon mass in descending colon; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Gastroenterology	Approval	71250 CT CHEST, THORAX	R/O extrinsic compression on distal esophagus.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
Gastroenterology	Approval	71250 CT CHEST, THORAX	Status post liver transplant patient with history of hepatocellular carcinoma. Imaging to for surveillance of reoccurrence.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1

Gastroenterology	Approval	71250 CT CHEST, THORAX	unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Gastroenterology	Approval	72192 CT PELVIS WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Gastroenterology	Approval	72192 CT PELVIS WITHOUT CONTRAST	Pt suffers with recurrent diverticulitis.; This study is being ordered due to known or suspected infection.; "The ordering physician is a surgeon, gynecologist, urologist, gastroenterologist, or infectious disease specialist or PCP ordering on behalf of a specialist who has seen the patient."; This is a request for a Pelvis CT.	1
Gastroenterology	Approval	72196 MRI PELVIS	COLONOSCOPY SHOWED ILEITIS POSSIBLE; This study is being ordered for Inflammatory/ Infectious Disease.; 3 YEARS AGO; It is not known if there has been any treatment or conservative therapy.; ABDOMINAL PAIN, DIAHRREA, BLOOD IN STOOL, WEIGHT LOSS	1
Gastroenterology	Approval	72196 MRI PELVIS	r/o fistula; This is a request for a Pelvis MRI.; The request is not for any of the listed indications.	1
Gastroenterology	Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for evaluation of the pelvis prior to surgery or laparoscopy.	1
Gastroenterology	Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for suspicion of pelvic inflammatory disease or abscess.	1

Gastroenterology	Approval	72196 MRI PELVIS	This is a request for a Pelvis MRI.; The request is for suspicion of tumor, mass, neoplasm, or metastatic disease?	2
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST		8
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	2
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; No,there is not an abdominal and pelvic or retroperitoneal mass that has been confirmed.	1

Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	abdominal pain upper gastric; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Abdominal pain, Epigastric pain, weight loss, decreased appetite, nausea, vomiting, abdominal pain, and frequent diarrhea, Bowel changes, epigastric tenderness; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1

Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Abnormal imaging - CT, Epigastric abdominal pain; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Alcoholic cirrhosis, hypertensive gastropathy; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Chirosis of liver ascites; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1

Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Cirrhosis of liver, Elevated liver enzymes level, cirrhotic liver on ultrasound, Check for hepatoma by CT; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	EGD WAS PERFORMED YESTERDAY. ANASTAMOSIS WAS SEEN AT 25 CM FROM THE INCISORS. MINOR NARROWING, ESOPHAGITIS AND LARGE AMOUNT OF RETAINED FOOD IN HIS STOMACH.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; FEB 2015; There has been treatment or conservative therapy.; CHRONIC COUGH, NAUSEA WITH VOMITING, RIGHT UPPER QUADRANT ABDOMINAL PAIN, ESOPHAGEAL REFLEX; SURGERY, MEDICATIONS	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	hepatoma, portal hypertension. adeama; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis	1

Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	<p>pain; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis</p>	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	<p>Patient has a new diagnosis of cirrhosis and was found to have an elevated AFP with no history of hepatitis. Need to rule out hepatocellular carcinoma.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis</p>	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	<p>Pt had EGD and showed stricture and erosion in gastro-esophageal junction.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone, &#x0D; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement, &#x0D; Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis</p>	1

Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Pt has negative hida scan and still has abd. pain and negative US for gallstones; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Pt is vomiting blood and hematemesis; abd. pain is moderate in epigastric region and Pt has a gastric ulcer; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis	1

Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Pt suffers with anemia; fatty liver and mal absorption.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Recent Ultrasound showed abnormal liver echotexture, likely due to steatosis, cirrhosis is also a consideration. Radiologist recommended CT abdom with contrast enhancement for further assessment. Also they could not see the pancreas due to acoustic wind; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1

Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	see last page.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Abdominal xrays showed gas-filled colon with mildly dilated large intestine without air-fluid levels. He also had a cardiac workup including treadmill stress test and event monitor exam.; There has been treatment or conservative therapy.; Mr. Allen is here for evaluation of left-sided chest pain including slight discomfort in the left upper quadrant. He describes his pain is mostly in the left lower chest which radiates to his left arm as well. It makes him short of breath and sometimes ; Mr. Allen is here for evaluation of left-sided chest pain including slight discomfort in the left upper quadrant. He describes his pain is mostly in the left lower chest which radiates to his left arm as well. It makes him short of breath and sometimes	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; No, this is not a request for follow up to a known tumor or abdominal cancer.; This study being ordered for initial staging of a known tumor other than prostate.	2
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer.	1

Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There is no known prostate cancer with a PSA greater than 10.; It is not known if this is a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; No, there has not been a recent abdominal CT scan.	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; Yes, there has been a recent abdominal CT scan.; No, this is not a repeat of a CT of the abdomen within 6 weeks.	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is a known or a strong suspicion of kidney or ureteral stones.	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.	6

Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.	2
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	13
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are clinical findings or indications of Diabetic patient with gastroparesis.	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month	3

Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	To evaluate liver lesion seen on previous imaging.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	To further evaluate abdominal pain and abnormal liver functions.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	To further evaluate abdominal pain, weight gain, diarrhea, etc.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1

Gastroenterology	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	US done in 12/2015 no results// CBC panel done in 6/2016 was normal//; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
Gastroenterology	Approval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCON TRAST		1
Gastroenterology	Approval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCON TRAST	This is a request for CT Angiography of the Abdomen and Pelvis.	2
Gastroenterology	Approval	74175 CT ANGIOGRAPHY ABDOMEN W/CONTRAST/NONCON TRAST	Yes, this is a request for CT Angiography of the abdomen.	4
Gastroenterology	Approval	74176 CT ABD & PELVIS W/O CONTRAST		7

Gastroenterology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for acute pain.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.	1
Gastroenterology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 04/22/2016; There has not been any treatment or conservative therapy.; chronic hep c lost 45 lbs in 1 year having ultra valve function constipation chest pain difficulty breathing lung decreased breath sound	1
Gastroenterology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	; This is a request for an abdomen-pelvis CT combination.; The reason for the study is none of the listed reasons.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.	1
Gastroenterology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 03/2016; There has not been any treatment or conservative therapy.; since march 45 weight loss cough , smoker , vomiting	1

Gastroenterology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	Member had an ULTRA done that came back normal/ Member has lost more than 50 pounds unintentionally/ having rebound tenderness in left upper quadrant / colonoscopy done in 2015 and hyperplastic polyups; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.	1
Gastroenterology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	None; This is a request for an abdomen-pelvis CT combination.; The reason for the study is infection.; The patient does not have a fever and elevated white blood cell count or abnormal amylase/lipase.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.; The patient has Crohn's Disease.	1
Gastroenterology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	Operative Findings: Colonic tumour at IC valve. For referral to colorectal surgery; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1

Gastroenterology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	Patient complains of sharp stabbing abdominal pain accompanied with chest pain. Constant nausea with diarrhea. Checking for any diverticulitis or abscesses or other inflammatory disorder.; This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.	1
Gastroenterology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	Patient has had several procedures such as EGD, colonoscopy, and Gastric scan. Still having pain.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.	1
Gastroenterology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	Patient was found to have a mass in the splenic flexure rectal mass and need CT to determine metastatic disease; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1

Gastroenterology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	pre-op eval colon mass in descending colon; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
Gastroenterology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	Pt has abdom pain durning exam, nasuea, and a tender abdom.; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were abnormal.	1
Gastroenterology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	Pt having abdominal pain and gas; This is a request for an abdomen-pelvis CT combination.; A urinalysis has not been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient did not have a amylase or lipase lab test.	1
Gastroenterology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	Pt. had recent normal colonoscopy. Underwent Lysis of adhesions.; This is a request for an abdomen-pelvis CT combination.; It is not known if a urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; It is unknown if the patient had an Amylase or Lipase lab test.	1

Gastroenterology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	r/o diverticulitis; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.	1
Gastroenterology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; Infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	123
Gastroenterology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; The reason for the study is pre-op or post op evaluation.; The study is requested for post-op evaluation.; The study is requested as a first follow up study for a suspected or known post-op complication.; This study is not being requested for abdominal and/or pelvic pain.; The study is not requested for hematuria.	1
Gastroenterology	Approval	74176 CT ABD & PELVIS W/O CONTRAST	This is a request for an abdomen-pelvis CT combination.; The requested study is for post-operative evaluation.; The requested study is a first follow up study for a post operative complication.; Pre-op or post op evaluation	1

Gastroenterology	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; quad pain cirrhosis of the liver	1
Gastroenterology	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; right pain Is post cholecystectomy	1
Gastroenterology	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; to assess his small bowel disease and compare with MRI in Jan 2015 and will also ensure that there is no anatomical cause for his rib pain	1

Gastroenterology	Approval	74181 MRI ABDOMEN	US ABD COMPLETE Findings: The visualized portions of the abdominal aorta and inferior vena cava unremarkable. The pancreas is normal in appearance. The gallbladder has been surgically removed. The common bile duct measures 1.3 cm in diameter. The right k; This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/ metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; There is NO suspicion of metastasis.	1
Gastroenterology	Approval	74261 CT Colonography, diagnostic without contrast	< Enter answer here - or Type In Unknown If No Info Given. >; This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.	1
Gastroenterology	Approval	74261 CT Colonography, diagnostic without contrast	; This patient does not have a medical problem that makes him/ her unsuitable for conventional colonoscopy.; This patient has undergone an attempted but incomplete conventional colonoscopy.; The member had colon screening studies completed prior to this request.	1
Gastroenterology	Approval	74261 CT Colonography, diagnostic without contrast	Colonoscopy was attempted on 8-25-16 by Dr McElreath but was unable to get around complete colon during exam.; This patient does not have a medical problem that makes him/ her unsuitable for conventional colonoscopy.; This patient has undergone an attempted but incomplete conventional colonoscopy.; The member had colon screening studies completed prior to this request.	1

Gastroenterology	Approval	74261 CT Colonography, diagnostic without contrast	Enter answer here - or Type pt just underwent attempted colonoscopy without success due to obstruction of questionable origin.; This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.	1
Gastroenterology	Approval	74261 CT Colonography, diagnostic without contrast	pt with recent rectal bleeding and personal hx of cervical cancer and multi cystic adenaxal carcinoma with family hx of colon cancer. She is overdue for f/u colonoscopy and needs eval via CT colonography because her last colonoscopy was incomplete due to; This patient does not have a medical problem that makes him/ her unsuitable for conventional colonoscopy.; This patient has undergone an attempted but incomplete conventional colonoscopy.; The member had colon screening studies completed prior to this request.	1
Gastroenterology	Approval	75571 Corornary Artery Calcium Score, EBCT	elevated troponin levels in patient being evaluated for a liver transplant.; This is a request for a CT scan for evaluation of coronary calcification.	1
Gastroenterology	Approval	75571 Corornary Artery Calcium Score, EBCT	Patient is being evaluated for a liver transplant.; This is a request for a CT scan for evaluation of coronary calcification.	1
Gastroenterology	Approval	93350 ECHO TTHRC R-T 2D +M-MODE COMPLETE REST&STRS	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Stress Echocardiogram.; The patient had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The patient is not experiencing new or changing cardiac symptoms.; The member has known or suspected coronary artery disease.	1

Gastroenterology	Approval	S8037 mrcp	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient does not require evaluation for a congenital defect of the pancreatic or biliary tract.; The MRCP will not be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.; "The patient is not an infant or young child, and not an adult who is debilitated or uncooperative in such a manner that ERCP is unsafe or cannot be performed."; "The patient has neither a documented allergy to iodine-based contrast materials, or a general history of allergic responses."; The patient has acute pancreatitis.; The patient had an abdominal ultrasound.; The abdominal ultrasound was not conclusive.	1
Gastroenterology	Approval	S8037 mrcp	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	6
Gastroenterology	Approval	S8037 mrcp	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/2016; There has been treatment or conservative therapy.; Quad sharp and stabbing pains radiating to her back; hid scan, ultrasound and ekg	1
Gastroenterology	Approval	S8037 mrcp	; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	3

Gastroenterology	Approval	S8037 mrcp	Abdominal pain, Diarrhea, weight loss, early satiety, cyst of pancreas; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Unknown; It is not known if there has been any treatment or conservative therapy.; Abdominal pain, Diarrhea, weight loss, early satiety	1
Gastroenterology	Approval	S8037 mrcp	Abdominal ultrasound shows prominent biliary duct and suggests MRCP is needed. C/O nausea, vomiting, abdominal pain, diarrhea.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 mrcp	annual follow up.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 mrcp	Cyst; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; June / July; There has not been any treatment or conservative therapy.; Abdominal pain	1
Gastroenterology	Approval	S8037 mrcp	dilated common bile duct found on xray, colonoscopy showed colon polyps, PIPA scan in normal range, Pt still having nausea ultrasound done 5/16 did not show dilated common bile duct at that time; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/9/2016; There has not been any treatment or conservative therapy.; abdominal pain, epigastric pain, nausea	1

Gastroenterology	Approval	S8037 mrcp	Patient complains of abdominal pain and cramping. He has nausea & vomiting. Bright red blood per rectum and melena. he also complains of fatigue. His recent white blood cell count was elevated as well as his amylase and lipase.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 mrcp	Patient complains of abdominal pain, abdominal cramping and nausea. Amylase and lipase are severely elevated. She was hospitalized in April 2016 for pancreatitis.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 mrcp	Patient needs to have an MRCP to determine the necessity of an ERCP. Patient is not known if they have a bile duct stone or dilation. Patient does have elevated bilirubin and nausea and vomiting accompanied with abdominal pain. Patient has had negative; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 mrcp	Pt has had his gallbladder removed and is still having right upper quadrant pain.; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Approval	S8037 mrcp	pt with abd pain, elevated amylase & lipase -; This study is being ordered for Inflammatory/ Infectious Disease.; Monday 7-18-2016; There has not been any treatment or conservative therapy.; abd pain, elevated amylase & elevated lipase - Pt with Hx of pancreatitis	1
Gastroenterology	Approval	S8037 mrcp	r/o dilation of pancreatic duct and bile duct; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1

Gastroenterology	Approval	S8037 mrcp	This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; It is not known if patient requires evaluation for a congenital defect of the pancreatic or biliary tract.; The MRCP will be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.	1
Gastroenterology	Approval	S8037 mrcp	This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient does not require evaluation for a congenital defect of the pancreatic or biliary tract.; The MRCP will be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.	1
Gastroenterology	Approval	S8037 mrcp	This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient requires evaluation for a congenital defect of the pancreatic or biliary tract.	1
Gastroenterology	Approval	S8037 mrcp	This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient has an altered biliary tract anatomy that precludes ERCP.	3
Gastroenterology	Approval	S8037 mrcp	This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has undergone unsuccessful ERCP and requires further evaluation.	1

Gastroenterology	Approval	S8037 mrcp		UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/24/2016; There has not been any treatment or conservative therapy.; RIGHT UPPER QUADRANT PAIN, NAUSEA, BELCHING	1
Gastroenterology	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	Headache, Nausea, weight loss; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
Gastroenterology	Disapproval	70450 CT BRAIN, HEAD	Radiology Services Denied Not Medically Necessary	Will order CT head to exclude central causes of persistent nausea; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1

Gastroenterology	Disapproval	71250 CT CHEST, THORAX	Radiology Services Denied Not Medically Necessary	see last page.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Abdominal xrays showed gas-filled colon with mildly dilated large intestine without air-fluid levels. He also had a cardiac workup including treadmill stress test and event monitor exam.; There has been treatment or conservative therapy.; Mr. Allen is here for evaluation of left-sided chest pain including slight discomfort in the left upper quadrant. He describes his pain is mostly in the left lower chest which radiates to his left arm as well. It makes him short of breath and sometimes ; Mr. Allen is here for evaluation of left-sided chest pain including slight discomfort in the left upper quadrant. He describes his pain is mostly in the left lower chest which radiates to his left arm as well. It makes him short of breath and sometimes	1
Gastroenterology	Disapproval	72196 MRI PELVIS	Radiology Services Denied Not Medically Necessary	; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1

Gastroenterology	Disapproval	72196 MRI PELVIS	Radiology Services Denied Not Medically Necessary	Lower left quadrant abdominal pain, possible diverticulitis; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Lower left quadrant abdominal pain, possible diverticulitis; It is not known if there has been any treatment or conservative therapy.; Lower left quadrant abdominal pain	1

Gastroenterology	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis; Other; pt is having abdominal pain and rectal bleeding	1
Gastroenterology	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; Suspicious Mass or Tumor	1

Gastroenterology	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.; Suspicious Mass or Tumor; Pt has abdominal pain	1
Gastroenterology	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was performed.; The results of the exam were normal.; The patient had an Ultrasound.; The Ultrasound was abnormal.; The ultrasound showed something other than Gall Stones, Kidney/Renal cyst, Aneurysm or a Pelvis Mass.	1
Gastroenterology	Disapproval	74176 CT ABD & PELVIS W/O CONTRAST	Radiology Services Denied Not Medically Necessary	unknown; This is a request for an abdomen-pelvis CT combination.; This study is being requested for abdominal and/or pelvic pain.; The study is being ordered for chronic pain.; This is not the first visit for this complaint.; There has been a physical exam.; The patient is female.; A pelvic exam was NOT performed.	1

Gastroenterology	Disapproval	74181 MRI ABDOMEN	Radiology Services Denied Not Medically Necessary	dilated common bile duct found on xray, colonoscopy showed colon polyps, PIPA scan in normal range, Pt still having nausea ultrasound done 5/16 did not show dilated common bile duct at that time; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/9/2016; There has not been any treatment or conservative therapy.; abdominal pain, epigastric pain, nausea	1
Gastroenterology	Disapproval	74181 MRI ABDOMEN	Radiology Services Denied Not Medically Necessary	GERD, change in bowel habits; This study is being ordered for Inflammatory/ Infectious Disease.; 7/2016; It is not known if there has been any treatment or conservative therapy.; Severe Abdominal pain, upper left abdominal pain, weight loss, N&V, family history of pancreatitis	1
Gastroenterology	Disapproval	74181 MRI ABDOMEN	Radiology Services Denied Not Medically Necessary	Lower left quadrant abdominal pain, possible diverticulitis; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Lower left quadrant abdominal pain, possible diverticulitis; It is not known if there has been any treatment or conservative therapy.; Lower left quadrant abdominal pain	1
Gastroenterology	Disapproval	74181 MRI ABDOMEN	Radiology Services Denied Not Medically Necessary	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; follow up of liver lesions	1

Gastroenterology	Disapproval	74181 MRI ABDOMEN	Radiology Services Denied Not Medically Necessary	UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/24/2016; There has not been any treatment or conservative therapy.; RIGHT UPPER QUADRANT PAIN, NAUSEA, BELCHING	1
Gastroenterology	Disapproval	74261 CT Colonography, diagnostic without contrast	Radiology Services Denied Not Medically Necessary	ascending colitis, lesion in colon; This patient has a medical problem that makes him/her unsuitable for conventional colonoscopy.; The member had colon screening studies completed prior to this request.	1
Gastroenterology	Disapproval	74261 CT Colonography, diagnostic without contrast	Radiology Services Denied Not Medically Necessary	This patient does not have a medical problem that makes him/ her unsuitable for conventional colonoscopy.; This patient has not undergone an attempted but incomplete conventional colonoscopy.; This patient does not have a known obstructing colorectal cancer.; The member had colon screening studies completed prior to this request.	1
Gastroenterology	Disapproval	74263 CT Colonography, screening	Radiology Services Denied Not Medically Necessary	This is a request for CT Colonoscopy for screening purposes only.	1
Gastroenterology	Disapproval	75571 Coronary Artery Calcium Score, EBCT	Radiology Services Denied Not Medically Necessary	Patient is currently being evaluated for a liver transplant.; This is a request for a CT scan for evaluation of coronary calcification.	1
Gastroenterology	Disapproval	75571 Coronary Artery Calcium Score, EBCT	Radiology Services Denied Not Medically Necessary	Patient is currently being evaluated for possible listing for a liver transplant.; This is a request for a CT scan for evaluation of coronary calcification.	1
Gastroenterology	Disapproval	75571 Coronary Artery Calcium Score, EBCT	Radiology Services Denied Not Medically Necessary	Patient is currently being evaluated for possible listing for a liver transplant; This is a request for a CT scan for evaluation of coronary calcification.	1

Gastroenterology	Disapproval	78813 PET IMAGING WHOLE BODY	Radiology Services Denied Not Medically Necessary	This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.	1
Gastroenterology	Disapproval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	Radiology Services Denied Not Medically Necessary	This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for Brain Cancer/Tumor or Mass.; This is NOT being ordered to distinguish tumor(s) from treatment related tissue necrosis.	1
Gastroenterology	Disapproval	S8037 mrcp	Radiology Services Denied Not Medically Necessary	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Disapproval	S8037 mrcp	Radiology Services Denied Not Medically Necessary	; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	2
Gastroenterology	Disapproval	S8037 mrcp	Radiology Services Denied Not Medically Necessary	Elevated amylase lipase; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Disapproval	S8037 mrcp	Radiology Services Denied Not Medically Necessary	GERD, change in bowel habits; This study is being ordered for Inflammatory/ Infectious Disease.; 7/2016; It is not known if there has been any treatment or conservative therapy.; Severe Abdominal pain, upper left abdominal pain, weight loss, N&V, family history of pancreatitis	1

Gastroenterology	Disapproval	S8037 mrcp	Radiology Services Denied Not Medically Necessary	Lab on 7/25/16; WBC 15.0; Hemoglobin 9.4; Hematocrit 26.4; Total Bilirubin 36.2; Direct Bilirubin 28.03; AST 235; ALT 132; PT 19.5; PTT 55; INR 1.7; Ferritin 17666; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Disapproval	S8037 mrcp	Radiology Services Denied Not Medically Necessary	None; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
Gastroenterology	Disapproval	S8037 mrcp	Radiology Services Denied Not Medically Necessary	R/o pancreatitis; This study is being ordered for Inflammatory/ Infectious Disease.; 07/21/2016; There has been treatment or conservative therapy.; nausea with vomiting, abdominal pain; Diet modification	1
General/Family Practice	Approval	70336 MRI TEMPROMANDIBULAR JOINT, TMJ, JAW JOINT		This is a request for a temporomandibular joint MRI.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD			5
General/Family Practice	Approval	70450 CT BRAIN, HEAD		< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.	2

General/Family Practice	Approval	70450 CT BRAIN, HEAD	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The headache is not described as a "thunderclap" or the worst headache of the patient's life.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; The patient is able to have a Brain MRI for evaluation of these symptoms.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	3

General/Family Practice	Approval	70450 CT BRAIN, HEAD	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	2
General/Family Practice	Approval	70450 CT BRAIN, HEAD	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Abnormalities of the eye; Imaging is needed and availability of MRI would delay treatment is the reason an MRI is not being considered	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications	5
General/Family Practice	Approval	70450 CT BRAIN, HEAD	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Vertigo; Foreign metallic bodies such as metallic splinters, metallic bullets/buckshot is the reason an MRI is not being considered	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Vertigo; It is unknown why an MRI is not being considered	1

General/Family Practice	Approval	70450 CT BRAIN, HEAD	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; Imaging is needed and availability of MRI would delay treatment is the reason an MRI is not being considered	2
General/Family Practice	Approval	70450 CT BRAIN, HEAD	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; It is unknown why an MRI is not being considered	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; July 11th; There has been treatment or conservative therapy.; swelling , neck and jaw also lips and gum; injection	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	; This is a request for a brain/head CT.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1

General/Family Practice	Approval	70450 CT BRAIN, HEAD	; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	3
General/Family Practice	Approval	70450 CT BRAIN, HEAD	; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Syncope/Fainting; It is unknown why an MRI is not being considered	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; It is unknown why an MRI is not being considered	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	; This study is being ordered for a neurological disorder.; Unkown; There has been treatment or conservative therapy.; low back pain with radiculopathy, headaches, meningioma on the frontal lobe.; Injections in low back and a neuro-stimulator in back.	1

General/Family Practice	Approval	70450 CT BRAIN, HEAD	; This study is being ordered for trauma or injury.; 08/17/2016 PATIENT WAS REAR ENDED WITH AIR BAGS DEPLOYED.; There has not been any treatment or conservative therapy.; BLURRY VISION, HEADACHE, PRESSURE IN HEAD AND SEVERE NECK PAIN. PATIENT CAN'T SEE OUT OF LEFT EYE.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	chronic headaches, with sharp pain on right side, memory loss; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Dementia memory loss; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Dementia/ Cognitive Impairment; It is unknown why an MRI is not being considered	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Due to motor vehicle accident; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1

General/Family Practice	Approval	70450 CT BRAIN, HEAD	Earache  The patient states the earache is in the left ear. The problem is with no change. Associated symptoms include fullness in ears, mastoid bone tenderness and headache.Worst headache of her Life on Sunday,some better.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Extreme headaches, vertigo, vision being altered.; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; Severe Claustrophobia is the reason an MRI is not being considered	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	facial weakness; drooping on rt side of face x3mos; hypertension; obese; long term smoker; r/o tumor or lesion in the brain; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	fatigue , muscle weakness; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications	1

General/Family Practice	Approval	70450 CT BRAIN, HEAD	For last month he has had worsening vision in left eye described as blurry, tingling and in left arm, and paresthesias in BLE; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; Metallic implants such as Pacemakers, ICD (cardioverter/defibrillator), vascular clips, prosthesis or joint replacement is the reason why an MRI is not being considered	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Further evaluation for seizures; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; This study is being ordered for new onset of seizures or newly identified change in seizure activity or pattern.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	has a thunderclap headache, worst headache of his life.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Head trauma, initial encounter  fight 6 wks ago and now having anxiety and reports having difficulty with memory and had loc at the time of the incident. Happened at a party -etoh involved. Tachycardia - will have holter monitor 24hr-48hr; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.	1

General/Family Practice	Approval	70450 CT BRAIN, HEAD	Headache not improved with pain medication. Pain on right side of head/face.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	hypertension , headaches; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	MEM HAS CANCER AND THE DR THINKS IT MAY HAVE SOMETHING TO DO WITH THE CANCER; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Mental Status change with worsening symptoms of memory loss; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; It is unknown why an MRI is not being considered	1

General/Family Practice	Approval	70450 CT BRAIN, HEAD	Ms. MOBBS presents with a diagnosis of headache. This was diagnosed 8/15/16 PM. The course has been stable and nonprogressive. It is of moderate intensity. She estimates that the frequency of symptoms is several times daily. There are no obvious aggr; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	none; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	none; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Dementia/ Cognitive Impairment; Metallic implants such as Pacemakers, ICD (cardioverter/defibrillator), vascular clips, prosthesis or joint replacement is the reason why an MRI is not being considered	1

General/Family Practice	Approval	70450 CT BRAIN, HEAD	<p>On 7/16/16 patient was driving a boat. He crashed the boat into a tree. Passenger told patient that he hit his head. Patient c/o lightheadedness, nausea, and headaches. Patient informed MD that these symptoms have since resolved. MD ordering imaging to ru; This is a request for a brain/head CT.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.</p>	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	<p>passing out x2 within a few days with cold sweats and tunnel vision at work today. Pt stated after she passed out shes had headache and pressure on the back of her neck.; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for trauma or injury.</p>	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	<p>Patien was involved in an MVA 3 days ago. She did not go to hospital to be checked out. She is now having headache, unsteady gait, nausea and vomiting and eyes sensitive to light.; This is a request for a brain/head CT.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.</p>	1

General/Family Practice	Approval	70450 CT BRAIN, HEAD	Patient complains of dizziness that has been going on for a long time but is getting worse lately. patient states she had an episode of syncope one week ago. Patient states she feels weak at times and has episodes of presyncope. She denies vertigo.; This is a request for a brain/head CT.; This study is being requested for None of the above.; This procedure is being requested for Syncope/Fainting; It is unknown why an MRI is not being considered	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Patient has a history of epilepsy; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Patient has a reoccurring chronic sinus headache.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Patient has daily headaches that are described as stabbing with a sudden onset. They are generally in the temple area on either side.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1

General/Family Practice	Approval	70450 CT BRAIN, HEAD	Patient has had bell's palsy in the past and is now experiencing facial pain along with mouth tightness.; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Patient has had headache for three days with vomiting tinged with blood. Blood pressure going up and down along with headache.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Patient has had several episodes of blacking out and states that she usually has a feeling that it may happen but the last time she had no warning.; This is a request for a brain/head CT.; This study is requested for a new onset of seizures or newly identified change in seizure activity or pattern.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Patient has headache that is sudden in onset and decibes as the worst headache that she has had.; This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1

General/Family Practice	Approval	70450 CT BRAIN, HEAD	patient is having bilateral blurring vision along with chronic tension type headaches.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Patient is having migraine headaches. Patient was hit in the head with a bat on December of 2015. The migraine headaches are not being relieved with over the counter medicines. Dr. Young wants to do a CT of the brain to make sure there is nothing wrong si; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Patient is having panic attacks, depression and possible schizophrenia.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Patient is having recurring headaches along with episodes of syncope.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1

General/Family Practice	Approval	70450 CT BRAIN, HEAD	patient is here for appt. she fell 3 weeks ago slipped on the floor. she hit her head on the floor, back right side of head. she did not go to the ER. she has had constant pain in right side of head and right side of neck. she has had some headaches since; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The headache is not described as a "thunderclap" or the worst headache of the patient's life.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Patient needs to see a Neurologist for his seizures and follow up for the shunt. Neurologist will not see the patient without the CT scan. Patient can not have an MRI because there is not a specialist in the facility to reprogram the shunt.; This is a request for a brain/head CT.; This study is requested for a new onset of seizures or newly identified change in seizure activity or pattern.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Patient was seen in ER for symptoms on 7/20/16.; This study is being ordered for a neurological disorder.; 7/20/2016; There has not been any treatment or conservative therapy.; loss of consciousness, nausea, vomiting, sweats.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	photophobia, weakness, tingling in hands,; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1

General/Family Practice	Approval	70450 CT BRAIN, HEAD	pt c/o of altered speech, mental status change, weakness, and fatigue.; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Pt has mass on forehead that has grown in size.; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	PT HAS NUMBNESS LEFT SIDE AND TREMORS IN BOTH HANDS. CONFUSION,DYSPHASIA,MEMORY LOSS; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Syncope/Fainting; There is another reason why an MRI is not being considered; CT SCAN WOULD BE BETTER FOR EVALUATING THIS PT FOR TREMORS, SYNCOPE, CONFUSION AND POSSIBLY PARKINSONS	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Pt is c/o dizziness, nausea, tingling and numbness in hand and feet and Pt had a head injury on 9/3/16.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The headache is not described as a "thunderclap" or the worst headache of the patient's life.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.	1

General/Family Practice	Approval	70450 CT BRAIN, HEAD	Pt is experiencing vision loss of both eyes, vertigo for several days, nausea; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; This study is being ordered for something other than trauma or injury, evaluation of known tumor, stroke or aneurysm, infection or inflammation, multiple sclerosis or seizures.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Pt presenting with worse headache she's ever had lasting for the past five days.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Pt. c/o of pain in across front part of head.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Pt. fell; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Pt. has worsening left frontal lobe pain, with blurred vision, dizziness, n, v and vision loss.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1

General/Family Practice	Approval	70450 CT BRAIN, HEAD	r/o bleed; This is a request for a brain/head CT.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.; This study is being requested for a headache.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Reason for Study: Has been having confusion for several weeks after her gallbladder surgery. Has had behavior changes like jumping out of her wheelchair and caught herself. Having hallucinations. Having delusions. Seeing things that aren't there. ; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for Dementia/ Cognitive Impairment; There is another reason why an MRI is not being considered; HER OTHER INSURANCE WOULD PREAUTH FOR A 70450)CT HEAD W/O, NOT MRI AT THIS TIME.IT IS ALREADY PREAUTHED WITH #	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Right sided tremors and too young to develop something like this.; This is a request for a brain/head CT.; Thi study is being requested for None of the above.; This procedure is being requested for other indications	1

General/Family Practice	Approval	70450 CT BRAIN, HEAD	<p>Rule out another unknown condition that may not have shown up on last xray and MRI.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Intermittent left sided headaches since the first of the year. &#x0D; Swollen glands in left side of neck for the past couple of months. &#x0D; Headaches worsening in the last month or two.; There has been treatment or conservative therapy.; Worsening headache, Intermittent left sided headaches since the first of the year. &#x0D; Swollen glands in left side of neck for the past couple of months.Nausea and ear pain.; Gabapentin, Excedrin Migrain, Augmentin, Prednisone, Hydrocodone, Meloxicam, Norco.&#x0D; &#x0D; Xray Sinus on 08/21/16- Impression- no air fluid levels, no opacity, possibly mild cloudiness of left maxillary sinus, very subtle.&#x0D; &#x0D; MRI Brain 09/12/15-Impression- A</p>	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	<p>Sedimentation rate is 95, Normal is 0-32.; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.</p>	1

General/Family Practice	Approval	70450 CT BRAIN, HEAD	she states that she has been shaking a lot recently and she thinks that she has been having seizures. Her mother states that she was floppin around on the floor and wasn't aware of anything. she hasn't had any seizures in the past, but all of her family ; This is a request for a brain/head CT.; This study is requested for a new onset of seizures or newly identified change in seizure activity or pattern.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Sudden onset of dizziness with near syncope. Change in gait.; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; Imaging is needed and availability of MRI would delay treatment is the reason an MRI is not being considered	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Suspecting head injury and facial fracture; This study is being ordered for trauma or injury.; 09/05/2016; There has been treatment or conservative therapy.; headache. confusion. blurred vision. multiple facial bruising.; Insaid since injury.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a recent head trauma or injury.	41
General/Family Practice	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; The headache is described as a "thunderclap" or the worst headache of the patient's life.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.	1

General/Family Practice	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for a previous stroke or aneurysm.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient does NOT have a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for neurological deficits.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for neurological deficits.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; The patient has the inability to speak.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or aneurysm.; This study is being ordered for a previous stroke or aneurysm.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; This study is being ordered for infection or inflammation.	1

General/Family Practice	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; There is a suspected or known brain tumor.; This study is being requested for known or suspected brain tumor, mass or cancer.	9
General/Family Practice	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	195
General/Family Practice	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	13
General/Family Practice	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; There is not headache not improved by pain medications.; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; "There are recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.; This study is being requested for a headache.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; This study is being requested for a history of stroke, (CVA) known or follow-up.	5

General/Family Practice	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; This study is being requested for Hydrocephalus or congenital abnormality.	4
General/Family Practice	Approval	70450 CT BRAIN, HEAD	This is a request for a brain/head CT.; This study is requested for known or suspected bleed such as subdural hematoma or subarachnoid bleed.	15
General/Family Practice	Approval	70450 CT BRAIN, HEAD	unknown; This is a request for a brain/head CT.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	unknown; This is a request for a brain/head CT.; The study is NOT being requested for evaluation of a headache.; This study is being ordered for new onset of seizures or newly identified change in seizure activity or pattern.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Unknown; This is a request for a brain/head CT.; There is not headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	unknown; This study is being ordered for trauma or injury.; 7/10/16; There has not been any treatment or conservative therapy.; Pt has facial swelling and bruising, loss of consciousness w/ accident. Swelling around eyes unable to see out of them	1

General/Family Practice	Approval	70450 CT BRAIN, HEAD	We need to assess this pt for possibility of TIAs or post-op encephalopathy.; This is a request for a brain/head CT.; This study is being requested for Suspicion of a TIA (Transient Ischemic Attack).; There is another reason why an MRI is not being considered; We have been unable to get MRI approved through your system and do not wish to delay our patient's care any longer.	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	worsening of symptoms since onset of injury - patient hit back of head on concrete floor; This study is being ordered for trauma or injury.; 9/5/16; There has not been any treatment or conservative therapy.; Patient c/o HA, N/V, blurred vision, and neck pain and soreness and tightness of left scapular area	1
General/Family Practice	Approval	70450 CT BRAIN, HEAD	Worst headache of life that has not improved. No previous history of headache.; This is a request for a brain/head CT.; There is headache not improved by pain medications.; "There are no recent neurological symptoms or deficits such as one-sided weakness, vision defects, speech impairments or sudden onset of severe dizziness."; This study is being requested for a headache.	1
General/Family Practice	Approval	70480 CT ORBIT,EYE SOCKET, SELLA TURCICA, POSTERIOR FOSSA,EAR ETC.	"This request is for orbit,sella, int. auditory canal,temporal bone, mastoid, CT.239.8"; "There is not suspicion of bone infection, cholesteoma, or inflammatory disease.ostct"; "There is a history of serious head or skull, trauma or injury.ostct"	1

NO CONTRAST	The knot is painful and it has grown in size; This is a request for neck soft tissue CT.; The patient has a neck lump or mass.; There is a palpable neck mass or lump.; The neck mass is larger than 1 cm.; A fine needle aspirate was NOT done.	1
General/Family Practice	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; It is unknown if there has been recent trauma or other injury to the neck.; It is unknown if there is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; It is unknown if there is a suspicion of an infection or abscess.; It is unknown if this is being ordered by an ENT specialist.	2
General/Family Practice	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; It is unknown if there has been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.	1
General/Family Practice	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has been recent trauma or other injury to the neck.	4
General/Family Practice	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; It is unknown if there is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; It is unknown if there is a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.	1
General/Family Practice	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; It is unknown if there is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is a suspicion of an infection or abscess.	1

General/Family Practice	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; It is unknown if there is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.	1
General/Family Practice	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is a suspicion of an infection or abscess.	4
General/Family Practice	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is no suspicion of or known tumor, metastasis, lymphadenopathy, or mass.; There is not a suspicion of an infection or abscess.; This is not being ordered by an ENT specialist.	2
General/Family Practice	Approval	70490 CT NECK SOFT TISSUES,LARNYX,THYROID ETC. NO CONTRAST	This is a request for neck soft tissue CT.; There has not been recent trauma or other injury to the neck.; There is suspicion of or known tumor, metastasis, lymphadenopathy, or mass.	77
General/Family Practice	Approval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST	; This study is being ordered for Vascular Disease.; ; There has been treatment or conservative therapy.; ;	1
General/Family Practice	Approval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCONTRAST	monitoring of intracranial aneurysm noted previously on MRA brain w/o contrast; This study is being ordered for Vascular Disease.; unknown; There has been treatment or conservative therapy.; headaches; intracranial aneurysm monitored by serial images MRA brain w/o contrast	1

General/Family Practice	Approval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCON TRAST	Patient is have distorted hearing due to this issue also and tinnitus.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; patient is having severe pulsatile tinnitus; There has been treatment or conservative therapy.; Severe Right ear pain for 4 days; omeprazole and meloxicam	1
General/Family Practice	Approval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCON TRAST	unknown; This study is being ordered for Vascular Disease.; Severe Carotid Stenosis; It is not known if there has been any treatment or conservative therapy.; Acute TIA on 06-29-2016 weight loss	1
General/Family Practice	Approval	70496 CT ANGIOGRAPHY HEAD W/CONTRAST/NONCON TRAST	Yes, this is a request for CT Angiography of the brain.	6
General/Family Practice	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCON TRAST	; This study is being ordered for Vascular Disease.; ; There has been treatment or conservative therapy.;	1
General/Family Practice	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCON TRAST	monitoring of intracranial aneurysm noted previously on MRA brain w/o contrast; This study is being ordered for Vascular Disease.; unknown; There has been treatment or conservative therapy.; headaches; intracranial aneurysm monitored by serial images MRA brain w/o contrast	1

General/Family Practice	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCON TRAST	Patient is have distorted hearing due to this issue also and tinnitus.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; patient is having severe pulsatile tinnitus; There has been treatment or conservative therapy.; Severe Right ear pain for 4 days; omeprazole and meloxicam	1
General/Family Practice	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCON TRAST	re-evaluate known basilar and carotid artery stenosis-pt was recently seen in PCP's office-per PCP's office pt has same symptoms as in March, 2016; -dizziness; -memory loss; -weakness; This study is being ordered for Vascular Disease.; pt was seen in our office first on 3/9/2016; There has been treatment or conservative therapy.; unknown at this time, pt was last seen in our office on 4/20/2016; pt is on dual antiplatelet therapy asa and plavix for known basilar and carotid stenosis	1
General/Family Practice	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCON TRAST	unknown; This study is being ordered for Vascular Disease.; Severe Carotid Stenosis; It is not known if there has been any treatment or conservative therapy.; Acute TIA on 06-29-2016; weight loss	1
General/Family Practice	Approval	70498 CT ANGIOGRAPHY NECK W/CONTRAST/NONCON TRAST	Yes, this is a request for CT Angiography of the Neck.	8
General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE		1
General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for suspicion of neoplasm, tumor or metatstasis	3

General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for the evaluation of lymphadenopathy or mass	2
General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	"This is a request for orbit,face, or neck soft tissue MRI.239.8"; The study is ordered for trauma or injury of the orbit, face or neck soft tissue	2
General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2/2016; There has not been any treatment or conservative therapy.; Vision changes, vision just goes out, with no report of pain when it happens.	1
General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7/11/2016; There has been treatment or conservative therapy.; Swelling on the right neck tingling down the right arm dizzy submandibular tingling down the right arm and neck area; Medications injection	1
General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	6cm mass that extends to left shoulder , been there for over a month and is not painful to touch; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1

General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	dr thakor has ordered MRI of brain and orbits with urgency and would like procedures done asap; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; onset was 3 weeks ago; There has been treatment or conservative therapy.; headache, left sided visual loss; pt seen Dr. Connie Smith, ophthalmologist, who advised that pt have an MRI of brain for further evaluation	1
General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	Numbness in bilateral arms, nerve conduction study done and shows mild to moderate bilateral ulnar neuropathies at the level of the elbow, but does not explain numbness; "This is a request for orbit,face, or neck soft tissue MRI.239.8"; The reason for the study is not for trauma, infection,cancer, mass, tumor, pre or post-operative evaluation	1

General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	Pt c/o 5 months pain behind left eye. Pain comes and goes without any known exacerbating or alleviating factors. Pain is sharp and severe sometimes radiating into ipsilateral neck. Episodes occur several times/day each lasting 5-10 minutes; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/20/16 office visit; There has not been any treatment or conservative therapy.; Pt c/o 5 months pain behind left eye. Pain comes and goes without any known exacerbating or alleviating factors. Pain is sharp and severe sometimes radiating into ipsilateral neck. Episodes occur several times/day each lasting 5-10 minutes	1
General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	SEE UPLOADED CLINIC NOTES; This study is being ordered for trauma or injury.; AUGUST 8 2016; It is not known if there has been any treatment or conservative therapy.; BLURRED VISION, CONFUSION, DIZZINESS, HEADACHE, TROUBLE WITH SPEECH AND THOUGHT PROCESS	1
General/Family Practice	Approval	70540 MRI ORBIT/FACE/NECK W/O DYE	This is a request for a sinus MRI.; This study is not being ordered in conjunction with a head or brain CT or MRI.; "There is not evidence of tumor from a physical exam, plain sinus film, or previous CT or MRI study."; This patient has been treated with medications for at least four weeks with no improvement.	2

General/Family Practice	Approval	70544 Mr angiography head w/o dye	<p>All previous test have not been conclusive to her symptoms. And with strong family history, Dr. Maxwell has order these test for cautionary measures.; This study is being ordered for Vascular Disease.; May 2016 for the headaches. August 2016 is when syncope appeared.; There has been treatment or conservative therapy.; Syncope, daily headaches that were persistent before surgery and are still present and vertigo. Family history of intracranial aneurysms that have been present on her mother's side with most females presenting this resulting in death.; June 2016 surgery for herniated cervical discs. Tramadol for pain. Over the past couple of weeks patient has had Labs, Angiogram, Echo, CTA of Carotid and EKG.</p>	1
General/Family Practice	Approval	70544 Mr angiography head w/o dye	<p>Doctor at hospital said CT done at hospital suggest an aneurysm and an MRI , MRA is needed.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient was coming in for a follow up visit from the ER on 8/24/2016. March the 30th patient states that noise bothers her. Initial onset was on March 30th 2016; There has been treatment or conservative therapy.; Patient has headache and slurred speech. patient has low normal blood, left face numbness, weaknes, slurring, trouble calling words, neck is tight, migraine headaches that are worst when laying down and better when sitting up.; Patient started new medication.</p>	1

General/Family Practice	Approval	70544 Mr angiography head w/o dye	Other testing inconclusive; Patient had episode of disorientation/slurred speech. Blurry/double vision for the past week, occipital headache, pressure-like, radiated to right side, worsened by photophobia, history of seizures.; This study is being ordered for a neurological disorder.; Headaches, blurry/double vision for the last week with pinpoint pupils on 09/25/16. Patient reports slurred speech and disorientation upon waking on 09/25/16. Patient has a history of migraine headaches back/neck pain. Last MRI of the brain-Impression: A ; It is not known if there has been any treatment or conservative therapy.; headache and neurological sx's of diplopia and slurred speech	1
General/Family Practice	Approval	70544 Mr angiography head w/o dye	Patient was seen in ER for symptoms on 7/20/16.; This study is being ordered for a neurological disorder.; 7/20/2016; There has not been any treatment or conservative therapy.; loss of consciousness, nausea, vomiting, sweats.	1
General/Family Practice	Approval	70544 Mr angiography head w/o dye	signs of slurring speech; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8-8-2016; There has not been any treatment or conservative therapy.; headache sudden onset, r side, nausea, gait instability	1
General/Family Practice	Approval	70544 Mr angiography head w/o dye	There is an immediate family history of aneurysm.; This is a request for a Brain MRA.	5

General/Family Practice	Approval	70544 Mr angiography head w/o dye	There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.	1
General/Family Practice	Approval	70544 Mr angiography head w/o dye	There is not an immediate family history of aneurysm.; The patient does not have a known aneurysm.; The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; This is a request for a Brain MRA.	3
General/Family Practice	Approval	70544 Mr angiography head w/o dye	There is not an immediate family history of aneurysm.; The patient has a known aneurysm.; This is a request for a Brain MRA.	1
General/Family Practice	Approval	70544 Mr angiography head w/o dye	This is a request for a head and neck MR Angiogram.; There is an immediate family history of aneurysm.	1
General/Family Practice	Approval	70544 Mr angiography head w/o dye	UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/17/2016; There has not been any treatment or conservative therapy.; SEIZURES AND SYNCOPE	1
General/Family Practice	Approval	70544 Mr angiography head w/o dye	Unknown; This study is being ordered for trauma or injury.; 09/21/2016; There has been treatment or conservative therapy.; Primary symptoms headache, back and neck pain; Date of injury 9/21/2016 seen in NEA Baptist Hosp., and had CT Abdomen/pelvis (normal), CT Cervical Spine (normal), and CT Head (normal). Then went to PCP on 9/23/2016 and had x-ray of left knee.	1

General/Family Practice	Approval	70547 Mr angiography neck w/o dye	The patient has had a recent MRI or CT for these symptoms.; This is a request for a Neck MR Angiography.	1
General/Family Practice	Approval	70547 Mr angiography neck w/o dye	The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness."; This is a request for a Neck MR Angiography.	1
General/Family Practice	Approval	70547 Mr angiography neck w/o dye	The patient has not had a recent MRI or CT for these symptoms.; There has not been a stroke or TIA within the past two weeks.; "There is not a sudden onset of one-sided weakness, speech impairment, vision defects or severe dizziness."; This is a request for a Neck MR Angiography.; The patient has had an abnormal ultrasound of the neck.	1
General/Family Practice	Approval	70547 Mr angiography neck w/o dye	This is a request for a head and neck MR Angiogram.; There is an immediate family history of aneurysm.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST		1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	"debilitating" migraines, has been having at least 2-3 severe migraines weekly but usually will have at least a mild migraine daily, frequent or severe headaches; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; It is not known if a metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	2

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	3
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if the headache is described as a “thunderclap” or the worst headache of the patient’s life.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if there is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; It is not known if there is a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	5

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were normal; The patient is experiencing vertigo	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; It is not known if the patient has undergone treatment for multiple sclerosis.; It is not known if there are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.	2
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; ;	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; UNKNOWN; There has not been any treatment or conservative therapy.; PARESTHESIA, RIGHT UPPER AND LEFT UPPER, TREMOR, COGNITIVE DELAY	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; This migraine started 2 weeks ago; There has not been any treatment or conservative therapy.; migraine onset 2 weeks ago, pain is diffuse with no specific location, characterizes it as severe, associated symptoms include vomiting, worsening HA more now than ever before	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; 9-8-2016; There has been treatment or conservative therapy.;	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	4/30/2015 non-contrasted head CT shows enlargement of left lateral ventricle and empty sella configuration; 5/26/2015 MRI brain with contrast shows focal area of T2/FLAIR hyperintensity in the occipital horn of right lateral ventricle likely related to ch; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	52 year old male presents with 2 month history of sudden loss of smell and taste sensation.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are not new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; The trauma or injury to the head occurred more than 1 week ago.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	All previous test have not been conclusive to her symptoms. And with strong family history, Dr. Maxwell has order these test for cautionary measures.; This study is being ordered for Vascular Disease.; May 2016 for the headaches. August 2016 is when syncope appeared.; There has been treatment or conservative therapy.; Syncope, daily headaches that were persistent before surgery and are still present and vertigo. Family history of intracranial aneurysms that have been present on her mother's side with most females presenting this resulting in death.; June 2016 surgery for herniated cervical discs. Tramadol for pain. Over the past couple of weeks patient has had Labs, Angiogram, Echo, CTA of Carotid and EKG.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	also having syncope episodes while driving.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a sudden and severe headache.; The patient has NOT had a recent onset (within the last 3 months) of neurologic symptoms.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Blurred vision, dizziness, nausea and phonophobia, headache described as worst headache of her life; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Chronic migraines S/P shunt; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	closed head injury on 5/9/2016. Chronic frontal headache, sleep disturbances; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are not new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; The trauma or injury to the head occurred more than 1 week ago.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	decreased hearing; seizures; This study is being ordered for a neurological disorder.; 01/15/2016; There has not been any treatment or conservative therapy.; hep c; hypertension; neuropathy	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	<p>Doctor at hospital said CT done at hospital suggest an aneurysm and an MRI , MRA is needed.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient was coming in for a follow up visit from the ER on 8/24/2016. March the 30th patient states that noise bothers her. Initial onset was on March 30th 2016; There has been treatment or conservative therapy.; Patient has headache and slurred speech. patient has low normal blood, left face numbness, weaknes, slurring, trouble calling words, neck is tight, migraine headaches that are worst when laying down and better when sitting up.; Patient started new medication.</p>	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	<p>dr thakor has ordered MRI of brain and orbits with urgency and would like procedures done asap; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; onset was 3 weeks ago; There has been treatment or conservative therapy.; headache, left sided visual loss; pt seen Dr. Connie Smith, ophthalmologist, who advised that pt have an MRI of brain for further evaluation</p>	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Duration of Symptoms: Start: 08/08/2006   Physical Exam Findings: recurrent headaches for 10 years that are worsening in nature pt has blurred vision, dizziness, phonophobia, photophobia, nausea, vomiting and visual auras, no known triggers, recurring w; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	establish cause of neurological sx; This study is being ordered for a neurological disorder.; 2014; There has been treatment or conservative therapy.; head tremor; pain; numbness and tingling of upper extremities and h/a; PT; steroid treatment and pain meds	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	frequency of headaches has been increasing; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	fungating lesion at site of remote gamma knife surgery right posterior occiput.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; It is not known if the tumor is a pituitary tumor or pituitary adenoma.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	h/a 3x per wk; nausea and vomiting during the episodes; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Head injury with concussion with loss of consciousness of unspecified duration. Acute post-traumatic headache without intractable headache. Patient is having difficulty concentrating and remembering things. Unspecified Dementia with behavioral disturbance; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; It is not known if there are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; The trauma or injury to the head occurred more than 1 week ago.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	headache for 2 months, lost 6 pounds, made worse by movement, sinus x-ray was negative; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Headache: Patient reports he's had a daily headache for at least the last 10 years. Patient reports he often wakes with headache, goes to bed with a headache. He reports that his headache started more than 10 years. Increasing in frequency and severity.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Headache: Patient reports that she has chronic persistent headache for the last 4 days. The pain is behind the eyes bilaterally the occiput. She's been on Tylenol and ibuprofen without improvement. She went to the ED and was she day headache cocktail whic; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a sudden and severe headache.; The patient has NOT had a recent onset (within the last 3 months) of neurologic symptoms.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Headaches; worsening in frequency and severity; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Lab test results came back high twice. Headaches are more severe within this past week. Lab is "very abnormal"; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if the headache is described as a "thunderclap" or the worst headache of the patient's life.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	lactation without a child.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	MEMORY LOSS; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The results of the lab tests are unknown.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	MORE FREQUENT HEADAHCES, LASTING LONGER, NO RELIEF FROM OTC MEDICATIONS.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Motor strength decreased. Headaches as well. MD wants to r/o ischemic/CAD. A lot of neurological symptoms going on.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/24/2016; There has been treatment or conservative therapy.; Pt experiencing lower extremity weakness, Weakness BILAT, nausea and numbness and tingling in neck. Unsteady gain, unable to ambulate. Difficulty putting her thoughts together. Having trouble lifting her legs and she faints. EKG show tachycardia; She has been to 3 different ER's Labs, fluids. Pain meds.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	MRI of brain need to evaluate post stroke condition. Had CVA 3/2/16 MRI revealed small infarct right thalamus. He had trouble speaking and moving left side at first but that has resolved. He has started having headaches behind his eyes almost every nigh; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	MRI of the c spine without contrast dated 07/12/2016 shows hyperintense signal within the cord at C3 and questionably at C4. Possibility of demyelinating process is raised.; This study is being ordered for a neurological disorder.; 6 months without relief from steroids, PT and anti-inflammatory meds; There has been treatment or conservative therapy.; weakness in upper extremities; NSAIDS	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Mrs. Ashley presents in follow up from ER. She was seen in the ER on 7/13/16. She was diagnosed with seizures. The patient has been taking: the following prescriptions: Ativan. Associated symptoms include feels weird and drowsy from ativan. Patient st; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; It is not known if there has been a previous Brain MRI completed.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Mrs. Trevino has numbness on the left side of her body mainly from the head down the neck. Also she has become dizzy.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing dizziness.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	none given; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is not described as a "thunderclap" or the worst headache of the patient's life.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	none given; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	None.; This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	none; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; It is unknown if the patient has HIV or cancer.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	None; This study is being ordered for a neurological disorder.; 12/2/2015; There has been treatment or conservative therapy.; Pt has occasional loss of vision., painful and swollen joints, difficulty swallowing. Pt has numbness in hands and feet, nausea, shortness of breath.; Pt tried PT. medication therapy	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	none; This study is being ordered for a neurological disorder.; x 7 years; There has been treatment or conservative therapy.; Headaches which are severe, Stiffness in base of neck, weakness and tingling in arms, Syncope.; MEDS!!	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	numbness of upper limbs, history of chronic migraines. Fell like disoriented. Dizziness while driving which lasted 30 minutes. Last episode was a few months ago while walking.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; It is unknown why this study is being ordered.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Numbness on left side Dizziness; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has vision changes.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	one week ago patient fell due to vertigo. pt unsure if she passed out. vertigo is worsening. problems with skin. rosacea vs. lupus; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has dizziness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Other testing inconclusive; Patient had episode of disorientation/slurred speech. Blurry/double vision for the past week, occipital headache, pressure-like, radiated to right side, worsened by photophobia, history of seizures.; This study is being ordered for a neurological disorder.; Headaches, blurry/double vision for the last week with pinpoint pupils on 09/25/16. Patient reports slurred speech and disorientation upon waking on 09/25/16. Patient has a history of migraine headaches back/neck pain. Last MRI of the brain-Impression: A ; It is not known if there has been any treatment or conservative therapy.; headache and neurological sx's of diplopia and slurred speech	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Patient also here with worsening headaches, from the neck forward to his forehead. He states he has light sensitivity and noise sensitivity, and he has to lay in bed and put a cold towel over his head until his headache subsides. The headaches are worseni; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Patient complains of headache. Onset was one month ago. The pain is diffuse with no specific location. Ms. Watson denies having significant prior headaches. She characterizes it as a sensation "like my head will explode" and "pressure". Associated sy; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	patient fell and hit her head and is now having memory loss, blurred vision, headaches; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Patient had orbital floor fracture due to ATV accident in 2014 and has recent onset of headaches on the right side of his head which started 3 weeks ago; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if there is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	patient had trauma to head 2 months ago and is now having pain on right side of head; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; It is unknown if there recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; It is not known if there is a new and sudden onset of a headache less than 1 week not improved by medications.; It is not known if there is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	patient has dizziness. she also is presenting with unsteady gait drifting to the right.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing dizziness.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	patient has dizziness; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is not described as a “thunderclap” or the worst headache of the patient’s life.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Patient has gradual onset hearing loss, daily activities and work limited; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient had a normal audiogram.; The patient is experiencing hearing loss.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	PATIENT HAS HAD AN AVM LAST YEAR. PATIENT HAS TINGLING AND NUMBNESS IN FACE AND RIGHT ARM OFF AND ON FOR THREE WEEKS.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are not recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Patient has worsening weakness and pain of left leg causing difficulty with walking up stairs.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Patient is having issues with confusion and facial changes.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Patient is seen in clinic today with a possible concussion. Patient states the hit was while he was on defense playing outside line backer.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; It is unknown if there recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Patient presented to clinic with elevated blood pressure 187/112, and chronic headache.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Patient presents with dizziness, neck stiffness and vision aura; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	patient presents with syncope, few days ago passed out while driving. no warning, no headache or chest pain. when woke up surrounded by other people, not sure how long she was out. blood work pending; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The results of the lab tests are unknown.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	patient recently delivered 2 weeks ago, infant has Spina Bifida, infant had surgery.Pt went through alot of stress. Migraine headache, pt states she gets dizzy and has had a headache for 2 weeks now. States that it all started after epidural injections du; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Patient suffered a recent fall approx 10 days ago suffering head trauma and sudden onset of dizziness & headache; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is not a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Patient with daily migraines despite medications.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	personal history of chari malformation; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt also has nausea and vision change with headaches. Pt has also tried different medications.; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt c/o 5 months pain behind left eye. Paincomes and goes without any known exacerbating or alleviating factors. Pain is sharp and severe sometimes radiating into ipsilateral neck. Episodes occur several times/day each lasting 5-10 minutes; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/20/16 office visit; There has not been any treatment or conservative therapy.; Pt c/o 5 months pain behind left eye. Paincomes and goes without any known exacerbating or alleviating factors. Pain is sharp and severe sometimes radiating into ipsilateral neck. Episodes occur several times/day each lasting 5-10 minutes	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt fell 5 days ago, head injury, hematoma scalp, increasing head ache dizziness, walking difficulty; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are not new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; The trauma or injury to the head was between 24 hours and 1 week ago.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	pt fell about 2 months ago, had brief LOC, pt reports frequent headaches,dizziness at times, lack of balance at times,medication has not alleviated symptoms or pain; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	pt had a ct brain done on 9/27/2016 and it read:"There is a moderate sized area decreased attenuation left basal ganglia measuring 1.71x1.98cm, probable old basal ganglia infarct. A follow up MRI scan may be helpful to further assess for developing or ac; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has a sudden change in mental status.; It is unknown why this study is being ordered.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt has a h/x of brain tumor,; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt has a new sudden onset of HA with visual disturbance; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has vision changes.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	pt has elevated prolactin level; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	PT HAS HAD DIZZINESS AND DISEQUILIBRIUM LEADING TO 4 DIFFERENT INSTANCES OF FALL. PT HAD A TYMPANOGRAM THAT CAME BACK NORMAL.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient is experiencing dizziness.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt has poor memory; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Pt here with c/o having headache since early this AM , started vomiting later . has felt really tired and fatigued .  felt shaky . felt off balalnce .; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has dizziness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	pt is also having vision changes.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has dizziness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	pt was diagnosed with neurofibromatosis and doctor would like MRI to assess.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	R/O ELEVATED PROLATIC LEVEL, ELEVATED TESTORONE; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has fatigue or malaise; It is unknown why this study is being ordered.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Reason:A few weeks ago Mrs. Karen presented to my office with new onset seizure like activity. She was actively convulsing in the office and was sent to ER. CT was neg in ER Since d/c, she has been having seizure like activity on a daily basis, she can fe; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; It is not known if there has been a previous Brain MRI completed.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Ruling out foraminal and central stenosis; This study is being ordered for a neurological disorder.; 8/17/2016; There has not been any treatment or conservative therapy.; Severe headaches, right side neck pain, dizziness and nausea	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	SEE UPLOADED CLINIC NOTES; This study is being ordered for trauma or injury.; AUGUST 8 2016; It is not known if there has been any treatment or conservative therapy.; BLURRED VISION, CONFUSION, DIZZINESS, HEADACHE, TROUBLE WITH SPEECH AND THOUGHT PROCESS	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	see uploaded; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has vertigo.; It is unknown why this study is being ordered.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	seizure disorder with history of brain tumor; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; It is not known if there has been a previous Brain MRI completed.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	signs of slurring speech; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8-8-2016; There has not been any treatment or conservative therapy.; headache sudden onset, r side, nausea, gait instability	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Syncope; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are not new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; The trauma or injury to the head was less than 24 hours ago.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	tenderness to lower paraspinal cervical area and posterior bilateral shoulders; This study is being ordered for trauma or injury.; ; There has not been any treatment or conservative therapy.; pain in neck that worsens with movement and radiates to posterior shoulders b/l with tingling, history of migraines, but pt reports increase in frequency and worsening of pain since MVA	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	the patient is having alteration of mental status and has been occurring in an intermittent pattern for 1 year (AND ONE HALF). The course has been recurrent.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The results of the lab tests are unknown.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	the Pt has had weight loss, loss of taste, metallic taste in mouth, difficulty swallowing. Evaluate for MS.; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, one sided arm or leg weakness, the inability to speak, or vision changes.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for Multiple Sclerosis.; The patient has new symptoms.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This is a request for an Internal Auditory Canal MRI.; There is a suspected Acoustic Neuroma or tumor of the inner or middle ear.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This is a request for an Internal Auditory Canal MRI.; There is not a suspected Acoustic Neuroma or tumor of the inner or middle ear.; There is not a suspected cholesteatoma of the ear.; The patient has had a recent brain CT or MRI within the last 90 days.; There are neurologic symptoms or deficits such as one-sided weakness, speech impairments, vision defects or sudden onset of severe dizziness.; This is not a pre-operative evaluation for a known tumor of the middle or inner ear.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This is a request for an Internal Auditory Canal MRI.; There is not a suspected Acoustic Neuroma or tumor of the inner or middle ear.; There is not a suspected cholesteatoma of the ear.; The patient has not had a recent brain CT or MRI within the last 90 days.; There are neurologic symptoms or deficits such as one-sided weakness, speech impairments, vision defects or sudden onset of severe dizziness.	2
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation, multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Requested due to trauma or injury.; There are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; It is unknown if the study is being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	4
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	49
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	189

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; It is unknown if there recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a “thunderclap” or the worst headache of the patient’s life.	5
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is a new and sudden onset of a headache less than 1 week not improved by medications.; The headache is described as a “thunderclap” or the worst headache of the patient’s life.	14
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There are NO recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.; There is not a new and sudden onset of a headache less than 1 week not improved by medications.; There is a family history (parent, sibling, or child) of stroke, aneurysm, or AVM (arteriovenous malformation)	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as sudden and severe.; There recent neurological deficits on exam such as one sided weakness, speech impairments or vision defects.	120
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient had a thunderclap headache or worst headache of the patient's life (within the last 3 months).	8
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient has a sudden and severe headache.; The patient had a recent onset (within the last 3 months) of neurologic symptoms.	2
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is being requested for evaluation of a headache.; This headache is not described as sudden, severe or chronic recurring.; The headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.	4

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; It is not known if the condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	16
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing dizziness.	29

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing fatigue or malaise.	9
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is associated with headache, blurred or double vision or a change in sensation noted on exam.; The patient is experiencing vertigo	3
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	4

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing fatigue or malaise.	4
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results completed.; The lab results were abnormal; The patient is experiencing vertigo	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has not undergone treatment for a congenital abnormality (such as hydrocephalus or craniosynostosis).; There are recent neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.; The patient has a congenital abnormality.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested due to trauma or injury.; There are new, intermittent symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	11
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of infection or inflammation; The patient does not have a fever, stiff neck AND positive laboratory findings (like elevated WBC or abnormal Lumbar puncture fluid examination that indicate inflammatory disease or an infection.; The doctor notes on exam that the patient has delirium or acute altered mental status.	2
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; It is not known if the patient has undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.	2
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; There are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.	18

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has undergone treatment for multiple sclerosis.	3
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of seizures; There has not been a previous Brain MRI completed.	24
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are not recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; There a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.	54
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has been completed to determine tumor tissue type.	9

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are not physical findings or laboratory values indicating abnormal pituitary hormone levels.; There has not been a previous Brain MRI completed.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are not recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.; There is not a new and sudden onset of headache (less than 1 week) not improved by pain medications.; The tumor is a pituitary tumor or pituitary adenoma.; There are physical findings or laboratory values indicating abnormal pituitary hormone levels.	2
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; A biopsy has not been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.	6

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of tumor; It is not known if a biopsy has been completed to determine tumor tissue type.; There are recent neurological symptoms such as one-sided weakness, speech impairments, or vision defects.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient has one sided arm or leg weakness.; The patient had a recent onset (within the last 4 weeks) of neurologic symptoms.; This study is being ordered for stroke or TIA (transient ischemic attack).	4
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for a tumor.	5
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for and infection or inflammation.	2
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; This study is being ordered for seizures.; There has been a change in seizure pattern or a new seizure.	6

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	This request is for a Brain MRI; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; There are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Tinnitus: ongoing for more that 6 months bilateral ears. High pitched tone, she denies any significant loud noises. Patient reports it's been ongoing without significant improvement. She is on one or 2 medications that have been known to cause tinnitus in; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The condition is not associated with headache, blurred or double vision or a change in sensation noted on exam.; A metabolic work-up done including urinalysis, electrolytes, and complete blood count with results was not completed.; The patient does NOT have dizziness, fatigue or malaise, Bell's Palsy, a congenital abnormality, loss of smell, hearing loss or vertigo.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	to r/o chiari malformation; This study is being ordered for a neurological disorder.; 8/3/2016; There has been treatment or conservative therapy.; nausea vomiting dizziness blurred vision weakness bilateral arm parathesia Chronic pain; Ibuprofen naproxen flexeril bupapa	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	TO RULE OUT MULTIPLE SCLEROSIS; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of Multiple Sclerosis; The patient has not undergone treatment for multiple sclerosis.; It is not known if there are intermittent or new neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Transient confusion AV Malformation; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Not requested for evaluation of trauma/injury, tumor, stroke/aneurysm, infection/inflammation,multiple sclerosis, or seizures; The patient has not undergone treatment for a congenital abnormality (such as hydrocephalus or craniosynostosis).; There are not recent neurological symptoms or deficits such as one-sided weakness, speech impairments, or vision defects.; Surgery is not planned within the next 4 weeks.; An operation for shunt placement (for brain fluid drainage) is not being considered or a non-metalic shunt is not functioning correctly.; The patient has a congenital abnormality.	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	trauma; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a sudden and severe headache.; It is unknown if the patient had a recent onset (within the last 3 months) of neurologic symptoms.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	unknown; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; Requested for evaluation of stroke or aneurysm; There are not recent neurological symptoms such as one sided weakness, speech impairments, or vision defects.; There is not a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	unknown; This study is being ordered for a neurological disorder.; one month ago; There has not been any treatment or conservative therapy.; dull sensation and weakness in left leg, tightness and stiff muscle, speech difficult, light head,	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 06/23/2016; There has not been any treatment or conservative therapy.; memory loss; ha; back pain	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/17/2016; There has not been any treatment or conservative therapy.; SEIZURES AND SYNCOPE	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	unknown; This study is being ordered for trauma or injury.; 01/1998; There has not been any treatment or conservative therapy.; headache, numbness and tingling and upper extremity	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	unknown; This study is being ordered for trauma or injury.; 16 years for the back pain and 3 years for the headaches; There has not been any treatment or conservative therapy.; low back pain and severe headaches	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	VISION LOSS; This request is for a Brain MRI; The study is NOT being requested for evaluation of a headache.; The patient does not have dizziness, fatigue or malaise, sudden change in mental status, Bell's palsy, Congenital abnormality, loss of smell, hearing loss or vertigo.; It is unknown why this study is being ordered.	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	worsening h/a x 3wks; photophobia; pt has never had a n/a like this before; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; It is not known if the headache is presenting with a sudden change in severity, associated with exertion, or a mental status change.; It is not known if there are recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1

General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Worsening Headaches, TIA; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The headache is described as chronic or recurring.; The headache is not presenting with a sudden change in severity, associated with exertion, or a mental status change.; There are not recent neurological symptoms or deficits such as one sided weakness, speech impairments, or vision defects.; It is not known if there is a family history (parent, sibling or child of the patient) of AVM (arteriovenous malformation).	1
General/Family Practice	Approval	70551 MRI HEAD, BRAIN, BRAINSTEM WITHOUT CONTRAST	Worsening Headaches; This request is for a Brain MRI; The study is being requested for evaluation of a headache.; The patient has a chronic or recurring headache.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX		2
General/Family Practice	Approval	71250 CT CHEST, THORAX	"The ordering physician IS a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	39
General/Family Practice	Approval	71250 CT CHEST, THORAX	"The ordering physician IS an oncologist, surgeon, pulmonologist, cardiologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for a pre-operative evaluation.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	"The ordering physician is not a surgeon, pulmonologist, or cardiologist."; It is not known if there is radiologic evidence of mediastinal widening.; CT reported ECT atic ascending thoracic aorta measuring 3.6cm in diameter. Mild atherosclerotic vascular disease w/ evidence of coronary artery involvement.; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	"The ordering physician is not a surgeon, pulmonologist, or cardiologist."; It is not known if there is radiologic evidence of mediastinal widening.; Ms. Elliot is currently taking Victoza for weight loss management.  Ms. Elliot denies any current form of exercise. She states that daily water intake is 64 ounces. Concurrent health problems include hypertension, depression, insomnia, and arthritis,.; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	"The ordering physician is not a surgeon, pulmonologist, or cardiologist."; There is radiologic evidence of mediastinal widening.; A Chest/Thorax CT is being ordered.; This study is being ordered for vascular disease other than cardiac.	2
General/Family Practice	Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	190

General/Family Practice	Approval	71250 CT CHEST, THORAX	"There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They did not have a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	6
General/Family Practice	Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	4
General/Family Practice	Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	13
General/Family Practice	Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	6
General/Family Practice	Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	2

General/Family Practice	Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for Vascular Disease.; 07/01/2016; There has been treatment or conservative therapy.; pressure in head when bends over; seen by specialist and taken antibiotics	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	. EXAM DESCRIPTION: CT LOW DOSE LUNG SCAN HISTORY: Screening for Lung Cancer; COMPARISON: None TECHNIQUE: Helical axial noncontrast images are obtained from the lung apices to below the diaphragm utilizing low dose technique. Axial, coronal, and ; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	2
General/Family Practice	Approval	71250 CT CHEST, THORAX	; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	4
General/Family Practice	Approval	71250 CT CHEST, THORAX	; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	4
General/Family Practice	Approval	71250 CT CHEST, THORAX	; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	12

General/Family Practice	Approval	71250 CT CHEST, THORAX	; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; It is unknown if the patient quit smoking in the past 15 years.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	; There is no radiologic evidence of asbestosis.; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	3
General/Family Practice	Approval	71250 CT CHEST, THORAX	; This study is being ordered for a metastatic disease.; There are 3 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ;	2

General/Family Practice	Approval	71250 CT CHEST, THORAX	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Persistent cough and sinus infections since 06/01/2016; There has been treatment or conservative therapy.; persistent cough, allergic rhinitis infection non-resolving.; Patient has used sprivia, vistaril and promethazine-codeine.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	1 year follow up; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	6 month f/u of nodule; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	6 Month FU to previous chest ct; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	63 yo female noted to have pulmonary nodules, last CT was in 7/2015. Please do a repeat chest CT now to look for nodule stability.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	6mos f/u to a ct scan which showed a 5mm rml and a 4mm rll pulmonary nodule; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for known tumor.	19
General/Family Practice	Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient does NOT have signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	3
General/Family Practice	Approval	71250 CT CHEST, THORAX	A Chest/Thorax CT is being ordered.; This study is being ordered for suspected pulmonary Embolus.	38
General/Family Practice	Approval	71250 CT CHEST, THORAX	abdominal pain previous CT scan was abnormal; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/13/2016; There has not been any treatment or conservative therapy.; Abdominal pain	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	abn chest xray and 30year abuse of tobacco.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	ABN weight loss; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	abnormal chest x-ray with mass on left side.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	abnormal chest xray.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Abnormal CT of the abdomen done and recommended that patient have CT of chest due to lung nodules and history of patient being a smoker.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	abnormal Labs; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Abnormal Pulmonary Function Study. Solitary Pulmonary Nodule.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; It is unknown if the patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Additionally, she presents with history of smokers' cough. this has been a problem for the past 1 1/2 months. It is associated with chest pain described as mild and mild discomfort and clear productive sputum. Nothing seems to improve the cough. No ne; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	chest congestion and coughing; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	chest ct 1yr ago that showed chest nodules this a f/u; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	chest ct done 08/13/2014 that showed a non specific nodule in right lobe. recommended short term follow up, abnormal chest x-ray as well which prompted ct of chest that showed the abnormal area of the right mid lobe.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	chest pain and severe shortness of breath particularly with activity- has had normal chest xray, stress test and PFT; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	CHEST PAIN WITH SHORTNESS OF BREATH AT TIMES. NODULE; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	Chest pain, shortness of breath.; There is no radiologic evidence of asbestosis.; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; There is NO radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	chest x-ray abnormal. lower right lung; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; x ray 07/27/16 issue started 3 weeks ago; There has not been any treatment or conservative therapy.; abdomen pain, shortness of breath, tenderness to touch of upper right quad and back pain	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	chest xray on 7-5-16 shows possible nodular density; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Chronic chest pain, shortness of breath, pain worse with movement; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	Chronic cough, unexplained weight loss; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	CLINIC NOTES UPLOADED; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Costochondritis; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Cough SOB asthma; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Cough that has lasted 7 month and xray showed an enlarged aorta; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	cracking in the lungs xrays are abnormal radiologist recommend a ct scan to see what is going on; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	CT 03/25/2016 Recommendation by radiologist to follow up in 6 months. Multiple small nodules largest 6mm observed.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	CT on March 9 of 2015 showed 6 mm nodule in right upper lobe; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	degenerative disc disease on mri in the past in lumbar spine with radicular pain and numbness going down the left leg; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; HAS BEEN HAVING SEVERE BACK PAIN FIR THE PAST 5 YRS, HAS BEEN TREATED AT THIS FACILITY SINCE 8/2015; SOLITARY NODULE RIGHT LUNG ON CT 8/2015; There has been treatment or conservative therapy.; NO LUNG SYMPTOMS; increasing pain in his back going down the left leg. goes into the back of the thigh and into the calf. numbness, tingling, and weakness (left leg). EXAM: Musculoskeletal:: Motor Strength and Tone: normal. Joints, Bones, and Muscles; PT HAS BEEN SEEING PAIN MGMT, TAKEN PAIN MEDICATION, NO BOWEL OR BLADDER PROBLEMS	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	depended upon oxygen, transplant, chest pain,; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Diagnostic Test for abnormal finding in lung field, azygous node in right lung field; This study is being ordered for Inflammatory/ Infectious Disease.; ; There has not been any treatment or conservative therapy.; COPD, Shortness of breath, dyspnea on exertion, cough	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Document completion of pulmonary embolism; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Enlarging mass in patients neck.; This study is being ordered for Inflammatory/ Infectious Disease.; 09/18/2016; There has been treatment or conservative therapy.; Mass in neck, fever, swollen lymph nodes; Anti inflammatories, antibiotics, and pain management. Doxycycline and rocephin	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	Enter In Unknown If No Info Given.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Esophageal abnormality found on previous CT abdomen and pelvis.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	EXAM DESCRIPTION: CT LOW DOSE LUNG SCAN; HISTORY: Preventive Care; Yes; history of tobacco use. Lung cancer screening; COMPARISON: None; TECHNIQUE: Helical axial noncontrast images are obtained from the lung apices to below the diaphragm utilizing I; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	F/U FROM A PREVIOUS TEST THAT SHOWED MULTIPLE NODULES; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	f/u from imaging done 03/17/2015; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	F/U pulmonary nodule; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	first seen for chest pain xrays medicine still in pain; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Follow up Chest CT From April 2016. Opacity found in Right upper and lower lobe.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Follow up of multiple lung nodules; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	Follow up to suspicious mass found on Lung CT in January 2016.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	follow up; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	follow-up CT; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	History of asbestos exposure for 8 years. Nodule in right hilum. exertional shortness of breath.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	hx of ovarian cancer; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	It is not known if there is radiologic evidence of mediastinal widening.; There is physical or radiologic evidence of a chest wall abnormality.; The ordering physician a is NOT a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	It is not known if there is radiologic evidence of non-resolving pneumonia.; It is not known if there is radiologic evidence of asbestosis.; ; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; It is not known if there is radiologic evidence of a lung abscess or empyema.; It is not known if there is radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	It is not known if there is radiologic evidence of non-resolving pneumonia.; The patient is presenting new signs or symptoms.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	large hernia on left side of chest; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Last CT on 01/26/2015 3 nodules were seen in right lung and tiny nodule seen in left lung; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	left lung base nodules radiologist advs follow up in 6 months; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	LEFT SIDED CHEST PAIN,DIFFICULTY BREATHING,COUGH,ABNORMAL CHEST XRAY DONE 08/25/2016 SHOWS LUNG MASS,INCIDENTAL FINDING ON CHEST XRAY,JOINT TENDERNESS AND SPASMS LEFT SIDE RIB TENDER; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	lung nodule found on Chest CT on 2014; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	Lung nodule; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	2
General/Family Practice	Approval	71250 CT CHEST, THORAX	Lung nodule; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Lung nodule; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; It is unknown if the patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Mycobacterium aviumintracellulare complex; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	NA; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Nodule; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	none given; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	none; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Pa and Lat chest xray indicated there was a mass seen. Mediastinal and hilar lymphadenopathy; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	pain from upper chest wall on right , cannot feel mass , very painful in ribs had these effect for several days / don't see anything on chest xray, don't have shortness of breath until she has to take a deep breath , muscle relax didn't help; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Pain in chest.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	PATIENT HAD A CT CORONARY CALCIUM SCORE ON 2/5/15 THAT SHOWED 5.5MM NODULE. RADIOLOGIST RECOMMENDED CHECKING CHEST CT FOR CHANGES.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	PATIENT HAD A CT LOW DOSE SCREENING ON 03/08/2016 THAT REVEALED 2 NODULES, POSSIBLE SOFT TISSUE MASS. REQUIRES RECHECK AT THIS TIME.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	patient had a CT on 08/08/2015 that showed a lung nodule that needed to be followed up on; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Patient has abnormal finding on chest x-ray. Need CT to further evaluate.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	Patient has chest pain xray revealed lung density. Patient is a heavy smoker. Concern for lung cancer; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient did NOT quit smoking in the past 15 years.; The patient has signs or symptoms suggestive of lung cancer such as an unexplained cough, coughing up blood, unexplained weight loss or other condition.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Patient has COPD. She has been having episodes of coughing and SOB; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	patient has granulomas in her chest; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Patient has had these recurring symptoms since 2015. Normal chest xray in November 2015. Patient also has a history of tobacco use.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	Patient has history of thyroid cancer. Shortness of breath and new onset of hoarsness; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	patient is coughing up blood, chronic tobacco user; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Patient needs CT scan to followup from findings from chest x-ray showing scarring, opacities and multiple nodules up to 6.7mm in size. Also has severe emphysema and is having shortness of breath upon exertion. Already using nighttime oxygen of 2L. Doctor ; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	patient went to er for rib pain. had xray there showing lung nodule.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	patient with enlarged heart. Density also seen on chest xray preformed on 06/23/2016.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Patients xray was abnormal. Had a widening of media steiem. Needs to check further.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Previous CT in May 2016 was abnormal, minimal prominence of pancreatic duct and thickening of distal esophagus.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	PT CO R SIDE CHEST PAIN WITH HISTORY OF THYMOMA; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt had a AB/PELV CT and showed pulmonary nodules and showed multiple lung nodules and largest measured 6.2 cm in size. CT was recommended. Pt has h/x of right breast cancer.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt had a calcium score done in Dec and a 5mm nodule was found on his lung and recommended a 6 month f/u; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt had a chest xray and abdominal CT. These tests found the pt to have fluid on his left lung; he is needing a chest CT to further access.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt has a history of Breast Cancer and has had a bilateral mastectomy. She is still seeing an Oncologist and they recommended she have a CT Chest with contrast because she has a left axillary mass.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt has been having DOE and rt hilar mass vs. scar along with fatigue and claudication; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt has symptoms of TB; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	PT IS TENDER TO PALPATION AT THE LOWER RIBS B.TENDER WITH GUARDING ON THE RIB ITSELF.NO SIGNS OF TRAUMA.NO ERTHEMA OR EDEMA.PT HAS MILD TENDERNESS TO PALPATION OVER THE UPPER ABDOMEN.NO MASSES. PATIENT IS NOT OBESE.Musculoskeletal pain. Pt has failed or; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt is having shortness of breath and had an abnormal xray that showed a pleural fusion, lung founds diminish in the right lower lobe; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt is SOB , CXR, Stress test are negative. Still SOB.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	pt needs CT chest for cystic fibrosis and MAI; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	PT reporting DOE. PFT and chest xray were both abnormal but the xray shows areas of fluid in the lung fields, pleural thickening along left pleural chest wall, and cardiomegaly.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt suffers with rt upper quadrant pain.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Pt went to urgent care in Bentonville and was dx'd with bronchitis and states a nodule was found in the lower left lobe of lung, Do not have access to results from Urgent Care, productive cough; congested, yellow-green, thick sputum; sore throat, cough, w; "Caller is NOT SURE if there is evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	pt. has been sick since vacation 6/25/2016 she has a cough for 3 weeks trouble laying on her side, shortness of breathe at rest and exertion, she is waiting a test for valley fever, and symptom has worsened, x ray show no rib fracture but a lymph node; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for none of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	pulmonary nodule; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	R/O metastasis; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 05/19/2016; There has been treatment or conservative therapy.; Pain in left shoulder; shoulder injection, physical therapy, and MRI.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	R/O Tumor; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Repeat ct scan of the chest 12 month recheck for pulmonary nodule.; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	She had previous abnormal chest CT and we will recheck this as it has been 3 months.; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	Shortness of breath noted. This has been noted for the past 7 to 9 months. Its course has been stable. Associated symptoms include wheezing. This tends to be worse lying flat and with exertion (even minimal). The shortness of breath is better sitting; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	shortness of breath, cough, patient is smoker;; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Smoker for years and having abnormal chest pain. Xray showed mild cardiomegaly but otherwise normal; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Solitary pulmonary nodule on lung CT; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Suspected mass; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	The last chest CT was performed within the last 6 months.; It is not known if there is radiologic evidence of non-resolving pneumonia.; Pt is being treated for Active TB at this time. Recommendations from Radilogist on the CT Chest from 5-27-16 was to repeat in 3 months.; The patient is NOT presenting new signs or symptoms.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	The ordering physician a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	The patient has had a chest x-ray recently.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for hemoptysis.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	The patient is a former smoker. She has a persistent abnormal chest x-ray with obliteration of the right heart border. This has been after her initial CT in April of this year; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	The Pt has coughing, congestion burning in chest. abnormal chest xray; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	The Pt has had shortness of breath x 3months. Pt had chest x-ray 09-07-2016 reflected left lower lung mass. Pt has history of hematoma in lung, 06/2016.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	the xray shown something; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	there is 2 or more 6-7mm nodules at the left lung base; "There IS evidence of a lung, mediastinal or chest mass noted within the last 30 days."; They had a previous Chest x-ray.; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	THERE IS A FAMILY HISTORY OF CANCER. THE PATIENT HAS DEVELOPED A SSEVERE COUGH IN WHICH THE LUNGS HAVE BECOME VERY SORE.; A Chest/Thorax CT is being ordered.; This study is being ordered for screening of lung cancer.; The patient is 54 years old or younger.; The patient has NOT had a Low Dose CT for Lung Cancer Screening or a Chest CT in the past 11 months.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of mediastinal widening.; There is no physical or radiologic evidence of a chest wall abnormality.; Ribs; has severe tenderness to left side of ribs back towards back with a STEP OFF sign present, can not take deep breath because pain so severe; Cards: RRR without MRG; pulm; short breathes but clear; The ordering physician a is NOT a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of mediastinal widening.; There is physical or radiologic evidence of a chest wall abnormality.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of mediastinal widening.; There is physical or radiologic evidence of a chest wall abnormality.; The ordering physician a is NOT a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.	2

General/Family Practice	Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; It is not known if there is radiologic evidence of asbestosis.; abnormal chest xray sob chronic cough; "The caller doesn't know if the ordering physician is a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "The caller doesn't know if there is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; It is not known if there is radiologic evidence of a lung abscess or empyema.; It is not known if there is radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; It is not known if there is radiologic evidence of asbestosis.; Patients xray is showing atelectasis/infiltrate. She is having chest pain with cough and fatigue. We would to further eval for any suspected infection or mass; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "The caller doesn't know if there is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; It is not known if there is radiologic evidence of a lung abscess or empyema.; It is not known if there is radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; The patient is presenting new signs or symptoms.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	2
General/Family Practice	Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; < Enter answer here - or Type In Unknown If No Info Given. >; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	3

General/Family Practice	Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; ; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; chest xray 8/16/16 done in office that is showing abnormal; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1

General/Family Practice

Approval

71250 CT CHEST,
THORAX

There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; completed; CHEST XRAY; L. sided calcified breast implant; posterior calcified granuloma mid-chest; increased perihilar haziness suggesting recent bronchitis.; will get ct to further evaluate granuloma; PERSISTENT COUGH NON-PRODUCTIVE.HAS HAD ABX AND INHA; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.

1

General/Family Practice	Approval	71250 CT CHEST, THORAX	<p>There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Patient had CT Thoracic spine had incidental finding; Subcentimeter nodular foci in the left lung incidentally noted; there are groundglass infrahilar opacities seen bilaterally which may reflect pneumonitis. Dedicated CT of the chest is recommend; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.</p>	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	<p>There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; patient with continues pain in the sternal junction and clavicle with no relief. Patient has gotten worse; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.</p>	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	<p>There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Pt has an abcess in right axillary region that may require surgical intervention. need CT to determine depth of abcess as well as other tissue involved; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.</p>	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	<p>There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; She has persistent chest pain & SOB. I would like to do a chest CT to look for other underlying lung disease, such as sarcoidosis, bronchiectasis, pulmonary fibrosis, etc, which do not always show up on a plain film; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.</p>	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Single pulmonary nodule; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	There is no radiologic evidence of non-resolving pneumonia.; There is no radiologic evidence of asbestosis.; Worsening unresolved cough; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; "There is no radiologic evidence of sarcoidosis, tuberculosis or fungal infection."; There is no radiologic evidence of a lung abscess or empyema.; There is no radiologic evidence of pneumoconiosis e.g. black lung disease or silicosis.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	There is radiologic evidence of mediastinal widening.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	There is radiologic evidence of mediastinal widening.; The ordering physician a is NOT a Surgeon, Pulmonologist, or Cardiologist.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for follow up trauma.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The caller doesn't know if the ordering physician is a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	There is radiologic evidence of non-resolving pneumonia after at least 4 weeks of treatment.; "The ordering physician is NOT a surgeon, pulmonologist or PCP ordering on behalf of a specialist who has seen the patient."; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	28
General/Family Practice	Approval	71250 CT CHEST, THORAX	There is radiologic evidence of non-resolving pneumonia for 6 weeks after antibiotic treatment was prescribed.; A Chest/Thorax CT is being ordered.; This study is being ordered for known or suspected inflammatory disease or pneumonia.	4
General/Family Practice	Approval	71250 CT CHEST, THORAX	This is a 6 month follow up for a right lower lobe pulmonary nodule.; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1

General/Family Practice	Approval	71250 CT CHEST, THORAX	This test is being order as a 1 yr follow up from CT done on 10/16/2015 dx Left pulmonary nodule; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	Unknown; "There is NO evidence of a lung, mediastinal or chest mass noted within the last 30 days."; A Chest/Thorax CT is being ordered.; This study is being ordered for work-up for suspicious mass.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	unknown; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	unknown; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	weight loss; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71250 CT CHEST, THORAX	widening; A Chest/Thorax CT is being ordered.; The study is being ordered for none of the above.; This study is being ordered for non of the above.	1
General/Family Practice	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST		1

General/Family Practice	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	abnormal ct scan; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Suspected Vascular Disease.; There are new signs or symptoms indicative of a dissecting aortic aneurysm.; Yes, this is a request for a Chest CT Angiography.	1
General/Family Practice	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	ansyrum; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for Known Vascular Disease.; This is a Follow-up to a previous angiogram or MR angiogram.; There are new signs or symptoms indicative of a dissecting aortic aneurysm.; Yes, this is a request for a Chest CT Angiography.	1
General/Family Practice	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	D-DIMER-ABNORMAL 0.58; This study is not requested to evaluate suspected pulmonary embolus.; This study will not be performed in conjunction with a Chest CT.; This study is being ordered for another reason besides Known or Suspected Congenital Abnormality, Known or suspected Vascular Disease.; Yes, this is a request for a Chest CT Angiography.	1
General/Family Practice	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCON TRAST	This study is requested to evaluate suspected pulmonary embolus.; Yes, this is a request for a Chest CT Angiography.	44

General/Family Practice	Approval	71275 CT ANGIOGRAPHY CHEST W/CONTRAST/NONCONTRAST	UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; SEVERAL YEARS; There has been treatment or conservative therapy.; PT CANT BREATHE; INHALERS, BREATHING TREATMENTS, RESPIRATORY THERAPY.	1
General/Family Practice	Approval	71550 MRI CHEST	Chest MRI is needed for brachial plexus injury. Tingling of the left arm and of the left hand. Left shoulder numbness. Unable to straighten the left wrist, midline upper back pain, lower back pain radiating to the right buttock, and acute. Strength 1/5 in; This study is being ordered for trauma or injury.; 09/09/2016; There has not been any treatment or conservative therapy.; Tingling of the left arm and of the left hand. Left shoulder numbness. Unable to straighten the left wrist, midline upper back pain, lower back pain radiating to the right buttock, and acute. Strength 1/5 in left wrist. Light touch sensation is diminished	1
General/Family Practice	Approval	71550 MRI CHEST	This study is being ordered for a work-up of a suspicious mass.; There is radiographic or physical evidence of a lung or chest mass.; This is a request for a chest MRI.	1
General/Family Practice	Approval	71550 MRI CHEST	This study is being ordered for vascular disease.; "The ordering physician is not a surgeon, pulmonologist, or cardiologist."; There is radiologic evidence of mediastinal widening.; This is a request for a chest MRI.	1
General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST		2

General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 2013; There has been treatment or conservative therapy.; piercing throbbing pain, aggravated by movement, tingling in extremities, cramping, tenderness in spine, positive tinel on right and left of spine,; medication and physical therapy	1
General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7-13-15; There has not been any treatment or conservative therapy.; PAIN, WEAKNESS, NUMBNESS	1
General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1
General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	. He returns today and is getting progressively worse in terms of the cervical spine pain. He is also experiencing some weakness in his left upper extremity. He has had short-term relief from his cervical spine injections but no long-term relief. At this ; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.	1

General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	; This study is being ordered for a neurological disorder.; Unkown; There has been treatment or conservative therapy.; low back pain with radiculopathy, headaches, meningioma on the frontal lobe.; Injections in low back and a neuro-stimulator in back.	1
General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	; This study is being ordered for trauma or injury.; 08/17/2016; PATIENT WAS REAR ENDED WITH AIR BAGS DEPLOYED.; There has not been any treatment or conservative therapy.; BLURRY VISION, HEADACHE, PRESSURE IN HEAD AND SEVERE NECK PAIN. PATIENT CAN'T SEE OUT OF LEFT EYE.	1
General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1
General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	abdominal pain, neck pain; This study is being ordered for trauma or injury.; 08/03/16; It is not known if there has been any treatment or conservative therapy.; patient was in a mva and has abdominal pain and neck pain	1
General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	CAR ACCIDENT; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1
General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Enter answer here - or Type In Unknown Issociated symptoms include stiffness that is persistent, paravertebral muscle spasm, radicular left arm pain, numbness in the hands, weakness in the left upper arm, decreased hand grip at times, numbness/tingling; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; Call does not know if there is a reason why the patient cannot have a Cervical Spine MRI.	1

General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	Increased neck pain. History of neck fracture requiring rods and screws. Positive for visual changes and headaches.; The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; The patient is not experiencing sensory abnormalities such as numbness or tingling.; There is a reason why the patient cannot have a Cervical Spine MRI.; This study is being ordered for another reason besides Abnormal gait, Lower extremity weakness, Asymmetric reflexes, Documented evidence of Multiple Sclerosis,  Bowel or bladder dysfunction, Evidence of new foot drop, etc...	1
General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	MRI showed abnormalities, lesion at C6 4mm lesion, r/o bone island and metastasis; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1
General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	None; This study is being ordered for a neurological disorder.; Several yrs; There has been treatment or conservative therapy.; Chronic H/A blurred vision weakness vomiting; Cervical fusion pain management visits chiari malformation surgery	1

General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	PATIENT HAS A HX OF BREAST CANCER SHE IS HAVING RIGHT CLAVICLE PAIN, DR WANTS A CT OF THE RIGHT STERNO-CLAVICULAR JUNCTION; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/oncologist.	1
General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	pts symptoms continue to worsen with no improvement from conservative treatment, pt has limited ROM to left upper extremity that interferes with pts daily life and ability to work, tenderness to left upper thoracic/paraspinal area; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; dizziness, memory loss, pain to back of head, neck and left shoulder that radiates down left arm,occasional flexion of left hand with lateral fingers hung in flexed position, pt had a dirt bike accident in 9/2004 with head injury which required surgery t; nerve conduction study performed results revealed positive left cervical radiculopathy, xrays of c-spine and t-spine normal, pt has completed physical therapy with no improvement of symptoms, anti-inflammatory medications and muscle relaxers along with otc	1

General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; The patient is experiencing sensory abnormalities such as numbness or tingling.; There is a reason why the patient cannot have a Cervical Spine MRI.; This study is being ordered for another reason besides Abnormal gait, Lower extremity weakness, Asymmetric reflexes, Documented evidence of Multiple Sclerosis,  Bowel or bladder dysfunction, Evidence of new foot drop, etc...	2
General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	The patient does have neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to trauma or acute injury within 72 hours.; There is a reason why the patient cannot have a Cervical Spine MRI.; The patient is experiencing or presenting symptoms of Evidence of a recent fracture on previous imaging studies.	1
General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	The patient does not have any neurological deficits.; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to chronic neck pain or suspected degenerative disease.; There has been a supervised trial of conservative management for at least 6 weeks.; There is a reason why the patient cannot have a Cervical Spine MRI.	2

General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to follow-up surgery or fracture within the last 6 months.; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist.;" There is a reason why the patient cannot have a Cervical Spine MRI.	3
General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to neurological deficits.; The patient is experiencing or presenting symptoms of abnormal gait.; There is a reason why the patient cannot have a Cervical Spine MRI.	1
General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; This study is being ordered due to neurological deficits.; The patient is experiencing or presenting symptoms of lower extremity motor weakness documented on physical exam.; There is a reason why the patient cannot have a Cervical Spine MRI.	1
General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	This study is to be part of a Myelogram.; This is a request for a Cervical Spine CT	1
General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	unknown; This study is not to be part of a Myelogram.; This is a request for a Cervical Spine CT; There is no reason why the patient cannot have a Cervical Spine MRI.	1

General/Family Practice	Approval	72125 CT CERVICAL SPINE, NECK SPINE NO CONTRAST	worsening of symptoms since onset of injury - patient hit back of head on concrete floor; This study is being ordered for trauma or injury.; 9/5/16; There has not been any treatment or conservative therapy.; Patient c/o HA, N/V, blurred vision, and neck pain and soreness and tightness of left scapular area	1
General/Family Practice	Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1

General/Family Practice	Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	; This is a request for a thoracic spine CT.; There is no reason why the patient cannot undergo a thoracic spine MRI.	2
General/Family Practice	Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; ;	1

General/Family Practice	Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	has lymphoma type mass on thorassic back; This is a request for a thoracic spine CT.; Caller does not know whether there is a reason why the patient cannot undergo a thoracic spine MRI.	1
General/Family Practice	Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	Hematuria.; This study is being ordered for trauma or injury.; 06/23/2016; There has been treatment or conservative therapy.; Back pain and nausea.; Medication, chest x-ray, seen at ER.	1
General/Family Practice	Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	PATIENT HAS A HX OF BREAST CANCER SHE IS HAVING RIGHT CLAVICLE PAIN, DR WANTS A CT OF THE RIGHT STERNO-CLAVICULAR JUNCTION; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
General/Family Practice	Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	PT HAD X-RAY TODAY SHOWED FRACTURE AT THE T4 AND T5, T7; This is a request for a thoracic spine CT.; Caller does not know whether there is a reason why the patient cannot undergo a thoracic spine MRI.	1
General/Family Practice	Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	Pt has a compression fracture of vertebrae.; This is a request for a thoracic spine CT.; Caller does not know whether there is a reason why the patient cannot undergo a thoracic spine MRI.	1
General/Family Practice	Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine CT.; The study is being ordered due to chronic back pain or suspected degenerative disease.; There is a reason why the patient cannot undergo a thoracic spine MRI.; The patient is experiencing or presenting lower extremity weakness.	1

General/Family Practice	Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine CT.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; There is a reason why the patient cannot undergo a thoracic spine MRI.	1
General/Family Practice	Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	This is a request for a thoracic spine CT.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits."; There is a reason why the patient cannot undergo a thoracic spine MRI.; There are no documented clinical findings of immune system suppression or AIDS.; The patient is not experiencing thoracic back pain associated with chest pain.	1
General/Family Practice	Approval	72128 CT THORACIC SPINE, UPPER BACK NO CONTRAST	This is a request for a thoracic spine CT.; There is evidence of tumor or metastasis on a bone scan or x-ray.; The study is being ordered due to suspected tumor with or without metastasis.; There is a reason why the patient cannot undergo a thoracic spine MRI.	1
General/Family Practice	Approval	72131 CT LUMBAR SPINE, LOW BACK		5
General/Family Practice	Approval	72131 CT LUMBAR SPINE, LOW BACK	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a neurological disorder.; 2013; There has been treatment or conservative therapy.; piercing throbbing pain, aggravated by movement, tingling in extremities, cramping, tenderness in spine, positive tincl on right and left of spine,; medication and physical therapy	1

General/Family Practice	Approval	72131 CT LUMBAR SPINE, LOW BACK	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
General/Family Practice	Approval	72131 CT LUMBAR SPINE, LOW BACK	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 08/25/2016; There has not been any treatment or conservative therapy.; weakness in legs and numbness in legs, back pain	1
General/Family Practice	Approval	72131 CT LUMBAR SPINE, LOW BACK	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7-13-15; There has not been any treatment or conservative therapy.; PAIN, WEAKNESS, NUMBNESS	1

General/Family Practice	Approval	72131 CT LUMBAR SPINE, LOW BACK	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 9/1/16; There has been treatment or conservative therapy.; low back pain radiating numbness of the right side; over the counter medication	1
General/Family Practice	Approval	72131 CT LUMBAR SPINE, LOW BACK	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; l spine 3/16 ab and pel unknown; There has been treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >; l spine (steroids , muscle relaxers, pain meds insets) ad and pel (pain meds)	1
General/Family Practice	Approval	72131 CT LUMBAR SPINE, LOW BACK	; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.;	1
General/Family Practice	Approval	72131 CT LUMBAR SPINE, LOW BACK	; This study is being ordered for a neurological disorder.; Unkown; There has been treatment or conservative therapy.; low back pain with radiculopathy, headaches, meningioma on the frontal lobe.; Injections in low back and a neuro-stimulator in back.	1

General/Family Practice	Approval	72131 CT LUMBAR SPINE, LOW BACK	; This study is being ordered for trauma or injury.; 06/14/2016; There has been treatment or conservative therapy.; severe low back pain which radiates into hip and groin area.; patient has had steroid injections without improvement as well as physical therapy without improvement.	1
General/Family Practice	Approval	72131 CT LUMBAR SPINE, LOW BACK	Hematuria.; This study is being ordered for trauma or injury.; 06/23/2016; There has been treatment or conservative therapy.; Back pain and nausea.; Medication, chest x-ray, seen at ER.	1
General/Family Practice	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is a preoperative or recent post-operative evaluation.	5
General/Family Practice	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is experiencing symptoms of radiculopathy for six weeks or more.	21
General/Family Practice	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.	1

General/Family Practice	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; There is no suspicion of lumbar spine infection.; There is no suspicion of lumbar spine neoplasm or tumor or metastasis.	1
General/Family Practice	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is not part of a myelogram or discogram.; The patient is not experiencing symptoms of radiculopathy for six weeks or more.; There is no neurologic symptoms of bowel or urinary bladder dysfunction.; There is no suspicion of lumbar spine infection.; There is suspicion of lumbar spine neoplasm, tumor or metastasis.	1
General/Family Practice	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient does not have a history of severe low back trauma or lumbar injury.; This is not a preoperative or recent postoperative evaluation.; This study is to be part of a myelogram or discogram.	2
General/Family Practice	Approval	72131 CT LUMBAR SPINE, LOW BACK	This is a request for a lumbar spine CT.; The patient has a history of severe low back trauma or lumbar injury.	28
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST		23

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.; <Document exam findings>	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; RIGHT ARM, DECREASED STRENGTH, AND SENSATION AND WEAKNESS RIGHT UPPER JOINT; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; right arm; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 2008 & 2009 MVA; There has been treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >; MEDICATIONS & 6 WEEKS OF PHYSICAL THERAPY	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 4/2016; There has been treatment or conservative therapy.; back and neck pain,; physical therapy, prednisone	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This is a request for cervical spine MRI; None of the above; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.;	2
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; 09/2015; There has been treatment or conservative therapy.; Cervical and thoracic pain with radiculopathy, numbness, tingling, burning sensation in back arms and hands.; 6 weeks of physical therapy without relief.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; 5/2016; There has been treatment or conservative therapy.; Neck pain/ burning radiating down into left shoulder and shoulder blade and spasms. tender to palpate and tender to light touch. Pain is increasingly worsening, difficult to work.; Chiropractic which made pain worse, and naproxen with no relief.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; Unknown; There has been treatment or conservative therapy.; Numbness in bilateral lower extremities and feet, returning symptom since surgery was done. Constant neck pain.; Physical therapy, pain medication, muscle relaxer, NSAIDS	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.;	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6/16/2016; There has been treatment or conservative therapy.; Back pain, MRI showed tethered cord, mass growing up her spine and wants to see how far it goes; Anti inflammatory, PT for over a month, treated for back pain since December	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6/27/16; There has been treatment or conservative therapy.; Numbness, tingling in arm, pain in the left arm, tingling in the left leg; PT and medication	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Patient has had long standing spinal pain.; There has been treatment or conservative therapy.; Per patient chief complaint on 09/01/2016 pertaining to back... "Mid to upper back into neck pain, left arm numbness and tingling starting Tuesday after therapy; PT 7/27/16 - 9/1/16 From PT report... "After completing initial evaluation , patient received moist hot packs, IFC, and hivamat machine (treats pain and inflammation using electrical current and stimulating the lymphatic pathways) for pain control, tissu	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; PT HAS HAD THIS CONDITION SINCE BEFORE SHE BECAME OUR PT IN 2011.; There has been treatment or conservative therapy.; NECK AND LOW BACK PAIN WITH NUMBNESS IN RIGHT ARM AND SCIATICA IN R LEG; PT HAS UNDERGONE PHYSICAL THERAPY AND ANTI-INFLAMMATORY THERAPY	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; 9-8-2016; There has been treatment or conservative therapy.;	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; Patient has had blunt force trauma to head and neck many years ago that resulted in facial fractures and significant whiplash. In addition, he had a diving accident that injured his neck and spine years ago as well.   He also has significant rotoscolio; There has been treatment or conservative therapy.; Radiculating pain, Pain in neck, Limited Range of Motion, Change in ambulatory gait; Patient has spent more than six weeks in Physical  Therapy and has used Chiropractic Therapy	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	abnormal x-ray, headaches, numbness in the arms, MD wants to r/o bulging disc or pinched nerve; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; numbness and weakness in both arms; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Abnormal Xray:2 views of the cervical spine. There is 4 mm spondylolisthesis of C4 and C5 severe disc space narrowing anterior vertebral body endplates calcification osteophyte formations just anterior bulge. Degenerative disc spondylolisthesis and post; This study is being ordered for trauma or injury.; 7/24/16; There has been treatment or conservative therapy.; Neck pain with numbness and tingling in bilateral upper extremities. Limited range of motion in neck.; Low back pain with limited range of motion. Pain radiates down bilateral lower extremities with burning sensations in feet and tingling/numbness noted; Anti-inflammatory medications and physical therapy.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	acute worsening of lower extremity weakness and muscle spasticity in L leg; This study is being ordered for a neurological disorder.; approx 14 weeks ago- mid-June 2016; There has been treatment or conservative therapy.; LLE pain/weakness - acute worsening of lower extremity weakness and muscle spasticity in L leg; anti-inflammatory medication and joint injections	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Chronic neck, mid back, and low back pain. Pain radiating from cervical spine through both shoulders intermittently. Pain across thoracic spine radiates down through both buttocks and hips into lower extremities, right greater than left. Numbness and ting; This study is being ordered for a neurological disorder.; 07/2011; There has been treatment or conservative therapy.; Chronic neck, mid back, and low back pain. Pain radiating from cervical spine through both shoulders intermittently. Pain across thoracic spine radiates down through both buttocks and hips into lower extremities, right greater than left. Numbness and ting; Physical Therapy and home therapy exercises.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	DEGENERATIVE OSTEOARTHRITIC changes which include loss of the normal lordotic curvature of the neck, bilateral muscle spasms and tenderness to palpation, and limited range of motion in extension, flexion and rotation though most pronounced in extension., ; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; 2 views of the cervical spine. Moderate degenerative disease at multiple levels with bone stimulator Zatz the 56. The bilateral rod and screw fixation appears to be in good position no evidence of hardware migration or failure. There is soft tissue sha; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Degenerative Spondelosis; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness and tingling down the left arm; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	establish cause of neurological sx; This study is being ordered for a neurological disorder.; 2014; There has been treatment or conservative therapy.; head tremor; pain; numbness and tingling of upper extremities and h/a; PT; steroid treatment and pain meds	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Exam Findings Details Musculoskeletal Comments ROM of neck is mildly limited in all directions. R grip is ok but r arm flexion is markedly weaker than the left arm. DTR;s are ok of both arms bicep and tricep are 2+ bilat. REFERRAL TO NEUROSURGEON.; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; WEAKNESS IN RIGHT ARM,WEAK GRASP,RIGHT UPPER ARM PAIN AND DECREASED ROM IN RIGHT SHOULDER,HX OF PRIOR ROTATOR CUFF REPAIR X 2,HX OF PARTIAL TEAR OF BICEP MUSCLE ON RIGHT SIDE.Exam Finding ROM of neck is mildly limited in all directions. R grip is ok bu; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	has a lipoma that has been noted to be compressing spine in 2012, more and more numbness as well as pain, decreased strength in left side, Neck pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; has a lipoma that has been noted to be compressing spine in 2012, having more and more numbness as well as pain, decreased strength in left side, history of abnormal mri(unsure of date); It is not known if there has been any treatment or conservative therapy.; decreased strength in left side, Neck pain, numbness and pain due to this lipoma on back,	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	has been to PT, chiropractor, and still hurting; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness in neck goes to right shoulder; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Injured sine several years ago, reinjured it and requesting MRI as x ray won't help; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.; <Enter Additional Clinical Information>	3
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.; Neck pain, wanted to try injections but pain management would not see her without a new MRI, tender in right posterior neck musculature	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	It is not known if the patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.; patient is still having neck pain after a car wreck in january	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Motor strength decreased. Headaches as well. MD wants to r/o ischemic/CAD. A lot of neurological symptoms going on.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/24/2016; There has been treatment or conservative therapy.; Pt experiencing lower extremity weakness, Weakness BILAT, nausea and numbness and tingling in neck. Unsteady gain, unable to ambulate. Difficulty putting her thoughts together. Having trouble lifting her legs and she faints. EKG show tachycardia; She has been to 3 different ER's Labs, fluids. Pain meds.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	MRI of the c spine without contrast dated 07/12/2016 shows hyperintense signal within the cord at C3 and questionably at C4. Possibility of demyelinating process is raised.; This study is being ordered for a neurological disorder.; 6 months without relief from steroids, PT and anti-inflammatory meds; There has been treatment or conservative therapy.; weakness in upper extremities; NSAIDS	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	N/A; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 5/26/16; There has been treatment or conservative therapy.; tenderness and pain all the way to lumbar; HOME THERAPY AND MEDS	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	N/A; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/21/2016; There has been treatment or conservative therapy.; Acute onset of neck pain, numbness and tingling going down the right arm, weakness in right arm, unable to raise right shoulder above horizontal, and weak grip strength in right arm.; Inseeds, pain reliever, and attempted chiropractic care.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	neck is stiff; BIL TRAP MS TENDERNESS  RESPIRATORY: normal breath sounds with no rales, rhonchi, wheezes or rubs;  CARDIOVASCULAR: normal rate and rhythm without murmurs;  MUSCULOSKELETAL: Crepitus, Tenderness, Effusion: tenderness noted in the left tr; This is a request for cervical spine MRI; Trauma or recent injury; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Neck pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 4/7/2016; There has been treatment or conservative therapy.; Low back pain; Medications	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	need test to refer to neurosurgery, tenderness along spine, gait antalgic; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; moderate to severe mid thoracic, lumbar and neck pain; numbness in extremities, problem is worsening, no radiation, aggravated by bending forward and daily activities.; PT, pain meds	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	no known injury. anti-inflammatories have not helped x 3 months.; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; patient with significant pain in bilateral arms. decreased range of motion and diminished sensation.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	None; This study is being ordered for a neurological disorder.; 12/2/2015; There has been treatment or conservative therapy.; Pt has occasional loss of vision., painful and swollen joints, difficulty swallowing. Pt has numbness in hands and feet, nausea, shortness of breath.; Pt tried PT. medication therapy	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	None; This study is being ordered for a neurological disorder.; Several yrs; There has been treatment or conservative therapy.; Chronic H/A blurred vision weakness vomiting; Cervical fusion pain management visits chiari malformation surgery	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	none; This study is being ordered for a neurological disorder.; x 7 years; There has been treatment or conservative therapy.; Headaches which are severe, Stiffness in base of neck, weakness and tingling in arms, Syncope.; MEDS!!	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Several yrs; There has been treatment or conservative therapy.; Numbness in lower legs back pain radiating to neck numbness in hands H/A; S/P surgery injections rx medication	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	None; This study is being ordered for trauma or injury.; August 2015; There has been treatment or conservative therapy.; neck and back pain with radiculopathy in legs; NSAID's, heat and ice	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Pain in her shoulder, starts in the neck down to her fingertips, numbness in shoulder, feels like burning pain, worse when she shrugs and certain positions; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	pain in neck and back/numbness and tingling in legs no improvement after naproxen and tramadol since 3/28/2016; This study is being ordered for a neurological disorder.; 09/04/2015, 3/28/16, 3/31/16 and 9/15/16; There has been treatment or conservative therapy.; neck and back hurting with radiating symptoms into arms and down into legs; medication started 3/28/16 tramadol and naproxen	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	PAIN RADIATES FROM NECK TO LOWER BACK FOR A YEAR, HAS NOT GOTTEN ANY BETTER WITH TREATMENT. PT DOES PHYSICAL LABOR.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 5/26//2016; There has been treatment or conservative therapy.; PAIN AND TENDERNESS RADIATES FROM NECK TO BACK; STERIOD INJECTION AND PACK, NAPROXEN, FLEXIRIL, PAIN MEDS, NSAIDS	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 06/2016; There has been treatment or conservative therapy.; weakness , pain , tingling numbness radiating; Pt , medication	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Patient has had physical therapy without relief. Symptoms are worse with physical therapy.; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Decreased grip strength bilateral upper extremities.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Patient is a candidate for epidural steroid injections.; This study is being ordered for a neurological disorder.; 12/2015; There has been treatment or conservative therapy.; Burning sensation in the right arm and hand. Numbness of the right side of the chin and of the right arm. Neck pain on the right and radiatind down the right arm. Lower back pain radiating to the right buttock, to the legs worse on the right, and chronic ; Physical Therapy-which isn't helping. Chiropractic Therapy-which didn't help.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	PATIENT WAS DIAGNOSED WITH DDD IN 2010. SHE RECENTLY FELL WORSENING PAIN.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11-2010; There has been treatment or conservative therapy.; NECK PAIN WITH RADICULOPATHY AND LUMBAR PAIN WITH SCIATICA; TRAMADOL, FLEXERIL, VOLTAREN	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Patient with continued neck pain. Has tried IBU and Tylenol without relief. Patient has also tried Physical Therapy, Flexeril, and Naproxen without relief. C-Spine X-ray shows degenerative changes. Need further evaluation of neck pain with MRI.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Pt has a h/x of brain tumor,; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	pt has been complaining of neck pain since 4/16. symptoms have continued to increase. PT was little help; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; decreased mobility, joint instability, muscle weakness, extremity weakness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Pt is in pain and she has already had a ct and now they are requesting an mri and she had an x-ray and they could not see anything; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has NOT had back pain for over 4 weeks.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Pt is loosing strength in her arm; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pt has numbness and weakness in left arm to the point she cant even lift it sometimes. Pt has had surgery in the past on lumbar region; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if there is x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	PT made neck worse. Weak grip in both hands; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 2014; There has been treatment or conservative therapy.; Chronic neck and back pain, numbness and tingling; PT	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Ruling out foraminal and central stenosis; This study is being ordered for a neurological disorder.; 8/17/2016; There has not been any treatment or conservative therapy.; Severe headaches, right side neck pain, dizziness and nausea	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Surgical Evaluation.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; May 2016; There has not been any treatment or conservative therapy.; Headaches. Paresthesias BUE & BLE	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; It is not known if this patient had a recent course of supervised physical Therapy.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	2

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.	47
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; It is not known if this patient had a recent course of supervised physical Therapy.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.	16

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	<p>The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.</p>	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	<p>The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.; &lt;Enter Additional Clinical Information&gt;</p>	2

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.; Patient is status post breast cancer. Has been having neck and shoulder pain	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; No, the patient did not have six weeks of Chiropractic care related to this episode.; Steroids,	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; No, this patient did not have a recent course of supervised physical Therapy.; Yes, the patient had six weeks of Chiropractic care related to this episode.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; No, this patient did not have a recent course of supervised physical Therapy.; It is not known if the patient had six weeks of Chiropractic care related to this episode.;	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient is not presenting new symptoms.; This study is being ordered for follow-up.; This is a request for cervical spine MRI; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; It is not known when the last cervical spine MRI was performed.; Known Tumor with or without metastasis; <Enter Additional Clinical Information>	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	The patient is not presenting new symptoms.; This study is being ordered for follow-up.; This is a request for cervical spine MRI; "The patient is being seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist."; The last cervical spine MRI was performed within the last 6 months.; Known Tumor with or without metastasis; Patient had MRI Cervical spine without contrast and there were abnormal findings needing further evaluation with contrast. Impression: Extramedullary intradural mass is noted at the level of C1 just right of the cervical  cord and produces mass effect	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; Follow-up to Surgery or Fracture within the last 6 months	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.	2
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is x-ray evidence of a recent cervical spine fracture.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	10
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; Yes, there is evidence of recent development of unilateral muscle wasting.	2
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; yes, there is a documented evidence of extremity weakness on physical examination.	246
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; It is not known if there has been a supervised trial of conservative management for at least six weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Known or Suspected Multiple Sclerosis, Infection or abscess; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.; yes, there are documented clinical findings of Multiple sclerosis.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; concerned that how the patient has been sleeping has disturbed at the C2 level. The numbness is a parenthesis resulting from this. Left side of scalp has remained numb for over a week. Pain and discomfort on her scalp with no evidence of blisters or anyth; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; HAS RADIATING PAIN TO HIS 3RD AND 4TH DIGIT AND LOSS OF LIGHT TOUCH IN THIS AREA, NUMBNESS, TINGLING, MUSCULOSKELETAL TENDERNESS. NERVE CONDUCTION STUDY-NORMAL BILATERAL NCV/EMG OF BOTH ARMS; RECOMMENDED C SPINE MRI TO R/O CERVICAL RADICULOPATHY; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; Yes, the patient is experiencing new onset of parathesia diagnosed by a neurologist.; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Neurological deficits; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	64

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; None of the above; <Enter Additional Clinical Information>; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; None of the above; ; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	<p>This is a request for cervical spine MRI; None of the above;</p> <p>2. Mild inferior descent of the cerebellar tonsils (5 mm) below the foramen magnum; this is consistent with a very mild Chiari I malformation. MRI of the cervical spine is recommended to exclude a cervical spinal cord syrinx, which can be seen in associat; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.</p>	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	<p>This is a request for cervical spine MRI; None of the above;</p> <p>No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; Yes, the patient is experiencing or presenting x-ray evidence of a recent fracture.</p>	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; None of the above; severe headache; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; None of the above; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	2
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; None of the above; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	4
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Pre-Operative Evaluation; No, the last Cervical spine MRI was not performed within the past two weeks.	4
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; It is not known if the patient demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Yes, this patient had a recent course of supervised physical Therapy.	44
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; Yes, this patient had a recent course of supervised physical Therapy.	11
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.;	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; <Enter Additional Clinical Information>	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; abnormal x-ray, showed narrowing, increased density in facet joints, neck pain radiates to shoulder and neck,	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; increased neck and back pain	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Joint pain, multiple sites with swelling in neck and left arm. Will get mri for radicular sx's, no improvement with flexeril and tramadol. Continue nsaid's.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Patient also having some pain in middle of right buttock radiating into right hip. Worse when sitting	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Patient prior neck surgery and has grinding when turning her neck.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; Rx medication	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; No, the patient does not demonstrate neurological deficits.; X-ray of the c-spine shows significant disc space narrowing between c-5 and c-6.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There has not been a supervised trial of conservative management for at least 6 weeks.; Acute or Chronic neck and/or back pain; Yes, the patient demonstrate neurological deficits.; No, there is not a documented evidence of extremity weakness on physical examination.; No, there is no evidence of recent development of unilateral muscle wasting.; <Enter Additional Clinical Information>	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; There is evidence of tumor or metastasis on a bone scan or x-ray.; Suspected Tumor with or without Metastasis	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; <Enter Additional Clinical Information>; No, the patient does not have new or changing neurological signs or symptoms.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; Car accident October-November 2015  Has been having neck pain since the accident; No, the patient does not have new or changing neurological signs or symptoms.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; Patient had mva on 07/22/2016 not getting better.; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; No, the patient is not experiencing or presenting x-ray evidence of a recent fracture.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; Yes, the patient have new or changing neurological signs or symptoms.; No, the patient is not experiencing or presenting new symptoms of upper extremity weakness?; No, the patient is not demonstrating unilateral muscle wasting.; No, the patient is not experiencing or presenting new symptoms of Bowel or bladder dysfunction.; No, the patient is not experiencing new onset of parathesia diagnosed by a neurologist; Yes, the patient is experiencing or presenting x-ray evidence of a recent fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is a request for cervical spine MRI; Trauma or recent injury; Yes, the patient have new or changing neurological signs or symptoms.; Yes, the patient is experiencing or presenting new symptoms of upper extremity weakness.	18
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This is secondary insurance. His primary insurance has approved this study.; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Patient with chronic neck pain, worsening after gym injury 3 months ago. Has radiculopathy going into left shoulder. He has tried medications and physical therapy and has failed them. Need CT of cervical spine to further evaluate.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	This study is being ordered for staging.; This is a request for cervical spine MRI; Known Tumor with or without metastasis; The patient has been seen by or is the ordering physician an oncologist, neurologist, neurosurgeon, or orthopedist.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	to evaluate pain; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Conservative measures, including PT have failed. Replace Ibuprofen with Tylenol OTC numbness tingling and weakness; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	To evaluate the neuropathy and weakness; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7/14/2016; There has been treatment or conservative therapy.; Pt c/o cervical pain, weakness and numbness in L arm and hands. Chronic back pain, R Leg weakness and numbness with R foot drop.; 6 x weeks of PT and RX	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	to r/o chiari malformation; This study is being ordered for a neurological disorder.; 8/3/2016; There has been treatment or conservative therapy.; nausea vomiting dizziness blurred vision weakness bilateral arm parathesia Chronic pain; Ibuprofen naproxen flexeril bupapa	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Traumatic head injury less than 3 months ago, sequela Cervical spine pain Post-traumatic headache, not intractable, unspecified chronicity pattern Subjective visual disturbance Acute midline low back pain without sciatica Thoracic spine pain; This is a request for cervical spine MRI; Acute or Chronic neck and/or back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Traumatic head injury less than 3 months ago, sequela Cervical spine pain Post-traumatic headache, not intractable, unspecified chronicity pattern Subjective visual disturbance Acute midline low back pain without sciatica Thoracic spine pain; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	Unknown; This is a request for cervical spine MRI; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness in the L; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; There is not x-ray evidence of a recent cervical spine fracture.	1
General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	unknown; This study is being ordered for a neurological disorder.; 03/14/2016; There has been treatment or conservative therapy.; neck, back, and left shoulder pain; PT, medications	1

General/Family Practice	Approval	72141 MRI CERVICAL SPINE OR NECK SPINE WITHOUT CONTRAST	unsteady gait d/t right lower extremity weakness.; This study is being ordered for trauma or injury.; initially 2012  worsen since 7/4/2016; There has been treatment or conservative therapy.; weakness of right lower and upper extremity with C-spine and L-spine pain.; Physical Therapy  Gabapentin  anti-inflammatory  muscle relaxant	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST		5
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits."	2
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is not experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits.";	1

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is not experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits."; Mid upper back pain that radiates up neck x 1 year, PT states has had a previous MRI 2 years ago that showed a cyst on vertebra. PT states numbness and tingling to 4th and 5th finger of right hand.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	There are no documented clinical findings of immune system suppression.; This is a request for a thoracic spine MRI.; The patient is not experiencing back pain associated with abdominal pain.; The caller indicated the the study was not ordered for: Chronic Back pain, Trauma, Known or suspected tumor with or without metastasis, Follow up to or Pre-operative evaluation, or Neurological deficits."; radicular left leg pain and weakness of the upper leg. She notes some pain relief with rest and NSAIDs. Medical history is significant for 8/2016 MRI lumbar: minimal bulging disc at L4-5.	1

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; It is not known how many follow-up thoracic spine MRIs the patient has had.; It is not known if there has been a supervised trial of conservative management for at least six weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; Patient had an MRI of the T-Spine in 1987 in Fort Smith with ruptured disc at L4-L5 without surgery.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; <Enter Additional Clinical Information>; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; ; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; Abnormal MRI of the Lumbar Spine shows Disc desiccation at T11-12 as well as annular tear of T12. Palpation of thoracic facet joints at T4-5, T5-6, and T6-7 levels reproduced back pain. Midline palpation and percussion of mid thoracic spine reproduced; mi; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; None; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; patient with chronic back pain,x-ray shows degerative disk disease. patient attempted physical therapy. did not help with the pain; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of abnormal gait.	10

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of asymmetric reflexes.	2
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.	3
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing or presenting symptoms of recent fracture on previous imaging studies.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is not experiencing sensory abnormalities such as numbness or tingling.; ; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to chronic back pain or suspected degenerative disease.; unknown; The patient is experiencing or presenting symptoms of lower extremity weakness documented on physical exam.	1

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to trauma or acute injury within 72 hours.; The patient is experiencing or presenting symptoms of abnormal gait.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does have neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	7
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; The patient has had 3 or fewer thoracic spine MRIs.; It is not known if there has been a supervised trial of conservative management for at least six weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	1

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; The patient has failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; The patient has had 3 or fewer thoracic spine MRIs.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	5
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; The patient has not failed a course of anti-inflammatory medication or steroids.; This is a request for a thoracic spine MRI.; There has not been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.; <Enter Additional Clinical Information>	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to trauma or acute injury within 72 hours.;	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to trauma or acute injury within 72 hours.; Pt has compression fracture seen on X-ray at T-12.	1

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; The study is being ordered due to trauma or acute injury within 72 hours.; Upper back pain worried for compression fx   limited active ROM with extension, flexion, left lateral bending, right lateral bending, left rotation, and right rotation;  Positive for back pain (acute; low).	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	The patient does not have any neurological deficits.; This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to chronic back pain or suspected degenerative disease.	25
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; "The patient has been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; The study is being ordered due to follow-up to surgery or fracture within the last 6 months.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; "The patient has not been seen by, or the ordering physician is, a neuro-specialist, orthopedist, or oncologist."; This is not a continuation or recurrence of symptoms related to a previous surgery or fracture.; There is a known condition of neurological deficits.; The study is being ordered due to follow-up to surgery or fracture within the last 6 months.; The patient is experiencing or presenting symptoms of abnormal gait.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	1

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	4
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of abnormal gait.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of radiculopathy documented on EMG or nerve conduction study.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; The study is being ordered due to Neurological deficits.; The patient is experiencing or presenting symptoms of recent fracture on previous imaging studies.	1

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; There has been a supervised trial of conservative management for at least 6 weeks.; The study is being ordered due to Neurological deficits.; The patient is experiencing sensory abnormalities such as numbness or tingling.; The patient is not experiencing or presenting symptoms of abnormal gait, lower extremity weakness, asymmetric reflexes, fracture, radiculopathy or bowel or bladder dysfunction.	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; There is evidence of tumor or metastasis on a bone scan or x-ray.; The study is being ordered due to suspected tumor with or without metastasis.	4
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	This is a request for a thoracic spine MRI.; There is no evidence of tumor or metastasis on a bone scan or x-ray.; The study is being ordered due to suspected tumor with or without metastasis.; abnormal c-spine mri. Possible mass at T2 involving nerve root	1
General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; four months ago; There has been treatment or conservative therapy.; pain, radiculopathy in left thigh,; pt	1

General/Family Practice	Approval	72146 MRI THORACIC SPINE CHEST SPINE UPPER BACK WITHOUT CONTRAST	xrays of lumbar did not reveal the cause of pain, pain has continued and has worsened,pt now experiencing radiation of pain down legs b/l; This study is being ordered for a neurological disorder.; unknown; There has been treatment or conservative therapy.; mid to low back pain that radiates down thighs b/l, lumbar tenderness with some limitation of AROM due to pain, xrays performed in march of 2016 within normal limits; pain medications and anti-inflammatories	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST		46
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Document exam findings; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; It is not known if the patient has new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.;	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.;; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Associated symptoms include radicular left leg pain and numbness in the left buttock, left thigh, left lower leg, and left foot.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; back pain that radiates to extremities. OTC medicine has not helped. Has gotten worse over last several months.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; It is not known if there is x-ray evidence of a lumbar recent fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; decreased ROM in the back; pain with ROM of the back; pain with ROM of right hip;; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; limited range of motion due to pain and muscle spasms of the lower lumbar spine, there is moderate tenderness over the SI joints bilaterally, there are no focal point tender areas. BILATERAL MUSCLE SPASMS and knots of the paraspinous musculature with mode; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; peripheral neuropathy in both feet swelling of legs and feet pain down legs; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Sciatica noted. The discomfort is most prominent in the lower, right lumbar spine. This radiates to the right anterior thigh. He characterizes it as intermittent, moderate in intensity, and sharp. This is a chronic, but intermittent problem with an ac; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness on dorsiflexion of right foot; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did not include exercise, prescription medication and follow-up office visits.; Hydrcodone	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.;	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	10
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for a neurological disorder.; ; There has been treatment or conservative therapy.; ;	2
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; ; There has been treatment or conservative therapy.; ;	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 07/26/2016; There has been treatment or conservative therapy.; back pain, l lower leg numbness, pain in L arm.; Physical therapy	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6/27/16; There has been treatment or conservative therapy.; Numbness, tingling in arm, pain in the left arm, tingling in the left leg; PT and medication	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; PT HAS HAD THIS CONDITION SINCE BEFORE SHE BECAME OUR PT IN 2011.; There has been treatment or conservative therapy.; NECK AND LOW BACK PAIN WITH NUMBNESS IN RIGHT ARM AND SCIATICA IN R LEG; PT HAS UNDERGONE PHYSICAL THERAPY AND ANTI-INFLAMMATORY THERAPY	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; ; There has not been any treatment or conservative therapy.;	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	; This study is being ordered for trauma or injury.; Patient has had blunt force trauma to head and neck many years ago that resulted in facial fractures and significant whiplash. In addition, he had a diving accident that injured his neck and spine years ago as well.   He also has significant rotoscolio; There has been treatment or conservative therapy.; Radiculating pain, Pain in neck, Limited Range of Motion, Change in ambulatory gait; Patient has spent more than six weeks in Physical  Therapy and has used Chiropractic Therapy	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	2 views of the lumbosacral spine. Moderates multilevel degenerative disc disease with mild facet hypertrophy at multiple levels. 3 mm spondylolisthesis at L5-S1 with S1 osteophyte producing radiographically neural foraminal compromise. No evidence of f; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; BACK: BILATERAL MUSCLE SPASMS and knots of the paraspinous musculature with moderate tenderness, limited range of motion due to pain and muscle spasms of the lower lumbar spine, there is moderate tenderness over the SI joints bilaterally, there are no foc; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	34 yr old female that was in MVA, CT done; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	abdominal pain low back pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Abnormal ct scan; has a disc protrusion on the rt at L4/5; has a schmorls node @L5; radicular pain; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Abnormal gait; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pt has tingling. Left leg weakness.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Abnormal Xray:2 views of the cervical spine. There is 4 mm spondylolisthesis of C4 and C5 severe disc space narrowing anterior vertebral body endplates calcification osteophyte formations just anterior bulge. Degenerative disc spondylolisthesis and post; This study is being ordered for trauma or injury.; 7/24/16; There has been treatment or conservative therapy.; Neck pain with numbness and tingling in bilateral upper extremities. Limited range of motion in neck.; Low back pain with limited range of motion. Pain radiates down bilateral lower extremities with burning sensations in feet and tingling/numbness noted; Anti-inflammatory medications and physical therapy.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Associated symptoms include radicular bilateral leg pain and weakness of the left lower leg. patient states that she has had numerous falls in the last few months.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Associated symptoms include radicular bilateral leg pain and weakness of the left lower leg. Patient has had numerous falls in the last few months.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Back pain, positive straight leg raise on right, little progress with PT, active painful range of motion, tearing pain; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	back pain; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Chiropractic care; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.; Straight leg raise positive	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Chronic back pain, pain radiating to back of left leg(s), worsening (some days but it is constant pain); interference with sleep; interference with work, movement/positioning; bending over; twisting; standing; activity; riding in a car, previous medicatio; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	CHRONIC LOW BACK PAIN WITH SCIATICA AND PARASTHESIA; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; It is not known if there is x-ray evidence of a lumbar recent fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Chronic low back pain. Has tried physical therapy and taking medications and reduced to light activity with no change.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Chronic neck, mid back, and low back pain. Pain radiating from cervical spine through both shoulders intermittently. Pain across thoracic spine radiates down through both buttocks and hips into lower extremities, right greater than left. Numbness and ting; This study is being ordered for a neurological disorder.; 07/2011; There has been treatment or conservative therapy.; Chronic neck, mid back, and low back pain. Pain radiating from cervical spine through both shoulders intermittently. Pain across thoracic spine radiates down through both buttocks and hips into lower extremities, right greater than left. Numbness and ting; Physical Therapy and home therapy exercises.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	continues to experience pain on movement, unable to sit long; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	degenerative disc disease on mri in the past in lumbar spine with radicular pain and numbness going down the left leg; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; HAS BEEN HAVING SEVERE BACK PAIN FIR THE PAST 5 YRS, HAS BEEN TREATED AT THIS FACILITY SINCE 8/2015; SOLITARY NODULE RIGHT LUNG ON CT 8/2015; There has been treatment or conservative therapy.; NO LUNG SYMPTOMS; increasing pain in his back going down the left leg. goes into the back of the thigh and into the calf. numbness, tingling, and weakness (left leg). EXAM: Musculoskeletal: Motor Strength and Tone: normal. Joints, Bones, and Muscles; PT HAS BEEN SEEING PAIN MGMT, TAKEN PAIN MEDICATION, NO BOWEL OR BLADDER PROBLEMS	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	DTR's equal LE bilaterally, hyperesthesia left lateral lower leg, negative straight leg raise bilaterally and motor 5/5 LE bilaterally.; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Failed outpatient PT and nsaid; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Numbness and tingling in both legs with right leg swelling.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	going on for 3 weeks. regular therapies have been done as well as x-ray. lumbar sacral pain; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Had MRI was abnormal. Need recent MRI in order to see Neuro surgeon; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has not seen the doctor more then once for these symptoms.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	has had previous back surgery in 2014, has done 3-4 weeks of PT but therapist discontinued PT due to increasing pain and popping in back, she does have radiculopathy(tingling, numbness down legs); The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more than once for these symptoms.; It is not known if the physician has directed conservative treatment for the past 6 weeks.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	history of L5 fracture. numbness in his right leg. had to go to ER. tried physical therapy, but had to quit because way too painful.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	hx of DDD, acute on chronic LBP with persistent LLE radiculopathy with LLE extremity weakness and abnormal reflexes despite 4 months of chiropractic therapy after a fall from height while skating; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; There is weakness.; hx of DDD, acute on chronic LBP with persistent LLE radiculopathy with LLE extremity weakness and abnormal reflexes despite 4 months of chiropractic therapy after a fall from height while skating; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	increasing pain and muscle spasm, back for 6 months, numbness is getting worse. Had tried physical therapy and chiropractor and NSAIDS but it's not helping. Symptoms are getting worse.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6 months ago; There has been treatment or conservative therapy.; back pain and numbness and muscle spasms; increasing pain and muscle spasm , back , 6 months numbness is getting worse had tried physical therapy & chiropractor , not responding tried NSAIDS ,more than 6 months , not responding symptoms are getting much worse , now suspected herniated disc affect	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	LBP from MVA; The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; The patient has none of the above.; This procedure is being requested for Trauma or recent injury	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	limited ROM (lumbar spine) and tenderness (lumbar spine and paraspinal muscles).; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; limited ROM (lumbar spine) and tenderness (lumbar spine and paraspinal muscles).; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	low back for over a year , physical therapy, taking medication , pain scale 10 out of 10 ,; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Low back pain , radiating for lower extremities; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Low back pain, radiating to the buttocks and legs.  Failed conservative therapy. Worsening symptoms  Numbness and tingling; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	low back pain, worsening, had for a few months, worse at night, weaskness; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; ; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Lumbar disc disease with radiculopathy, Worse, Has been doing PT for several weeks and NSAIDS without improvement. Will get MRI of L-spine to further evaluate. Further diagnostic evaluations ordered today include(s) MRI LUMBAR SPI; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	lumbar pain and radiculopathy since having epidural with last child; paresthesia in lower legs that worsens with prolonged sitting ; decreased rom in back ; hypoesthesia in bilat S1 S2 distribution;otc icy hot and back brace not helping pain; LOW BACK exa; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; It is not known if the patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	lumbar radiculopathy; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	MD wants to r/o bulging disc; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	medical history of spinal stenosis; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	morbidity obese; will send PT eval; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	MRI requested due to chronic back pain and abnormal CT scan findings; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	MRI showing leg symptoms and left carpal tunnel.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	N/A; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 5/26/16; There has been treatment or conservative therapy.; tenderness and pain all the way to lumbar; HOME THERAPY AND MEDS	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	NA; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6 weeks ago; There has been treatment or conservative therapy.; Weakness and heaviness in arms and legs and pain with tenderness and numbness in upper and lower extremities; Pt is a physical therapist and has been on exercise therapy program for months for this problem	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	need test to refer to neurosurgery, tenderness along spine, gait antalgic; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; unknown; There has been treatment or conservative therapy.; moderate to severe mid thoracic, lumbar and neck pain; numbness in extremities, problem is worsening, no radiation, aggravated by bending forward and daily activities.; PT, pain meds	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	None.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness in LE-bilateral.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	None.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	None.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Faxing clinicals.; It is not known if there has been any treatment or conservative therapy.; Not avail.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	None; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; None; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	None; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness of the left leg; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	none; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has not directed a home exercise program for at least 6 weeks.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	NOne; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	None; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	None; This study is being ordered for a neurological disorder.; 12/2/2015; There has been treatment or conservative therapy.; Pt has occasional loss of vision., painful and swollen joints, difficulty swallowing. Pt has numbness in hands and feet, nausea, shortness of breath.; Pt tried PT. medication therapy	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	None; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; Several yrs; There has been treatment or conservative therapy.; Numbness in lower legs back pain radiating to neck numbness in hands H/A; S/P surgery injections rx medication	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	numbness  Onset was 2 months ago. Location of numbness is bilateral foot. The problem occurs constantly. Associated symptoms include paresthesia and tingling. Pertinent negatives include ataxia, dizziness, falling, headache, motor weakness and visual; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Numbness and tingling in feet; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Spinal stenosis; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Numbness Tingling; This study is being ordered for a neurological disorder.; June 14, 2016; There has been treatment or conservative therapy.; T-Spine: Tenderness Pain with motion L Spine: Tenderness Decreased range Moderate pain; Medication	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Numbness, tingling, and pain in his leg, he stepped in a hole; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Onset 4/2016 pain is interfering with walking pt has hypertension Tylenol Aleve; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	pain in neck and back/numbness and tingling in legs no improvement after naproxen and tramadol since 3/28/2016; This study is being ordered for a neurological disorder.; 09/04/2015, 3/28/16, 3/31/16 and 9/15/16; There has been treatment or conservative therapy.; neck and back hurting with radiating symptoms into arms and down into legs; medication started 3/28/16 tramadol and naproxen	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	PAIN RADIATES FROM NECK TO LOWER BACK FOR A YEAR, HAS NOT GOTTEN ANY BETTER WITH TREATMENT. PT DOES PHYSICAL LABOR.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 5/26//2016; There has been treatment or conservative therapy.; PAIN AND TENDERNESS RADIATES FROM NECK TO BACK; STERIOD INJECTION AND PACK, NAPROXEN, FLEXIRIL, PAIN MEDS, NSAIDS	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	pain scale is 9/10. Pt had xray of T Spine that showed no bone destruction, mild multi level degenerative change. considered mri or bone scan for further evaul. no xray of L Spine.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; about 4 weeks ago; There has not been any treatment or conservative therapy.; Pt has back pain started about 4 weeks ago on the left side and radiating down legs, pain into ribs. h/x of colon cancer stage 3 and MDO is wanting to make sure it did not go elsewhere.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Pain to left mid to lumbar area. History of colon cancer. R/O METS. 8wks conservative care with no relief.; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	pain; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	2
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 06/2016; There has been treatment or conservative therapy.; weakness , pain , tingling numbness radiating; Pt , medication	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Palpation: pain elicited over the right lumbar paraspinal muscles; Neurovascular: deep tendon reflexes: 2/4 left patellar, 1/4 right patellar, 2/4 left Achilles, 0/4 right Achilles; Muscular Strength: 5/5 left and 2/5 right quadriceps; Range of M; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Palpation: pain elicited over the right lumbar paraspinal muscles; Neurovascular: deep tendon reflexes: 2/4 left patellar, 1/4 right patellar, 2/4 left Achilles, 0/4 right Achilles; Muscular Strength: 5/5 left and 2/5 right quadriceps; Range of M; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient admits to about 8 weeks of aggravating sciatica pain with L side weakness, trouble bearing weight and at times numbness.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient expresses concern that medicines do not work sufficiently and would like to evaluate additional options. States "I have 3 kids and am the bread winner in the house. I have to work". Patient is a candidate for epidural steroid injections.; This study is being ordered for a neurological disorder.; 05/2014; There has been treatment or conservative therapy.; Episodes of tightness and intermittent shooting pains throughout the upper and lower back. Upper back pain radiating to the scapula that worsens with bending and lifting. Mid-back and lower back pain chronic duration. Muscle spasms.; 7 weeks of Physical Therapy- with no lasting benefit.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient has a history of 4 previous back surgeries. Patient needs an MRI with and without contrast to determine if further surgical repairs are necessary.; This study is being ordered for a neurological disorder.; 2007; There has been treatment or conservative therapy.; Increasing numbness and tingling throughout her left upper extremity and burning with throbbing in the right lower extremity and foot. She is currently under the care of pain management for oral medication treatments. Radiating neck pain in trapezius and ; 6 weeks of Physical Therapy-which didn't help.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient has had no relief since initial fall. Given pain medication and bed rest order with no reliefs. She has been in the ER twice with worsening pain symptoms.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient has had on going back pain for 6 months now. Has done PT for 4 weeks, & has been taking NSAIDS for 6 months. Has progressively gotten worse, pain goes down her leg & has numbness & tingling; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has not completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.; Naproxen 500mg twide daily	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	patient has had PT, unable to complete due to pain, numbness; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient has shown no improvement since being on pain meds since 06/14/16-Patient barely able to walk due to severe pain; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Bilateral leg weakness w/abnormal gait; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	patient having pain into lower extremities has done medical management and physical therapy with no relief; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is no weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient is a candidate for epidural steroid injections.; This study is being ordered for a neurological disorder.; 12/2015; There has been treatment or conservative therapy.; Burning sensation in the right arm and hand. Numbness of the right side of the chin and of the right arm. Neck pain on the right and radiating down the right arm. Lower back pain radiating to the right buttock, to the legs worse on the right, and chronic ; Physical Therapy-which isn't helping. Chiropractic Therapy-which didn't help.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	patient is unable to bend at the waist and it is interfering with work and sleep due to pain.; This study is being ordered for trauma or injury.; 4/27/2016; There has been treatment or conservative therapy.; mid and lower back pain with sciatica, positive leg raise test.; steroid injections, steroid dose packs,Nsaids	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient radiculopathy running down his leg; lbp and cramping radiating down his rt leg; pain x 1mo but much worse over the past week; been to the ER; leg weakness; tenderness to palpitation; very pain lumbar movement; given medications; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient states that he sees the chiropractor often and has gone to physical therapy. Still not any better. Is wanting to get his back "fixed." 2011 had MRI none since. States his pain is in low back, small motions make it worse. States pain is there al; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	PATIENT WAS DIAGNOSED WITH DDD IN 2010. SHE RECENTLY FELL WORSENING PAIN.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 11-2010; There has been treatment or conservative therapy.; NECK PAIN WITH RADICULOPATHY AND LUMBAR PAIN WITH SCIATICA; TRAMADOL, FLEXERIL, VOLTAREN	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Patient was evaluated for a headache, accompanied by nausea and dizziness. Had a lumbar puncture within the past month. G97.0; The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for None of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	patients low back pain was made worse with use of chiropracty and massage therapy muscle relaxer not help pain just made pt sleepy.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Pt had a CT of Pelvis done showing a herniated disc; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; It is not known if the patient has had back pain for over 4 weeks.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Pt has HX of CVA w left LE weakness; The study requested is a Lumbar Spine MRI.; Neurological deficits; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; It is not know if the patient has seen the doctor more then once for these symptoms.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	pt having sharp,shooting pain, pain scale is 9/10; aggravated by almost any movement; sitting, bending over, driving, getting in and out of car, getting out of a chair or bed has become difficult; failed past treatment: stretches, ibuprofen, lidocaine pat; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Pt is having disruption of her ADL's due to the pain, numbness and weakness in her lower extremities and lumbar pain.; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Pt is having weakness in both lower extremities due to numbness, positive straight leg raise on both sides; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Pt is having intractable pain that was worsened by physical therapy and schedule 2 pain medication is not giving her relief; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	R/) worsening of his bulging disc; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; weakness on flexion and extension; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Radiculopathy, lumbar region, arthritis in his back. with radicular pain into the left hip. after he has been seated for a while or kneels and stands the pain lasts al day. Has trouble finding a position to sleep in. worse during work days,; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	radiculopathy, numbness and tingling; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Requesting MRI to evaluate patients pain and symptoms before continuing with additional injections and procedures.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 5-31-16; There has been treatment or conservative therapy.; numbness and weakness in upper and lower extremities; Medication Therapy,Lumbar Medial Branch Blocks and other injections, home exercise program and physical therapy	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	see scanned OVs; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 12/13/2012; There has been treatment or conservative therapy.; Chronic back pain; Spine MD, Narcotic and Anti-inflammatory PO medications, Therapy @ home, Steroid Injections	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Severe pain and numbness in lower back and thoracic area.; This study is being ordered for a neurological disorder.; 07/08/2016; There has not been any treatment or conservative therapy.; Medication therapy dose pack	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	She is having numbness in her left lateral thigh and some low back pain and feels weak in that leg at times. No saddle anesthesia and no incontinence.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Surgical Evaluation.; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; May 2016; There has not been any treatment or conservative therapy.; Headaches. Paresthesias BUE & BLE	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	symptoms are worsening , decreasing range of motion in right hip,; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Taking medication for a long time; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with oral analgesics.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; Home treatment started over 1 year ago	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	tenderness; mildly at the LS spine spinous processes, more so at the bilateral SI joints. SLR is positive on the right. ROM of the back is decreased on extension, a TENS unit was ordered, concerned may have spinal spinal stenosis; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Tests are needed to rule out disc herniation and avascular necrosis.; This study is being ordered for a neurological disorder.; 02/2016; It is not known if there has been any treatment or conservative therapy.; Lower back pain on the right, radiating to the legs (worse on the right), and chronic duration. Tingling of the right leg. The lower back exhibited minimal tenderness on palpation. Range of motion is limited throughout the lumbar spine. Pain demonstrated	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	3
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; It is not known if the patient does have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; other medications as listed.; The patient has completed 6 weeks or more of Chiropractic care.; HYDROCODONE  FLEXERIL IBUPROFEN	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	11
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; It is not known if the patient has a new foot drop.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.	4
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is x-ray evidence of a recent lumbar fracture.	3
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	20

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient was treated with an Epidural.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for Neurologic deficits	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have a new foot drop.	5
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; The patient does have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.	2
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; None of the above; The patient does not have new or changing neurologic signs or symptoms.; The patient has had back pain for over 4 weeks.; The patient has seen the doctor more then once for these symptoms.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; The patient has Neurological abnormalities; This procedure is being requested for Trauma or recent injury	4
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; The patient has Symptoms or x-ray evidence of a recent fracture; This procedure is being requested for Trauma or recent injury	2
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Known or suspected tumor with or without metastasis	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient does NOT have acute or chronic back pain.; This procedure is being requested for Neurologic deficits	16
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	598

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal nerve study involving the lumbar spine	9
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has an Abnormal x-ray indicating a significant abnormality	164
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has completed Treatment with a facet joint or epidural injection in the past 6 weeks	12
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s)	389
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has acute or chronic back pain.; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection; The patient has 6 weeks of completed conservative care in the past 3 months or had a spine injection	3
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	The study requested is a Lumbar Spine MRI.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has acute or chronic back pain.; The patient has Neurological deficit(s); The patient has an Abnormal x-ray indicating a significant abnormality	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	This condition occurred without any known injury. Symptoms include back pain. Symptoms are located in the right lower back. The pain radiates to the thigh and lower leg. The patient describes the pain as sharp and stinging. The symptoms occur constantly. ; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	This is a recommended repeat MRI of the lumbar spine with and without contrast. The first MRI indicated an arachnoid lesion. Further study is required.; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	To evaluate the neuropathy and weakness; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7/14/2016; There has been treatment or conservative therapy.; Pt c/o cervical pain, weakness and numbness in L arm and hands. Chronic back pain, R Leg weakness and numbness with R foot drop.; 6 x weeks of PT and RX	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; It is not known if there is weakness or reflex abnormality.; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Unknown; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	2
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; This study is being ordered for a neurological disorder.; 03/14/2016; There has been treatment or conservative therapy.; neck, back, and left shoulder pain; PT, medications	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; This study is being ordered for a neurological disorder.; one month ago; There has not been any treatment or conservative therapy.; dull sensation and weakness in left leg, tightness and stiff muscle, speech difficult, light head,	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 6/1/2016; There has been treatment or conservative therapy.; acute pain in back down though the left hip, sharp pain in straight leg raises,; medications, steroid injections long and short acting, inflammatory ,	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; four months ago; There has been treatment or conservative therapy.; pain, radiculopathy in left thigh,; pt	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unknown; This study is being ordered for trauma or injury.; 09/01/2015; There has been treatment or conservative therapy.; Penile pain, curvature. Peyronie's disease.; Patient is being treated for Peyronie's disease	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	UNKNOWN; This study is being ordered for trauma or injury.; 6/15/2016; There has not been any treatment or conservative therapy.; JOINT PAIN, TINGLING, ACHING AND SHOOTING PAIN IN BOTH LEGS, MID AND LOW BACK PAIN	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Unkown.; The study requested is a Lumbar Spine MRI.; Neurological deficits; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; stiffness, numbness R thigh and weakness of legs; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	unsteady gait d/t right lower extremity weakness.; This study is being ordered for trauma or injury.; initially 2012; worsen since 7/4/2016; There has been treatment or conservative therapy.; weakness of right lower and upper extremity with C-spine and L-spine pain.; Physical Therapy; Gabapentin; anti-inflammatory; muscle relaxant	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Weakness; The study requested is a Lumbar Spine MRI.; Acute or Chronic back pain; The patient does have new or changing neurologic signs or symptoms.; There is weakness.; Weakness in the L leg, pain lower back, numbness, tingling L leg; The patient does not have new signs or symptoms of bladder or bowel dysfunction.; The patient does not have a new foot drop.; There is not x-ray evidence of a recent lumbar fracture.	1

General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Will fax in; The study requested is a Lumbar Spine MRI.; It is unknown if the patient has acute or chronic back pain.; This procedure is being requested for None of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Worsening back pain, failed treatment with NSAIDs, opiates, steroids and chiropractic care; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72148 MRI LUMBAR SPINE OR LOW BACK WITHOUT CONTRAST	Xray; The study requested is a Lumbar Spine MRI.; The patient has acute or chronic back pain.; The patient has none of the above	1
General/Family Practice	Approval	72192 CT PELVIS WITHOUT CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; The patient has painful hematuria.; The patient has not had an IVP.; This study is being ordered due to hematuria.; This is a request for a Pelvis CT.	2

General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has been treated with anti-inflammatory medication in conjunction with this complaint.	1

General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There has been a history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.	1
General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient has a documented limitation of their range of motion.	1
General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has experienced pain for greater than six weeks.	1

General/Family Practice	Approval	73221 MRI JOINT OF UPPER EXTREMITY	This is a request for an upper extremity joint MRI.; The patient does not have documented weakness or partial loss of feeling in the upper extremity.; There is no history of significant trauma, dislocation or injury to the joint within the past 6 weeks.; The patient does not have an abnormal plain film study of the joint.; The patient has not been treated with and failed a course of four weeks of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.; The patient has not experienced pain for greater than six weeks.; The patient has not been treated with anti-inflammatory medication in conjunction with this complaint.; This study is not being ordered by an operating surgeon for pre-operative planning.	1
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 07/19/2015; There has been treatment or conservative therapy.; Radiculopathy in the lumbar region with sciatica. Pain is radiating in lower back. Pt had recent xray that showed avascular necrosis on the right hip.; Pt has been on pain medication but is worsening.	1
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a foot CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.	3

General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a foot CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.	5
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a foot CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.	1
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a foot CT.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.	1
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is not a suspected infection of the hip.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient had an abnormal plain film study of the hip other than arthritis.; The patient does not have a documented limitation of their range of motion.	1

General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is not a suspected infection of the hip.; "There is a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient has a documented limitation of their range of motion.	3
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a hip CT.; This study is not being ordered in conjunction with a pelvic CT.; There is not a suspected infection of the hip.; "There is no a history (within the last six months) of significant trauma, dislocation, or injury to the hip."; There is not a suspicion of AVN.; The patient had an abnormal plain film study of the hip other than arthritis.; The patient has a documented limitation of their range of motion.	1
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is a preoperative or recent postoperative evaluation.	5
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is a history of lower extremity joint or long bone trauma or injury.	4
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is no suspicion of lower extremity bone or joint infection.; There is not a history of lower extremity joint or long bone trauma or injury.	1

General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is no suspicion of a lower extremity neoplasm, tumor or metastasis.; There is suspicion of lower extremity bone or joint infection.	4
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for a Lower Extremity CT.; This is not a preoperative or recent postoperative evaluation.; There is suspicion of a lower extremity neoplasm, tumor or metastasis.	3
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for an ankle CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.	3
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for an ankle CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.	5
General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for an ankle CT.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.	1

General/Family Practice	Approval	73700 CT LEG OR LOWER EXTREMITY	This is a request for an ankle CT.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.	1
General/Family Practice	Approval	73706 CT ANGIOGRAPHY LOWER EXTREMITY	Yes, this is a request for CT Angiography of the lower extremity.	11
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT		5
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a foot MRI.; The study is being ordered for foot pain.; The study is being ordered for chronic pain.; The patient has had foot pain for over 4 weeks.; The patient has been treated with anti-inflammatory medication for at least 6 weeks.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; It is not known if the ordering physician is an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; There is no symptom of locking,Instability, Swelling,Redness,Limited range of motion or pain.	4

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; It is not known if patient has completed and failed a course of conservative treatment.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; There is no symptom of locking,Instability, Swelling,Redness,Limited range of motion or pain.; No, patient has not completed and failed a course of conservative treatment.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	3
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; There has not been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >;	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for trauma or injury.; 6/06/2016; There has been treatment or conservative therapy.; decreased Range of motion, popping during moving, foot can not do heal to toe, muscle weakness, numbness.; steroids, medications, home exercise.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This is a request for a foot MRI.; The study is being ordered for foot pain.; The study is being ordered for chronic pain.; The patient has had foot pain for over 4 weeks.; No treatments are underway or completed.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; It is not known if patient has completed and failed a course of conservative treatment.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; It is not known if the patient has completed 6 weeks of physical therapy?; The patient has been treated with medication.; It is not known if the patient has completed 6 weeks or more of Chiropractic care.; It is not known if the physician has directed a home exercise program for at least 6 weeks.; ; The patient received medication other than joint injections(s) or oral analgesics.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; patient has been doing quad strengthening, patellar mobility exercises, icing, and compression. Taking NSAIDS since April. No relief and now has worsening pain.; The patient received oral analgesics.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; PATIENT WAS SENT HOME WITH BACLOFEN AND WAS TOLD TO TRY HOME EXERCISES. IF THIS DIDNT IMPROVE WE WOULD REQUEST AND MRI FOR FURTHER EVALUATION OR ORTHOPEDIC DOCTOR.; The patient received oral analgesics.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This is a request for an Ankle MRI.; Surgery or arthroscopy is not scheduled in the next 4 weeks.; The study is requested for ankle pain.; There is a suspicion of tendon or ligament injury.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This study is being ordered for trauma or injury.; ; There has been treatment or conservative therapy.; ;	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This study is being ordered for trauma or injury.; 06/24/2016; There has been treatment or conservative therapy.; Left foot and ankle pain x 2 weeks with swelling.; Tylenol, Dicofenac, ice and elevation.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	; This study is being ordered for trauma or injury.; Patient was involved in a four-wheeler accident last Saturday 8/6/2016. Patient has increasing pain in left knee and right foot. Patient has marked occult lesion of the dorsum of the forefoot on the right. X-rays are negative.; It is not known if there has been any treatment or conservative therapy.; Marked occult lesion of the dormus of the forefoot on the right. Left knee pain.	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	39 year old female patient w/ knee pain. Had injury 4 weeks ago. Xray was unremarkable. HEP, PT and steroids.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	55 yr old female patient w/ left foot pain. xray showed soft tissue swelling.; This is a request for a foot MRI.; The study is being ordered forfoot pain.; The study is being ordered for chronic pain.; The patient has had foot pain for over 4 weeks.; The patient has been treated with anti-inflammatory medication for at least 6 weeks.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Broken or cracked knee, decreased motion, pain level 6 out of 10; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a known mass.; The diagnosis of Mass, Tumor, or Cancer has not been established.; The patient has not had recent plain films, bone scan or ultrasound of the knee.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	INJURY WAS 2-3 MONTHS AGO AND WOULD LIKE TO RULE OUT A TORN MENISCUS D/T HX OF TORN MENISCUS 2 YEARS AGO,; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	knee brace and medications not helping; This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Pain greater than 3 days; It is not known if patient has completed and failed a course of conservative treatment.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Knee injury 9 months prior.; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Medial Meniscus Tear; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient has not completed 6 weeks or more of Chiropractic care.; The physician has directed a home exercise program for at least 6 weeks.; The home treatment did include exercise, prescription medication and follow-up office visits.; Patient did in home exercise with instructions and Anti-inflammatory's with no relief.; The patient received oral analgesics.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	N/A; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 7/11/2016; There has been treatment or conservative therapy.; Knee pain in bilateral knees, locking, and instability.; 6 weeks of PT, and medication	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	New right knee pain for 2 weeks with catches and locks up.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is not from a recent injury, old injury, chronic pain or a mass.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Pain for the past two week, Nsaids and elevation, ice and no improvement; This is a request for a foot MRI.; The study is being ordered forfoot pain.; The study is being ordered for acute pain.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	patient has had knee pain for 4 + weeks, some swelling; This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; It is not known if patient has completed and failed a course of conservative treatment.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	patient has knee pain and knee internal derangement; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; It is not known if patient has completed and failed a course of conservative treatment.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Patient with Right knee pain with effusion, positive McMurray test. suspect Meniscus Tear.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has not directed conservative treatment for the past 6 weeks.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	pt has bakers cyst which is causing pt pain.; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	Pt has swelling, pain, and decreased mobility, joint instability; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	PT SLIPPED AND FELL INJURED KNEE 2-3 WEEKS AGO, STILL SWELLING AND PAIN, CONCERNED WITH LIGAMENT TEAR, PT HAS BEEN TAKING PREDINSONE, TRAMADOIL, ROBAXIN.; This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	R/O meniscus tear, swelling, fluid on exam; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	sharp pain, worsening, has tried ibuprofen, Norco, Naproxen 500mg, tenderness on palpation of the medial joint line, medial McMurry test positive for pain, limping, pain with extension and flexion of the knee, lateral McMurry was negative; This is a request for a Knee MRI.; It is not known if patient had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	SUBJECTIVE:  CC:  Mr. Tiernan is a 46 year old White male. This is an established patient who presents with a new problem.. He presents with knee pain.   HPI:   Patient complains of knee pain. This is the left knee. for knee pain. This began ; This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Pain greater than 3 days; No, patient has not completed and failed a course of conservative treatment.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	The Pt has knee injury three weeks ago reinjured 08/04/2016. Pt cannot bear weight, pain, swelling. Pt had prior knee surgery. soft Tissue tenderness, LROM. Negative Pivot shift, x-ray normal.; This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is not scheduled in the next 4 weeks.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.	10
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.	16

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has been treated with and failed a course of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; This is not for pre-operative planning.; The patient does not have a documented limitation of their range of motion.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.	3
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.	5

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has a documented limitation of their range of motion.	15
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is a history of new onset of severe pain in the foot within the last two weeks.; The patient has an abnormal plain film study of the foot other than arthritis.; The patient does not have a documented limitation of their range of motion.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; "There is not a history (within the past six weeks) of significant trauma, dislocation, or injury to the foot."; There is not a suspected tarsal coalition.; There is not a history of new onset of severe pain in the foot within the last two weeks.; The patient does not have an abnormal plain film study of the foot other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; This is for pre-operative planning.; The patient does not have a documented limitation of their range of motion.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a foot MRI.; The study is being ordered for suspected fracture.; They had 2 normal xrays at least 3 weeks apart that did not show a fracture.; The patient has been treated with crutches for at least 4 weeks.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; It is not known if the ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Locking	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days	3
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is an orthopedist.; Suspected meniscus, tendon, or ligament injury	20
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Instability	19
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Limited range of motion	11
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Locking	3
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Swelling greater than 3 days	21

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.	3
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Limited range of motion; No, the member do not experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Locking; It is not known if the member experience a painful popping, snapping, or giving away of the knee.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.	3
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Swelling greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; No, the member do not experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Instability; Yes, the member experience a painful popping, snapping, or giving away of the knee.	27
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; No, the member do not experience a painful popping, snapping, or giving away of the knee.	2

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Limited range of motion; Yes, the member experience a painful popping, snapping, or giving away of the knee.	15
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Locking; Yes, the member experience a painful popping, snapping, or giving away of the knee.	15
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; It is not known if the member experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; No, the member do not experience a painful popping, snapping, or giving away of the knee.	4
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Swelling greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	16

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Instability	61
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Limited range of motion	25
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Locking	19
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Swelling greater than 3 days	31
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Instability	3
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Limited range of motion	7
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Locking	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Swelling greater than 3 days	3
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days	17
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	11

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days	15
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Redness	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Pain greater than 3 days	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were normal.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Redness	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; ; Suspicious Mass or Suspected Tumor/ Metastasis	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; Carotid lesion of the right tibia; Suspicious Mass or Suspected Tumor/ Metastasis	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; pain; Suspicious Mass or Suspected Tumor/ Metastasis	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days	6
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; It is not known if there is a known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; It is not known if the member experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; No, the member do not experience a painful popping, snapping, or giving away of the knee.	2

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, the member experience a painful popping, snapping, or giving away of the knee.	3
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days	11
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; There is no symptom of locking,Instability, Swelling,Redness,Limited range of motion or pain.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The plain films were not normal.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,supsected tumor or Aseptic Necrosis; Pain greater than 3 days	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Immobilization	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient had recent plain films of the knee.; The results of the plain films is not known.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physical Therapy	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	3
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Non-acute Chronic Pain; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed exercise program	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physical Therapy; Yes, the member experience a painful popping, snapping, or giving away of the knee.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; No, there is no known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications; Yes, the member experience a painful popping, snapping, or giving away of the knee.	4

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	5
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The patient has not had recent plain films of the knee.; The ordering physician is not an orthopedist.; There is no suspected meniscus,pre-op or post-op evaluation,non-acute Chronic Pain,suspected tumor or Aseptic Necrosis; Pain greater than 3 days; Yes, patient has completed and failed a course of conservative treatment.; Physician directed course of non-steroidal anti-inflammatory medications	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	8
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is described as chronic; The physician has directed conservative treatment for the past 6 weeks.; The patient has not completed 6 weeks of physical therapy?; The patient has been treated with medication.; The patient received joint injection(s).	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a known mass.; The diagnosis of Mass, Tumor, or Cancer has been established.; The study is requested for follow-up.; The study is not requested to detect residual cancer after a course of treatment has been completed?; The patient is presenting with unresolved or new symptoms	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; It is not known if there is a suspected meniscus, tendon, or ligament injury.; There is a suspicion of fracture not adequately determined by x-ray.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is a suspicion of a meniscus, tendon, or ligament injury.; Surgery or arthroscopy is scheduled in the next 4 weeks.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from a recent injury.; There is not a suspected meniscus, tendon, or ligament injury.; There is a suspicion of fracture not adequately determined by x-ray.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; The study is requested for knee pain.; The pain is from an old injury.; The physician has directed conservative treatment for the past 6 weeks.; The patient has completed 6 weeks of physical therapy?	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; This is a request for a Knee MRI.; The ordering physician is not an orthopedist.; The ordering physician is not an orthopedist.; Suspected meniscus, tendon, or ligament injury; Suspected meniscus, tendon, or ligament injury; Yes, there is a known trauma involving the knee.; Yes, there is a known trauma involving the knee.; Limited range of motion; Limited range of motion	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a Knee MRI.; This study is not being ordered prior to arthroscopic surgery.; "This study is being ordered prior to a planned or scheduled open surgery (joint replacement, etc.)."; The ordering physician is an orthopedist.; Pre-operative Evaluation; Instability	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; There is a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; There is a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is a pre-operative study for planned surgery.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; There is a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; There is a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."	6
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is a suspicion of an infection.; The patient is taking antibiotics.	5
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is a study for a fracture which does not show healing (non-union fracture).; This is a pre-operative study for planned surgery.	2
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is a pre-operative study for planned surgery.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is not taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	13
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for a lower extremity MRI.; This is not a pulsatile mass.; "There is no evidence of tumor or mass from a previous exam, plain film, ultrasound, or previous CT or MRI."; There is not a suspicion of an infection.; The patient is taking antibiotics.; This is not a study for a fracture which does not show healing (non-union fracture).; This is not a pre-operative study for planned surgery.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.	20
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is a suspected tarsal coalition.	7

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has been treated with and failed a course of supervised physical therapy.; The patient does not have a documented limitation of their range of motion.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.	1

General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; The patient does not have an abnormal plain film study of the ankle other than arthritis.; The patient has not used a cane or crutches for greater than four weeks.; There is not a suspected tarsal coalition.; The patient has not been treated with and failed a course of supervised physical therapy.; The patient has not been treated with anti-inflammatory medications in conjunction with this complaint.; The patient does not have a documented limitation of their range of motion.; This study is not being ordered by an operating surgeon for pre-operative planning.	1
General/Family Practice	Approval	73720 MRI LEG OR LOWER EXTREMITY , OTHER THAN JOINT	This is a request for an Ankle MRI.; "There is a history (within the past six weeks) of significant trauma, dislocation, or injury to the ankle."; There is not a history of new onset of severe pain in the ankle within the last two weeks.; There is not a suspected tarsal coalition.; The patient has a documented limitation of their range of motion.	5

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; It is not known if there is an abdominal and pelvic or retroperitoneal mass that has been confirmed.	1

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; It is not known if there is a suspicion of an adrenal mass.; It is not known if this is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	3
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is NOT a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.; The ordering physician is not a hematologist/ oncologist.	1

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Abd pain; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	abdominal pain low back pain; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; < Enter date of initial onset here - or Type In Unknown If No Info Given >; It is not known if there has been any treatment or conservative therapy.; < Describe primary symptoms here - or Type In Unknown If No Info Given >	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Abdominal pain ,; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	abdominal pain radiating into chest and back. generalized weakness.; This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; This study is being ordered for another reason besides Crohn's disease, Abscess, Ulcerative Colitis, Acute Non-ulcerative Colitis, Diverticulitis, or Inflammatory bowel disease.; There are no findings that confirm hepatitis C.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	abdominal pain, diarrhea, loss of appetite for approximately 2 months. Pain to abdomen.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis	1

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	abdominal pain, negative kidney stone study in ER, colonoscopy negative; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	abdominal pain; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Confirmed renal cyst with family history of renal cancer.; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; No,there is not an abdominal and pelvic or retroperitoneal mass that has been confirmed.	1

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	CT abdomen pelvis revealed a right kidney lesion with further workup recommended by Radiology; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	DIZZINESS,ABD PAIN,BLOATING,DIARRHEA,FLATULENCE,NAUSEA,DIFFUSE PAIN,RIGHT UPPER QUADRANT PAIN,COMMON BILE DUCT DILATION,R/O CBD STONE,NEOPLASM.; This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; It is not known if this patient is experiencing hematuria.	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Eval for gallstones 7/6 abnormal u/s; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	hernia very painful and continues to get bigger and bigger. Had hernia repair in 2009.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	left upper quad pain with palpable mass; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.	1

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	located primarily in the right upper quadrant and epigastric region. There is some radiation to the right lower quadrant. It began 3 weeks ago. The onset of pain occurred drinking any water. He characterizes it as cramping and dull. It is of severe i; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Nausea, vomiting and RUQ pain: Patient continues to have right upper quadrant pain. She reports a colicky pain that is associated with nausea and vomiting. Her symptoms started a low more than 54 hours ago and have been worsening. She has not had any sign; This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; Which organ is enlarged? Other	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Palpable mass, left rib area Worsening pain associated; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; The patient does not have new symptoms including hematuria, new lab results or other imaging studies including ultrasound, doppler or x-ray (plain film) findings, suspicion of an adrenal mass or suspicion of a renal mass.	1

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Patient complains of worsening left upper quadrant abdominal pain; left upper quadrant tenderness with firm ridge felt on the surface of the abdomen upon deep palpitation. no bulge noted / flat upon deep palpitation for possible herniation, no distensi; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	PATIENT HAS BEEN COMPLAINING OF LOWER ABDOMINAL PAIN WITH NO IMPROVEMENT OVER THE LAST FEW WEEKS.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone; Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement; Known or suspected infection such as pancreatitis, etc.; There are no findings of Hematuria, Lymphadenopathy, weight loss, abdominal pain, diabetic patient with gastroparesis	1

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Patient has been having abdomen pain since 09/26. Patient has had an ultrasound of her abdomen which came back normal. She is still having the unexplained LUQ abdomen pain.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	patient having severe abdominal pain preventing normal diet, causing weight loss over time, and interfering with adls; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Patient is having heavy bleeding in her stools, patient has a history of tumors, her pain is getting worse , patient has to use pads because she soils most of the time, very tender in the abdominal area.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Patient presents with c/o mass to left upper quadrant; first noticed x1week ago. Patient reports site is tender to palpation, dies any change in size over the past week. Reports a history of uterine cancer; reports total hysterectomy in 2010; This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is not a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.	1

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	PCP is considering the possibility of Cushing's syndrome based on the symptoms listed previously.; This study is being ordered for Inflammatory/ Infectious Disease.; 09/16/2016; There has been treatment or conservative therapy.; Febrile illness associated with pharyngitis, nausea, myalgias, headaches with facial swelling and visual changes ,poor energy, symptoms similar to Cushing's syndrome.; Increased rest, fluid intake and Vitamin C intake	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	possible hernia; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	PT HAD LAP GB SURGERY IN 2005 AND LAP APPY IN 2014 AT SAME INCISION SITE. HAS HAD PERSISTENT PAIN AT INCISION SITE AT RUQ. THERE ISN'T A PALPABLE HERNIA.NORMAL CHEST XRAY.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	PT HAS PERSISTENT NAUSEA WITH ELEVATED LIVER ENZYMES AND IS UNABLE TO TOLERATE THE RECUMBANCY OF A HIDA SCAN DUE TO HER COPD AND BREATHING ISSUES AND PAIN; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	PT HAVING ABD PAIN WITH NAUSEA AND VIMITTING. HAD A CT ABD AND PELVIS WITH CONTRAST THAT SHOWED 1.0x0.9CM NODULE OF THE MEDIAL LIMB OF THE LEFT ADRENAL GLAND.; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There are no new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; No,there is not an abdominal and pelvic or retroperitoneal mass that has been confirmed.	1

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Pt having persistant nausea and vomiting, and diarrhea, and RUQ pain since 8/9/2016. Nuc Med of Gall Bladder normal on 8/29/2016.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	r/o diverticulitis; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	recurrent abdominal pain w/ nausea and vomiting; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	SEVERE ABD PAIN IN FEMALE,RUQ TENDERNESS,EPIGASTRIC PAIN,BACK PAIN ,FEVER,NAUSEA,SYMPTOMS ARE CONSTANT X 5 DAYS,CVA TENDERNESS; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Splenic mass, found on prior CT imaging, this is a 6 month follow up on known tumor.; This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; It is not known if this is a request for initial staging of a known tumor other than prostate.; It is not known if there are new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; It is not known if this is a request for follow up to a known tumor or abdominal cancer.; It is not known if there is a palpable or observed abdominal mass.; It is not known if there is an abdominal and pelvic or retroperitoneal mass that has been confirmed.	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	splenomegaly present, with splenic edge palpable 2 cm below the LCM;; This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; It is not known if there is evidence of organ enlargement on ultrasound, plain film, or IVP.	1

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered as a pre-op or post op evaluation.; The requested study is for post-operative evaluation.; The requested study is a first follow up study for a post operative complication.	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered as a pre-op or post op evaluation.; The requested study is for pre-operative evaluation.; The study is requested by a surgeon, specialist or PCP on behalf of a specialist who has seen the patient.	2
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is a request for initial staging of a known tumor other than prostate.; No, this is not a request for follow up to a known tumor or abdominal cancer.	3
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There are new signs or symptoms including hematuria, presenting with known cancer or tumor.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; No, there is not an abdominal and pelvic or retroperitoneal mass that has been confirmed.	1

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; No, there is a palpable or observed abdominal mass.; Yes, there is a Is there an abdominal and pelvic or retroperitoneal or abdominal mass that has been confirmed.	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; No, there has not been a recent abdominal CT scan.	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; This is not a request for initial staging of a known tumor other than prostate.; There is no known prostate cancer with a PSA greater than 10.; No, this is not a request for follow up to a known tumor or abdominal cancer.; Yes, there is a palpable or observed abdominal mass.; Yes, there has been a recent abdominal CT scan.; No, this is not a repeat of a CT of the abdomen within 6 weeks.	1

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a known tumor, cancer, mass, or rule out metastases.; Yes, this is a request for follow up to a known tumor or abdominal cancer.	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; It is not known if there is a strong suspicion of kidney or ureteral stones.; This patient is experiencing hematuria.	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is a known or a strong suspicion of kidney or ureteral stones.	13
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; There is neither a known nor a strong suspicion of kidney or ureteral stones.; This patient is experiencing hematuria.	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a kidney/ureteral stone.; This patient is experiencing hematuria.; The hematuria is newly diagnosed.	2
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; It is not known if there is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is a suspicion of an adrenal mass.	2

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is a suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.	31
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; It is not known if there are new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; It is not known if there is a suspicion of an adrenal mass.; This is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are new symptoms including hematuria.	2
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are new lab results or other imaging studies including ultrasound, Doppler or plain films findings.	3

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a suspicious mass or tumor.; There is no suspicious mass found using ultrasound, IVP, Endoscopy, colonoscopy, or sigmoidoscopy.; There are no new symptoms including hematuria.; There are no new lab results or other imaging studies including ultrasound, Doppler or plain films findings.; There is not a suspicion of an adrenal mass.; This is a request to confirm a suspicious renal mass suggested by physical exam, lab studies, IVP or ultrasound.	2
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a vascular disease.; The requested studies are being ordered for known or suspected aneurysms and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.	2
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for a vascular disease.; The requested studies are being ordered for known or suspected blood clot, thrombosis, or stenosis and are being ordered by a surgeon or by the attending physician on behalf of a surgeon.	2
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; It is not known if the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	29
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; There are NO abnormal lab results or physical findings on exam such as rebound or guarding that are consistent with peritonitis, abscess, pancreatitis or appendicitis.; There are known or endoscopic findings of Inflammatory bowel disease.; No, the patient has not been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for an infection such as pancreatitis, appendicitis, abscess, colitis and inflammatory bowel disease.; Yes, the patient has been seen by a specialist or are the studies being requested on behalf of a specialist for an infection.	10

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of Diabetic patient with gastroparesis.	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of Hematuria.	7
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are clinical findings or indications of unexplained weight loss of greater than 10% body weight in 1 month	2
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	This is a request for an Abdomen CT.; This study is being ordered for organ enlargement.; There is evidence of organ enlargement on ultrasound, plain film, or IVP.	8

General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Trying to rule out a hernia, patient is having lower abdomen pain and pressure.; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
General/Family Practice	Approval	74150 CT ABDOMEN WITHOUT CONTRAST	Ultrasound recommends further imaging; This is a request for an Abdomen CT.; This study is being ordered for another reason besides Kidney/Ureteral stone,  Known Tumor, Cancer, Mass, or R/O metastases, Suspicious Mass or Tumor, Organ Enlargement,  Known or suspected infection such as pancreatitis, etc..; There are no findings of Hematuria, Lymphadenopathy,weight loss,abdominal pain,diabetic patient with gastroparesis	1
General/Family Practice	Approval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCON TRAST	This is a request for CT Angiography of the Abdomen and Pelvis.	7

General/Family Practice	Approval	74174 CT ANGIOGRAPHY ABDOMEN AND PELVIS W/CONTRAST/NONCON TRAST	UNKNOWN; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; SEVERAL YEARS; There has been treatment or conservative therapy.; PT CANT BREATHE; INHALERS, BREATHING TREATMENTS, RESPIRATORY THERAPY.	1
General/Family Practice	Approval	74175 CT ANGIOGRAPHY ABDOMEN W/CONTRAST/NONCON TRAST	Yes, this is a request for CT Angiography of the abdomen.	12
General/Family Practice	Approval	74176 CT ABD & PELVIS W/O CONTRAST		5
General/Family Practice	Approval	74176 CT ABD & PELVIS W/O CONTRAST	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for an abdomen-pelvis CT combination.; A urinalysis has been completed.; This study is being requested for abdominal and/or pelvic pain.; The results of the urinalysis were normal.; The study is being ordered for chronic pain.; This is the first visit for this complaint.; The patient had an amylase lab test.; The results of the lab test were normal.	1

General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Ultrasound shows enlarged liver with fluid around it, appeared to be fatty infiltration	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Unknown	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; Follow up to a abn CT recommended by radiologist	1

General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; "There are no documented physical findings (painless hematuria, etc.) consistent with an abdominal mass or tumor."; "The patient has had an abdominal ultrasound, CT, or MR study."; hepatic steatosis, the markedly heterogeneous attenuation of the liver may obscure an underlying mass. mri with contrast is recommended for further evaluation.	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; It is not known if there are documented physical findings consistent with an abdominal mass or tumor.; "The patient has had an abdominal ultrasound, CT, or MR study.";	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A abnormality was found on the pancreas during a previous CT, MRI or Ultrasound.	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is being ordered for suspicious mass or suspected tumor/metastasis.; The patient had previous abnormal imaging including a CT, MRI or Ultrasound.; A liver abnormality was found on a previous CT, MRI or Ultrasound.; There is suspicion of metastasis.	1

General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; Patient had an MRI of the abdomen 8/28/14 that showed a liver cyst , mild prominence of the pancreatic head and mild prominence of the adrenals that recommended short term follow up in 6 months and this has not been done	1
General/Family Practice	Approval	74181 MRI ABDOMEN	This request is for an Abdomen MRI.; This study is not being ordered for known tumor, suspicious mass or suspected tumor/metastasis, organ enlargement, known or suspected vascular disease, hematuria, follow-up trauma, or a pre-operative evaluation.; patient has masses on liver, f/u to previous MRI to see if there have been changes	1
General/Family Practice	Approval	75557 Cardiac MRI Morph & structure w/o contrast	This is a request for a heart or cardiac MRI	1
General/Family Practice	Approval	75571 Coronary Artery Calcium Score, EBCT	Unknown; This is a request for a CT scan for evaluation of coronary calcification.	1

General/Family Practice	Approval	75574 CT Angiography Heart coronary arteries, CCTA	The patient does not have three or more of the following conditions: age over 50, diabetes, history of hypertension, history of LDL cholesterol above 130, history of HDL cholesterol below 35, obesity (BMI above 35), and/or active history of smoking.; This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; No, patient does not have new onset congestive heart failure.; Elevated calcium scoring test , elevated blood pressure , headaches, fatigue, strong family history of heart disease.; Yes, there is Chronic Chest Pain.	1
General/Family Practice	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This is a request for CTA Coronary Arteries.; The study is requested for congestive heart failure.; The member does not have known or suspected coronary artery disease	1
General/Family Practice	Approval	75574 CT Angiography Heart coronary arteries, CCTA	This request is for a Coronary CT Angiography study.; No, patient did not have a Nuclear Cardiology study within the past six months.; This study is being ordered for suspected Coronary Artery Disease (CAD) and symptomatic?; Yes, patient has new onset congestive heart failure.; 70% CARTOID STENOSIS BIL CORANARY ARTERIES RESULTED FROM CAROTID ULTRASOUND.PT HAS CHEST DISCOMFORT,CHF,SHORT OF BREATH AND DIZZINESS	1
General/Family Practice	Approval	75635 CTA AA&BI ILIOFEM LXTR RS&I C- /C+ POST-PXESSING	Yes, this is a request for CT Angiography of the abdominal arteries.	18

General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral		1
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for Breast MRI.; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.	1
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; It is unknown if there is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).	1
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).	1

General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	< Enter answer here - or Type In Unknown If No Info Given. >; This is a request for Breast MRI.; This study is being ordered for something other than known breast cancer, known breast lesions, screening for known family history, screening following genetic testing or a suspected implant rupture.	2
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	Bracca mutation positive; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).	1
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	Family history of breast cancer, 1 1st degree and 2 second degree family members; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).	1
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	Pt has a mass in left breast and suspicious lesion in the right breast behind the implant.; This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are NOT benign lesions in the breast associated with an increased cancer risk.	1

General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	This is a request for Breast MRI.; This study is being ordered as a screening examination following genetic testing for breast cancer.; The patient has a lifetime risk score of greater than 20.	1
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).	2
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There is a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).	6
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	This is a request for Breast MRI.; This study is being ordered for a known history of breast cancer.; No, this is not an individual who has known breast cancer in the contralateral (other) breast.; Yes, this is a confirmed breast cancer.; Yes, the results of this MRI (size and shape of tumor) affect the patient's further management.	3
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	This is a request for Breast MRI.; This study is being ordered for a suspected implant rupture.; Yes,this study is being ordered to evaluate a suspected silicone implant rupture.	1
General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	This is a request for Breast MRI.; This study is being ordered for known breast lesions.; There are benign lesions in the breast associated with an increased cancer risk.	5

General/Family Practice	Approval	77058 MRI breast,without and/or with contrast material(s);unilateral	unknown; This is a request for Breast MRI.; This study is being ordered as a screening examination for known family history of breast cancer.; There are NOT benign lesions in the breast associated with an increased cancer risk.; There is NOT a pattern of breast cancer history in at least two first-degree relatives (parent, sister, brother, or children).	1
General/Family Practice	Approval	77078 CT bone mineral density study, 1 or more sites; axial skeleton	This is a request for a Bone Density Study.; This patient has not had a bone mineral density study within the past 23 months.; This is a bone density study in a patient with clinical risk of osteoporosis or osteopenia.	2
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study		1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	< Enter answer here - or Type In Unknown If No Info Given. >; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>&lt; Enter answer here - or Type In Unknown If No Info Given. &gt;; This study is being ordered as a pre-operative evaluation.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient has not had a recent stress echocardiogram.; The patient has known CAD.; This patient had a previous myocardial infarction.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	<p>; The study is being ordered for known CAD.; The CAD diagnosis was established by something other than, a previous cardiac surgery / angioplasty, a previous MI, congestive heart failure or a previous stress echocardiogram, nuclear cardiology study or a stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).</p>	1

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for known CAD.; The patient is not presenting new symptoms of chest pain or increasing shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; This patient had a previous myocardial infarction.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is male.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	; The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Abnormal EKG; The patient's age is between 45 and 64.; The patient has had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain, left shoulder and neck pain that has been ruled out for neuro/ortho problems.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	chest pain; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	COMPLAINTS OF CHEST PAIN AND SHORTNESS OF BREATH; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	History of diabetes and atrial fib. chronic systolic chf EF 25-30% per echo 8/1/16. Presents with lifest; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	none given; The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has NONE of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	none; The caller indicated that the study was not ordered for: Known or suspected coronary artery disease, post myocardial infarction evaluation, pre operative or post operative (Cardiac surgery, angioplasty or stent) evaluation.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	None; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Patient has a 6 month history of increasing chest pain and shortness of breath, also has hypertension and hyperlipidemia which puts him at an increase risk for CAD; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	patient has chest pain , he is short of breath , he has leg swelling; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Pt with chest pain and shortness of breath.; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	Reported by patient. Location: chest; epigastrium; left substernal; radiates to the left arm Quality: pressure; tightness Severity: mild  Duration: lasts minutes; started Saturday PTA around 6:00 PM days ago; typical duration is 20 minutes (x one)  O; The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had previous cardiac surgery or angioplasty.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have a physical limitation to exercise.	1

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	She has multiple complaints today of chest pain, she also has anterior chest pain with exertion. can last a few minutes after she stops her activity. she has shortness of breath and weakness with it. Patient is unable to walk on treadmill due to hip pa; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; Another test besides a Nuclear Cardiology Study, CCTA or Stress Echocardiogram has been completed to evaluate new or changing symptoms.; The patient has 1 or less cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; There are new or changing cardiac symptoms including atypical chest pain (angina) and/or shortness of breath.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has diabetes.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is diabetic.; The patient is less than 45 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	4
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is not diabetic.; The patient is less than 45 years old.; The patient has had a recent exercise treadmill test that was positive.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is not diabetic.; The patient is less than 45 years old.; The patient has not had a recent exercise treadmill test that was positive.; The patient has one or more of the following: heart transplant, aortic aneurysm, carotid artery narrowing or stenosis, and/ or peripheral vascular disease or narrowed blood vessels in the legs.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient is at least 65 years old.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient does not have diabetes.	2
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for a post myocardial infarction evaluation.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has not had a nuclear cardiology study since having an MI.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient had a previous cardiac surgery or angioplasty.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	3

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for known CAD.; The patient is presenting new symptoms of chest pain or increasing shortness of breath.; This patient's diagnosis was established by a previous stress echocardiogram, nuclear cardiology study, or stress EKG.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	3
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is not presenting with symptoms of atypical chest pain and/or shortness of breath.; The patient has not had a recent non-nuclear stress test.; The patient had a recent abnormal EKG consistent with CAD.; The patient has not had a recent stress echocardiogram.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; The patient is female.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; It is not known if there are documented findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; It is not known if the patient is clinically obese or if there is an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; It is not known if the patient has a physical limitation to exercise.	2

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	14
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; It is not known if the patient has had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	2

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	The study is being ordered for suspected CAD.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; There are documented clinical findings of hypertension.; The patient has not had a recent non-nuclear stress test.; "Patient is not clinically obese, nor has an emphysematous chest configuration."; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	3
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has 3 or more cardiac risk factors; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The study is requested for suspected coronary artery disease.; The member has known or suspected coronary artery disease.; The BMI is 40 or greater	1
General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The study is not requested for pre op evaluation, cardiac mass, CHF, septal defects, or valve disorders.; The member does not have known or suspected coronary artery disease	1

General/Family Practice	Approval	78451 Myocardial perfusion imaging, tomographic (SPECT); single study	This study is being ordered as a pre-operative evaluation.; The patient is presenting with symptoms of atypical chest pain and/or shortness of breath.; There are no documented clinical findings of hyperlipidemia.; The patient has not had a recent non-nuclear stress test.; The patient has not had a recent stress echocardiogram.; The patient has suspected CAD.; This patient is clinically obese or has an emphysematous chest configuration.; The patient's age is between 45 and 64.; The patient has not had a stress echocardiogram within the past eight weeks.; This evaluation is prior to major surgery involving general anesthesia.; This is a request for Myocardial Perfusion Imaging (Nuclear Cardiology Study).; The patient has a physical limitation to exercise.	1
General/Family Practice	Approval	78813 PET IMAGING WHOLE BODY	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for a metastatic disease.; There are 2 exams are being ordered.; One of the studies being ordered is a Breast MRI, CT Colonoscopy, EBCT, MRS, PET Scan, or Unlisted CT/MRI.	1
General/Family Practice	Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.	2

General/Family Practice	Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was NOT identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.	1
General/Family Practice	Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has not been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; This study is being requested for Lung Cancer.	1
General/Family Practice	Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on an imaging study.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lymphoma or Myeloma.; This would be the first PET Scan performed on this patient for this cancer.	1
General/Family Practice	Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for initial treatment (after a diagnosis of Cancer has been made).; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.	1
General/Family Practice	Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is not being ordered for Cervical CA, Brain Cancer/Tumor or Mass, Thyroid CA or other solid tumor.	1

General/Family Practice	Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lung Cancer.; The patient has been diagnosed with NON small lung cancer.; The study is NOT being ordered after completing a course of treatment initiated in the last 8 weeks or because they are experiencing new sings or symptoms.	1
General/Family Practice	Approval	78813 PET IMAGING WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Melanoma.; This is NOT for evaluation of regional lymph nodes.; This would be the first PET Scan performed on this patient for this cancer.	1
General/Family Practice	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; A nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; The solitary pulmonary nodule was identified on an imaging study in the last 30 days.; This study is being requested for Lung Cancer.; This would be the first PET Scan performed on this patient for this cancer.	2
General/Family Practice	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; It is unknown why the study is being ordered.; This study is being ordered for something other than Breast CA, Lymphoma, Myeloma, Ovarian CA, Esophageal CA, Lung CA, Colorectal CA, Head/Neck CA, Melanoma, Soft Tissue Sarcoma, Pancreatic CA or Testicular CA.; This study is being requested for Brain Cancer/Tumor or Mass.	1

General/Family Practice	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; The suspicion of cancer is based on a diagnostic/lab test.; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lymphoma or Myeloma.; It is unknown which lab test suggest their need for ordering this study.	1
General/Family Practice	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered for subsequent treatment.; This study is being requested for Lymphoma or Myeloma.; The patient is experiencing new signs or symptoms indicating a reoccurrence of cancer.; This would be the first PET Scan performed on this patient for this cancer.	1
General/Family Practice	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Head/Neck Cancer.; The patient has Brain cancer.	1
General/Family Practice	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; This study is being ordered to establish a cancer diagnosis.; This study is being requested for Lung Cancer.	3
General/Family Practice	Approval	78816 PET IMAGING FOR CT ATTENUATION WHOLE BODY	This is a request for a Tumor Imaging PET Scan; Unknown if a nodule of less than 4 centimeters has been identified on recent imaging; This study is being ordered to evaluate a solitary pulmonary nodule.; This study is being requested for Lung Cancer.	1

General/Family Practice	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	< Enter answer here - or Type In Unknown If No Info Given. >; This study is being ordered for something other than: known trauma or injury, metastatic disease, a neurological disorder, inflammatory or infectious disease, congenital anomaly, or vascular disease.; 8/12/2016; There has not been any treatment or conservative therapy.; pain, upper quad-lower quad- chest pain	1
General/Family Practice	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; It is unknown if this study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.; The patient has an abnormal EKG	1
General/Family Practice	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The abnormal symptom, condition or evaluation is not known or unlisted above.	1

General/Family Practice	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicative of heart disease.; This is for the initial evaluation of abnormal symptoms, physical exam findings, or diagnostic studies (chest x-ray or EKG) indicatvie of heart disease.; The patient has shortness of breath; Shortness of breath is not related to any of the listed indications.	1
General/Family Practice	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for another reason; This study is being ordered for evaluation of cardiac arrhythmias; This study is being requested for the initial evaluation of frequent or sustained atrial or ventricular cardiac arrhythmias.	2
General/Family Practice	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; It is unknown if the murmur is grade III (3) or greater.; There are clinical symptoms supporting a suspicion of structural heart disease.	5
General/Family Practice	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is grade III (3) or greater.	8

General/Family Practice	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Murmur.; This request is for initial evaluation of a murmur.; The murmur is NOT grade III (3) or greater.; It is unknown if there is clinical symptoms supporting a suspicion of structural heart disease.; This is NOT a request for follow up of a known murmur.	1
General/Family Practice	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Cardiac Valves.; This is an annual review of known valve disease.; It has been 24 months or more since the last echocardiogram.	1
General/Family Practice	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; It is unknown if this is being ordered for initial diagnosis of congenital heart disease, Annual follow up of congenital heart disease or Evaluation of change of clinical status.	1
General/Family Practice	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for evaluation of change of clinical status.	1
General/Family Practice	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Congenital Heart Defect.; This is for initial diagnosis of congenital heart disease.	1

General/Family Practice	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Heart Failure; This is for the initial evaluation of heart failure.	5
General/Family Practice	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Left Ventricular Function.; The patient does not have a history of a recent heart attack or hypertensive heart disease.	1
General/Family Practice	Approval	93307 TTHRC R-T IMG 2D +-M-MODE REC COMPL	This a request for an echocardiogram.; This is a request for a Transthoracic Echocardiogram.; This study is being ordered for Evaluation of Pulmonary Hypertension.	3
General/Family Practice	Approval	93350 ECHO TTHRC R-T 2D +-M-MODE COMPLETE REST&STRS	This is a request for a Stress Echocardiogram.; None of the listed reasons for the study were selected; The member does not have known or suspected coronary artery disease	2
General/Family Practice	Approval	93350 ECHO TTHRC R-T 2D +-M-MODE COMPLETE REST&STRS	This is a request for a Stress Echocardiogram.; The patient has NOT had cardiac testing including Stress Echocardiogram, Nuclear Cardiology (SPECT/MPI), Coronary CT angiography (CCTA) or Cardiac Catheterization in the last 2 years.; The member has known or suspected coronary artery disease.	3
General/Family Practice	Approval	S8032 Low-dose Computed Tomography For Lung Cancer Screening	; This request is for a Low Dose CT for Lung Cancer Screening (S8032); No, I do not want to request a Chest CT instead of a Low Dose CT for Lung Cancer Screening (S8032).; The patient is presenting with pulmonary signs or symptoms of lung cancer or there are other diagnostic test suggestive of lung cancer.	1

General/Family Practice	Approval	S8032 Low-dose Computed Tomography For Lung Cancer Screening	This is a follow up to a CT last year and this is a follow up that test was negative. Patient is a smoker; This request is for a Low Dose CT for Lung Cancer Screening (S8032); This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; It is unknown when or if the patient quit smoking.	1
General/Family Practice	Approval	S8032 Low-dose Computed Tomography For Lung Cancer Screening	This request is for a Low Dose CT for Lung Cancer Screening (S8032); This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; It is unknown if the patient is presenting with pulmonary signs or symptoms of lung cancer or if there are other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.	1

General/Family Practice	Approval	S8032 Low-dose Computed Tomography For Lung Cancer Screening	This request is for a Low Dose CT for Lung Cancer Screening (S8032); This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient has not quit smoking.	12
General/Family Practice	Approval	S8032 Low-dose Computed Tomography For Lung Cancer Screening	This request is for a Low Dose CT for Lung Cancer Screening (S8032); This patient has NOT had a Low Dose CT for Lung Cancer Screening (S8032) in the past 11 months.; The patient is between 55 and 80 years old.; This patient is a smoker or has a history of smoking.; The patient has a 30 pack per year history of smoking.; The patient is NOT presenting with pulmonary signs or symptoms of lung cancer nor are there other diagnostic test suggestive of lung cancer.; The patient quit smoking less than 15 years ago.	4
General/Family Practice	Approval	S8037 mrcp	Patient with recurring RUQ pain, but negativbe GB US, pipida scan, and now ct abdomen. He had slight liver enzyme elevation. rt sided lower abdominal pain w/nausea and vomiting since Sunday/pt has gall bladder and appendix. RUQ pain since Sunday. It is sh; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1
General/Family Practice	Approval	S8037 mrcp	PT has high liver function test. N&V; This is a request for MRCP.; There is no reason why the patient cannot have an ERCP.	1

General/Family Practice	Approval	S8037 mrcp	This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; It is not known if patient requires evaluation for a congenital defect of the pancreatic or biliary tract.; The MRCP will be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.	1
General/Family Practice	Approval	S8037 mrcp	This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient does not require evaluation for a congenital defect of the pancreatic or biliary tract.; The MRCP will be used to identify a pancreatic or biliary system obstruction that cannot be opened by ERCP.	1
General/Family Practice	Approval	S8037 mrcp	This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient does not have an altered biliary tract anatomy that precludes ERCP.; The patient requires evaluation for a congenital defect of the pancreatic or biliary tract.	1
General/Family Practice	Approval	S8037 mrcp	This is a request for MRCP.; There is a reason why the patient cannot have an ERCP.; The patient has not undergone an unsuccessful ERCP.; The patient has an altered biliary tract anatomy that precludes ERCP.	1
